Karthik Venkatesh

Karthik Venkatesh is Senior Vice President, AI & Enterprise Technology at Zayo Group, where he leads the company's strategy across artificial intelligence, cloud and AI infrastructure, enterprise platforms, architecture, automation, and technology operations. He brings deep experience at the intersection of AI, infrastructure, and large-scale enterprise transformation, including three years at Google as a Customer Transformation Executive, where he worked with major organizations on cloud and digital transformation. His background spans hyperscale cloud, enterprise technology modernization, product strategy, and building the data and platform foundations required to scale AI across complex organizations.
