

World Backup Day

March 31, 2017

In honor of **World Backup Day**, March 31st (yes, it is a thing), DWD is putting extra focus on this critical aspect of every business. Now is a great time to complete a quick assessment of your business continuity strategy.

Of course, DWD can assist you with any of the included items. * If you are a Datto user you should be able to make quick work of this!

Business Continuity Quick Assessment

1. Are you utilizing Offsite Backups?

If yes, who is the responsible party?

2. Who is responsible for performing verification restores?

3. What is the last date a verification restore was performed?

4. Are ALL key components being backed up? (Image-based backups are best here)

5. Who receives email notifications of successful/unsuccessful backups?

6. Estimate recovery time in the following cases (this is your Down Time until systems are fully restored or a new system is built and data restored):

- Loss of some data, Ransomware attack:
- Loss of entire server (won't boot, blue screen, etc.):
- Physical damage to server, server room, or entire building (also theft):
