

Wayne Sadin
CIO/ Board & C-Suite Advisor/Independent Director Biography

Wayne Sadin is a board advisor and CIO with a 40-year technology career spanning retail, logistics, financial services, energy, healthcare, manufacturing, and consulting, at firms from start-ups to multinationals. In addition to his work as an Interim & Turnaround CIO, his focus is on Board & C-Suite IT governance, including the emerging areas of AI & Quantum Computing governance. He has advised CEOs and Boards and served as an independent director. He also follows the rise of 'augmented employees': AI, robotics, and augmented reality making workers smarter, stronger, and safer.

Most recently, as EVP and Interim CIO of PriceSmart (2023–2026), he rebuilt the company's technology platform and cybersecurity stack, led AI-driven forecasting and replenishment, and established enterprise data governance across operations in 14 countries — work the company's CEO publicly credited on its July 2026 earnings call.

His credentials include a BS in Business Administration and Computer Science from Boston University and an MS in Management of Technology from UT Dallas, where he has also guest-lectured on cybersecurity. He is an NACD Certified Director, AI Certified Director, and Board Governance Fellow, with cybersecurity oversight certification from NACD and Carnegie Mellon, and holds a Qualified Technology Expert Director certification from the Digital Directors Network. He is a member of NACD and of the FBI's InfraGard program.

Computerworld named him a Premier 100 IT Leader, and in 2020 he was ranked #2 on the global IT Leader Power 100 list. From 2018 to 2023 he created the monthly 'Sadin on Digital' video column for Cloud Wars, and since 2021 he has written and created video analyses for Acceleration Economy on C-suite and board issues, IT governance, AI, and cybersecurity.
