

## Forest Management Incentive Programs

Ryan Phillips  
Cost Share  
Coordinator  
Georgia Forestry  
Commission

## GFC Involvement

- GFC
  - 30 field foresters
  - Administer and serve as TSP
    - Develop plans - Resource Management Plan
    - Part of overall conservation plan
    - Intermediate Advice
    - Verify performance
  - [www.gatrees.org](http://www.gatrees.org) – overview of programs

## Incentive Programs

- Conservation Reserve Program (CRP) [Sign up through FSA](#)
- Emergency Forest Restoration Program (EFRP)
- Environmental Quality Incentives Program (EQIP)
- Conservation Stewardship Program (CSP) [Sign up through NRCS](#)
- Southern Pine Beetle PRS Program
- Invasive Plant Control Program [Sign up through GFC](#)
- Partners for Fish and Wildlife Program [Sign up through USF&W](#)

Get to know your local agency representatives!

## Incentive Programs

### Conservation Reserve Program (CRP)

- Sign-up for General and Continuous Practices in Progress
- General sign-up ends March 11
- Currently 307k acres enrolled in GA – mostly trees
- 10-15 year contracts
- Cropped 4 out of 6 years between 2012-2017
- 2 kinds of signups – Continuous & General
- CRP General Sign-up – (CP3 & CP3A) (Timber Objective)
  - competitive ranking (50% cost share rate + annual rental payments)
- Continuous Sign-up (CP36 & CP38C) (Longleaf/Wildlife Objective)
  - no ranking (50% cost share rate + PIP + SIP + annual rental payments)

Available acres: within longleaf planting zone

## Incentive Programs

### **Emergency Forest Restoration Program (EFRP)**

- Restores forest after natural disaster
- Natural or artificial regeneration
- Hurricane Michael / Tornadoes / Swamp fires / Ice Storm
- Appropriated by Congress
- Softwood or hardwood restoration
- Targets 75% cost share, not to exceed 75%
- \$2000 minimum - \$500K max.
- Contact FSA when there is damage in your area!

## Incentive Programs

### **Environmental Quality Incentives Program (EQIP)**

- Most popular and inclusive
- Continuous signup / Competitive ranking process
  - Local resource concerns
- Eligible practices include: prescribed burning, pre-commercial & commercial thinning, site preparation and tree planting, brush management, herbaceous weed control, road/trail stabilization, invasive plant control, wildlife opening management and NWSG planting and management
- Typically 3 year contract
- Target +/- 75% cost share
- Pays a flat per acre rate
- General Sign-up & Initiatives (Longleaf, WLFW)

## Incentive Programs

### Conservation Stewardship Program (CSP)

- Reward for good management
- Two types of payments:
  - Annual payment for installing and adopting additional activities and improving, maintaining, and managing existing activities
  - Supplemental payment for the adoption of resource-conserving practices
- 5 year contract
- Go to CSP website to view enhancements - must install at least 1 new enhancement

## Southern Pine Beetle Prevention

### How can you minimize the chance of a southern pine beetle attack?

- Best Prevention is Good Forest Management!!
- Conduct periodic thinnings to make sure the pine stand does not become too dense (Thin when Pine BA>110 - 120). Pre-commercial pine stands, if necessary.
  - Control competition in stand with herbicides or prescribed burning. (Increase Tree Vigor)
  - Plant pine species that are more resistant or at lower density spacing.

## Incentive Programs

### SPB Cost Share Program

#### • **Sign up period usually spring/early summer**

Prevention practices: pre-commercial thinning (\$70), pine release (\$32) & prescribed burning (\$5)

- Loblolly/shortleaf only, except burning young longleaf

Restoration practices: pine and hardwood planting (\$80 - \$115)

Suppression practices: cut or push buffer

- Any active spb infestation

•10 acre practice minimum

•Maximum limit per landowner

#### •Sign-up process

- Complete online application

•Applications are ranked based on spb hazard ranking for county, practice type, etc.

- Active pots of money after the sign-up

## Incentive Programs

### Invasive Plant Control Program (IPSC)

- Sign-up period usually spring/early summer
- Target species: privet spp., Japanese climbing fern, Chinese tallow tree, chinaberry and callery pear
- Available to NIPF lands and those of local governments
- \$60/acre flat rate
- \$4500 maximum – 75 acres
- Minimum 3 acre practice size
- Funding from USFS

## Incentive Programs

### Community Protection Grant

- In partnership with the USFS - pre-suppression fire breaks and burning assistance
- Must be forested land within 10 miles of a National Forest in Georgia

#### Priorities:

- Distance from National Forest – Landowners nearest NF take priority, preferably those that border National Forest. Burns adjacent to FS burns or in conjunction with FS burns will take highest priority
- Fuel load – stands with heaviest fuel loads
- Inaccessible areas where wildfires could occur i.e. railroad & remote areas
- Sign-up through your GFC county ranger or forester

## Incentive Programs

### Other Localized Programs

- **South Georgia Landscape Restoration Cost Share Project**
  - Focus on mid-management activities (burning, herbicide, thinning, mowing, mulching)
- **Shortleaf Pine & Oak Restoration in the Georgia Cumberlands Cost Share Project**
  - Focus in NW Georgia to promote shortleaf pine and oak ecosystem
  - Target practices include cost share for reforestation, burning, thinning, herbicide work
- **Georgia Sentinel Landscape Prescribed Fire Initiative**
  - Administered by Longleaf Alliance
  - Focus on prescribed burning in SE Georgia
