

Notre Dame Cristo Rey High School **proudly celebrates the accomplishments of Math Department Head Ashley Hasling**, whose dedication to education extends far beyond the classroom. This summer, Ms. Hasling earned her Master's Degree through the prestigious **Remick Leadership Program at the University of Notre Dame**, a program nationally recognized for developing transformational leaders in Catholic education.

In her role at NDCR, Ms. Hasling not only teaches mathematics but also **mentors** students in critical thinking, problem-solving, and perseverance — skills that prepare them for college, career, and life. Her achievement reflects the very mission of Notre Dame Cristo Rey: to form leaders of character who will make a positive impact on the world. She was just named NDCR's new Dean of Academics as well! By **living the values she teaches**, Ms. Hasling inspires both her students and colleagues to aim higher, work harder and believe in their potential.
