Who We Are.....

ExploreMore! has been serving the tri-state area for over 20 years. Our program was created to meet the needs of students who love to learn and wish to go beyond what is taught in the classroom. ExploreMore! courses are for students from K-12th grade. We offer courses that are of high interest to our students in the areas of science, mathematics, writing, visual arts, performing arts, and technology that offer a learning culture where like-minded students come together to share their passion.

What Makes ExploreMore! Different.....

We are student focused and bring classes that are based on input from our families to best meet their needs. Our environment values creativity, diversity, and experimentation and fosters this through hands-on, outside of the box teaching methods. Our teachers are passionate about their subject matter and work tirelessly to promote critical thinking and independent investigation. What truly sets us apart is our focus on the whole child. Our families are invited to lectures by world-renowned experts in gifted education. We want to be your resource for supporting, enriching, and engaging your bright child.

**"We are treasure chests with more jewels inside than we can imagine."
—Ifeanyi Enoch Onuoha**

ExploreMore! Classes at a Glance

Grades K-3

Illustrators and Artists

Jump into the world of all things creative. Immerse yourself into the world's greatest authors, illustrators, and composers. This class will expand your understanding of culture and creativity in ways you won't even expect!

Ooey Gooley Mania

Slime is just the beginning for this introduction to chemistry class. Our mad scientists will be using scientific methods and inquiry to create awesomely ooey and grossly gooey projects!

Superhero Science

Back by popular demand, this class is always a fan favorite! Whether it is looking at the science behind our comic book heroes or designing your own hero, this class could not pack any more BAM! into it! Our spidey-sense tells us you will love this class!

Jedi Master Class

In a galaxy not too far away, our intergalactic Jedi Master will teach younglings the ways of the force. Be ready for a fully immersive class where science meets mythology. This new class will be EPIC!

Dino-Mite

Stegosaurus, Brontosaurus, and T-Rex, oh my! Put on your paleontologist hat and travel through time to see what it was like when the dinosaurs roamed the earth! We will explore the world as it was in the Prehistoric era and look for clues as to why these great reptiles became extinct. We will also be digging for fossils and comparing dinos to their modern descendants.

Intro to Robotics

Who doesn't love robots? This class will introduce students to the exciting world of coding using Ozobots and Optibots. Students will be solving fun problems and challenges using robots. ***Students must bring their own device (tablet, Kindle, Ipad, etc.) with Ozoblocky installed.***

#WeAreYourResource #WeAreMore

Grades 4-6

Mrs. Weasley's Knitting Party

We can't say you will have magic knitting needles like Mrs. Weasley does in Harry Potter, but our teacher will have you knitting a house scarf like a witch or wizard in no time flat!

All Aboard, France!

Parlez-Vous Francais? Or would you like to speak French? We will virtually travel 4000 miles to experience French culture, learn key phrases, try some French cuisine, and recreate French art and architecture.

Dissection

Are you a future doctor or veterinarian? Delve into anatomy and physiology thru dissection. Compare your dissected specimens with other specimens and the human anatomy. This class will give you the opportunity to perform surgery and give you a jump in biology classes.

Rube Goldberg

Ever want to build a better mousetrap? Rube Goldberg was a master at solving everyday problems with complicated machines. In this class, students will be designing their own Rube Goldberg machines just as he did through comics and construction.

Beauty and Art of Medieval Ages

Steeping ourselves in all things 'Medieval', ExploreMore! students will discover the world of Illuminated Manuscripts through the creation of a beautiful illuminated manuscript of their own, complete with authentic calligraphy and gold leaf! Students will also create a large but fantastic illuminated letter that they will paint with dyes on a cotton T-shirt. Students will thoroughly enjoy the monastic environment of our CLS 'scriptorium' (aka art room!).

Shark Tank

Calling all budding entrepreneurs and inventors! This class will challenge you creatively to find a solution to a problem, develop an invention to solve that problem, and sell it- all the while you develop your public speaking skills. This is a must class for all future business leaders!

Phenomenal Physics

We had such fun in the summer that we decided to do have some more fun with physics! What is not to love about building bridges, making parachutes, and engineering structures??

Grades 7-12

ACT Prep

Is your child taking the December 8th ACT? This class is for you. We have partnered with College and Beyond to offer an ACT prep class that is an individualized approach to the ACT. We have had amazing results with many students going up as high as 6 points! This class operates independently of ExploreMore!. **The class costs \$350 and students must purchase their own ACT Prep book. The class runs 11/3, 11/10, 11/17 and 12/1 from 9-1:30.**

Mrs. Weasley's Knitting Party

We can't say you will have magic knitting needles like Mrs. Weasley does in Harry Potter but our teacher will have you knitting a house scarf like a witch or wizard in no time flat!

Rube Goldberg

Ever want to build a better mousetrap? Rube Goldberg was a master at solving everyday problems with complicated machines. In this class, students will be designing their own Rube Goldberg machines just as he did through comics and construction.
