It has been an incredible honor serving as your 2024–2025 President. I'd like to extend my sincere gratitude to our Executive Director, Dr. Michael Roseff, for being the glue that holds everything together, as well as to our past FAPD Presidents for their invaluable support. This year has been filled with an amazing team spirit, engaged FAPD members, energizing continuing education programs, and networking opportunities across all of our regions. Our biggest event is still ahead. I look forward to seeing you all at our **Annual FAPD Meeting on Saturday, October 25, 2025, in Orlando, Florida**! Stay tuned for our "Know Before You Go" memo that will be distributed in a couple of weeks.

-Dr. Erika King

Mission

To provide community, advocacy, and resources for the pediatric dentists in Florida so that we can provide optimal care for infants, children, adolescents, and persons with special health care needs.

Vision

A group of pediatric dentists who are passionate, engaged and are supported by peers, healthcare professionals and community as the authority for pediatric oral health.

Membership

We hope that you will read our newsletter to learn more about organized pediatric dentistry in Florida and discover upcoming events where you can learn online and in person while connecting with colleagues. Visit www.fapd4kids.org to join.

3RD QUARTER **UPDATES**

American Academy of Pediatric Dentistry

As you may have heard, the American Dental Association (ADA) House of Delegates (HOD) will be considering **Resolution 407: Development of ADA Pediatric Guidelines for the Use of Sedation and General Anesthesia by Dentists** at its upcoming meeting on October 25-28 in Washington, DC. While the AAPD appreciates the attention on pediatric care, we have significant concerns regarding this resolution. The resolution may seem innocuous, however, there are important underlying issues related to the proposed development of new guidelines that will put the safety of children at risk. Passage of this resolution would inevitably create two standards of care for children.

On Monday, September 29 at 9pm Eastern / 8pm Central / 7pm Mountain / 6pm Pacific, the AAPD will host a Zoom session to educate members on the background of this resolution, the causes for concern, and steps you can take to support children's health. We welcome all AAPD members, and especially encourage those of you who are ADA members to join us for this session. Attendees must register to join. FAPD members-check your email for the link to register.

Don't forget that the 2025 copy of The Handbook of Pediatric Dentistry is available online.

Southeastern Society of Pediatric Dentistry

Frank Farrington Service and Leadership Award Application

This 1-year award is based on merit of leadership or service and individuals are eligible up to three years after graduating to self-apply. Please complete the application and either email or print the form and mail to the Southeastern Society of Pediatric Dentistry. A letter of recommendation is required and should be submitted directly to the same address by the individual writing the letter. The application and recommendation letter must be received by November 1st in order to be eligible for the award. The award is for $3,000. Two awards are available. Individuals will be notified by December 1st. The awardee is encouraged to attend the January meeting to receive their award. See the SSPD website for more information.

2026 Annual Meeting

The SSPD meeting will be January 16-18, 2026 at the Grand Hyatt in Buckhead. Th is will be a wellness symposium for the pediatric dentist with topics on embracing health to avoid burnout and thrive in your practice.

Florida Dental Association

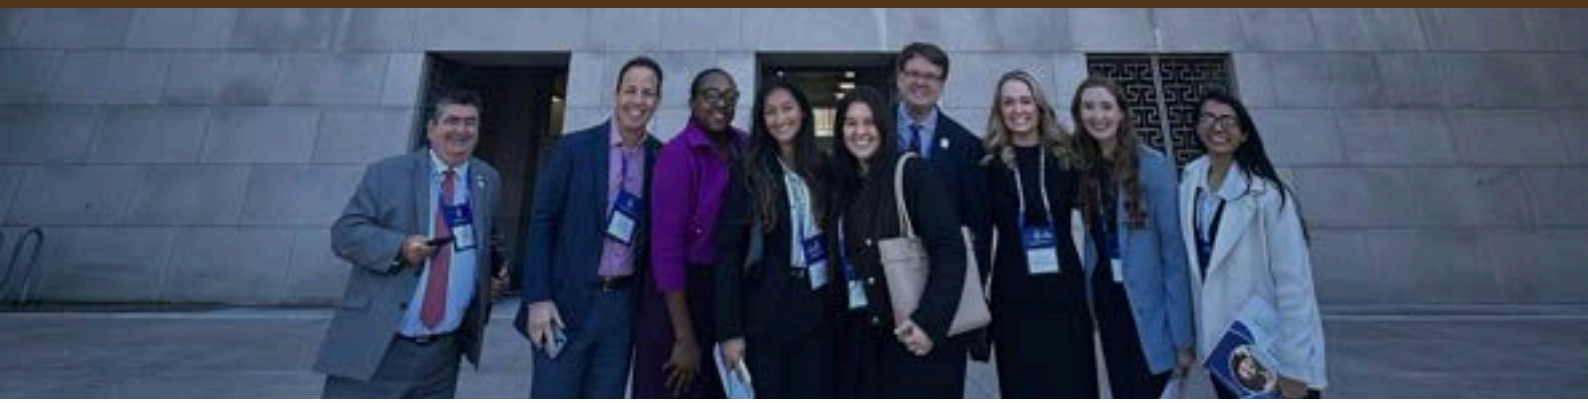

The Florida Dental Association (FDA) is excited to announce a partnership with Tallahassee State College's Hygiene Program to provide Restorative Function Dental Auxiliary (RFDA) training for both assistants and hygienists. The new RFDA program lets your qualified assistant or hygienist (under your supervision) place, pack, and contour restorations, using slow-speed only—after you prepare the tooth.

Format: online didactic + four hands-on weekends at Tallahassee State College

For more information, please visit www.floridadental.org/rfda.

PUBLIC POLICY UPDATES

DR. IRWINE SAINVIL
DR. MICHELLE THOMAS

MEDICAID UPDATE: COVERAGE CHANGE FOR ANESTHESIOLOGY & SEDATION SERVICES

Starting October 1, 2025, Florida Medicaid is shifting how it pays for certain dental services. Coverage for non-emergency outpatient anesthesiology and sedation provided in ambulatory surgical centers (ASCs) and hospital outpatient settings will now be handled by Medicaid health plans rather than dental plans (as it was before February 1st of this year). Anesthesia and sedation reimbursement for procedures taking place in the dental office (for example, IV sedation or GA with an anesthesiologist in your office) will continue to be covered by the dental plans.

For our practices, this means dental plans will still cover anesthesia and sedation when delivered in the dental office (when medically necessary), but anesthesia and facility fees for dental procedures performed in a hospital or ASC will be billed through the health plan. Regardless of where the procedure takes place, the dentistry portion will be billed to the dental plan.

We have been meeting with AHCA periodically in hopes of ensuring a smooth transition. Medicaid will require health plans to honor any appointments scheduled before October 1 and continue reimbursing at the previous rates for at least 60 days.

This change is designed to streamline billing and reduce administrative challenges for providers.
We plan to continue to periodically meet with AHCA on behalf of FAPD. Please email us at FAPDPPA@gmail.com if any issues arise regarding this or any other matters related to Medicaid.

The official AHCA notice can be found here. We remain engaged with the Florida Dental Association through their Public Insurance Task Force, where we are working together to address significant matters that affect children, families, and the providers who care for them across our state.

FEDERAL UPDATE

The TEETH Act will soon be introduced in the U.S. House of Representatives by Rep. Emanuel Cleaver (D-MO). While the bill does not yet have a Republican co-sponsor, it has been endorsed by the AAPD, ADA, and other members of the Organized Dentistry Coalition.

The TEETH Act would require that any federal review of the benefits and risks of community water fluoridation be overseen by the National Academies of Sciences, Engineering, and Medicine (NASEM), ensuring that evaluations remain rooted in sound science.

FAPD ANNUAL MEETING
SATURDAY, OCTOBER 25, 2025
7:30AM-5:30PM

Morning Session: Autism Spectrum Disorders: Architecture a successful dental appointment

Dr. Purnima Hernandez

Descriptions: As dental providers to children with or without special healthcare needs (SHCN), we have experienced moments of extreme child resistance to delivery of even the simplest oral care procedures. What is our strategy when a patient will not sit in a dental chair, block access to the mouth and resist with the strength of a superhero? Dental procedures can be challenging for children. They are especially difficult for individuals with intellectual disabilities, behavioral disorders and sensory issues. These moments are equally challenging for the provider and accompanying caregivers.

Dr. Hernandez is a parent of a young adult with special healthcare needs (SHCN). Her personal experience with her son's complex medical journey along with deep dives in behavioral psychology and health & wellness coaching, has allowed her to approach these appointments from a unique perspective. Designing these appointments are key to success for a lifetime of oral health. In her presentation, she will discuss concepts and strategies from each of her deep dives and how she incorporates them in a dental appointment. She has a WHOLISTIC and PERSONALIZED approach to each child and each event. As a health and wellness coach she will share how she incorporates lifestyle factors discussions during anticipatory guidance with parents. She will also discuss evidence-based techniques that will help prepare both parent, child and provider for a successful dental visit. While the conversation is around the topic of SHCN, strategies discussed are applicable to ALL children.

Afternoon Session: "Take A Breath"

Clinical effects of expansion, extraction and "facial type" on airway and breathing.

Dr. Gerald Samson

As primary care providers of pediatric dentistry and orthodontics all of us prefer to base our treatments on evidence based principles. We yield to the obligation of making clinical decisions based on science. As professionals we strive to provide accurate information to parents whose children present with occlusal and facial relationships which if left untreated may lead to conditions which can be unattractive, dysfunctional and become more severe.

The seminar will feature "selections from the following topics":

- For pediatric dental/orthodontic patients what are possible interrelationships between cross-bite malocclusions orthodontic extractions, airway, head posture and tongue position.
- How is facial-type related to airway and malocclusion.
- Can we predict which patients are most likely to have an airway benefit from expansion?
- Prior to treatment, which specific orthodontic records, tests, consultations and informed consent forms are needed?

"Happily Balanced"

Successfully Balancing Life and Work

Here's a novel thought: a successful, happy balance of life and work is not a series of random events. Rather, it's based on self-knowledge, enthusiasm and creativity. It's understanding your personal proportion of the time value of money and the money value of time.

Chew on this reality, if you're not happy with yourself how can others be happy with you?

This presentation will focus upon an entertaining and introspective look at achieving these goals. Participants are assured of a motivating, provocative and worthwhile experience.

ADDITIONAL BENEFITS

- Lunch is included
- Raffle prizes throughout the day
- Opportunity to network with new and familiar colleagues
- Learn about new products in the exhibit hall
- Sponsored parking on Saturday, October 25. See the SPRIG booth in the exhibit hall to get your voucher.
- Sponsored snacks breaks in the AM and PM lecture sessions

ADA C·E·R·P® | Continuing Education Recognition Program

Florida Academy of Pediatric Dentistry is an ADA CERP Recognized Provider approved by American Academy of Pediatric Dentistry. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at www.ada.org/cerp. Members of the CE planning committee have no relevant financial relationships to disclose.

Remember that Regan-Udall Foundation for the FDA meeting on Rx Fluoride Products in the Pediatric Population? If you missed it, you can watch the video, read the transcript, review the slide deck, and view the speaker bios here.

You can also hear from our very own, Dr. Tamara Robison as she speaks on behalf of the positive effects of fluoride use within the pediatric population, the purpose of professional clinical autonomy to treat the pediatric patient population, and the misleading studies that have been used to scare parents and patients.

Click here to see the video. She starts at 35:50.

EMPLOYMENT OPPORTUNITY

“We are excited to share a unique opportunity at DeLand Smiles, where we are expanding with a new, state-of-the-art build-out designed to welcome a dedicated licensed Pediatric Dentist.

We are looking for a professional who is passionate about children’s oral health and eager to grow with us as we build this department from the ground up. This is more than just an associate position—our vision includes offering the right candidate a clear pathway to partnership and ownership in the near future.

If you are seeking a place to establish your career, make a meaningful impact in the community, and join a practice with long-term growth and stability, we’d love to connect with you.

Please send us your resume to hiringsmilesnow@gmail.com or call us at 386-736-7121 to set up a time to discuss this exciting opportunity further.”

What does it mean to be an ABPD Diplomate?

AMERICAN BOARD OF PEDIATRIC DENTISTRY

The ABPD initial certification process assesses the habitual and thoughtful use of specialized knowledge and skills, clinical reasoning, communication, and professionalism required of entry-level pediatric dentists for safe and effective practice, to benefit the individuals, families, and communities served.

The QE is the first examination of the two-part certification process for Diplomate status in the American Board of Pediatric Dentistry. The examination is designed to generate evidence toward validation of the individual's advanced training in pediatric dentistry. The QE must be successfully completed prior to registering for the OCE.

The OCE is the second examination of the two-part certification process for diplomate status in the American Board of Pediatric Dentistry. The purpose of the OCE is to enable the candidate to demonstrate proficiency in diagnosis, treatment planning, and clinical care.

Thank you to our Florida OCE team for helping to pour back into the next group of diplomates. Pictured left to right are Drs. Shane Fisher, Manav Malik, Julie Russo, Matthew Cooke, and Marc Siegel.

Pediatric Dental Residency Program Director Spotlight

Matthew Cooke, DDS, MD, MPH

UF College of Dentistry
UNIVERSITY of FLORIDA

1) What inspired you to pursue pediatric dentistry?

Although I pursued further training in medicine, anesthesiology, and public health, pediatric dentistry has remained the cornerstone of my career. I am inspired by the opportunity to shape a child's long-term relationship with oral health, and to make what could be a stressful experience something positive, safe, and even fun. I've also enjoyed integrating the medical perspective with dentistry and the behavioral aspects of care—helping children and families in a more holistic way. Providing anticipatory guidance and setting children up for a lifetime of good oral health—which is critical to good overall health—has always been a passion of mine. One of the coolest parts of pediatric dentistry is getting to watch patients grow up; you truly become part of their family.

2) What do you like most about training our next group of pediatric dentists?

Watching residents grow from capable clinicians into confident, compassionate pediatric dental specialists. I especially enjoy helping them develop the ability to make sound clinical decisions by carefully weighing risks versus benefits, while also learning how to communicate those choices effectively to families.

3) What is your most memorable clinical experience in pediatric dentistry?

Supporting an anxious child with special health care needs through a multi-visit treatment plan using desensitization and a sensory-adapted approach. The transformation—from fearful to proud—reminded me how individualized, team-based care changes outcomes and families' lives.

4) What is one lesson you have learned from a pediatric patient that has stuck with you?

Kids are experts at reading authenticity. If I slow down, listen first, and meet them at their level, everything—from diagnosis to behavior guidance—goes better.

5) What is a hobby that you have outside of dentistry?

Water-skiing. Fun fact: I once water-skied 60 miles in a single run—not too long ago, when I was in slightly better shape!

Pediatric Dental Residency Program Director Spotlight

Roberto Cabassa, DMD

1) What inspired you to pursue pediatric dentistry?

It is a specialty the exposes you to the many aspects of Dental Education and to the Hospital environment which I like very much. You can do everything from Surgery, Operating Room, Emergency Room, Ortho, ICU etc... It is very full and there is no time to get bored.

2) What do you like most about training our next group of pediatric dentists?

Being able to pass on all my knowledge and experience to our residents is one of the missions in life. Learn-become an expert-pass it on to others.

3) What is your most memorable clinical experience in pediatric dentistry?

In 2009, I did my first regeneration procedure of an immature permanent necrotic tooth while stationed at Naval Hospital Naples, Italy. It was like a miracle compared to the Apexogenesis procedure we used to do.

4) What is one lesson you have learned from a pediatric patient that has stuck with you?

The first time a patient gave me thanks for taking good care of him. He was expecting a negative experience, but it turned out to be a very positive one. It was very humble throughout the treatment.

5) What is a hobby that you have outside of dentistry?

Home repairs and woodworking.

NOVA SOUTHEASTERN UNIVERSITY
NSU

Pediatric Dental Residency Program Associate Director Spotlight

Lesbia Drukteinis, DDS, MPH

Nicklaus Children's Hospital
MIAMI CHILDREN'S HEALTH SYSTEM

1) What inspired you to pursue pediatric dentistry?

I was inspired to pursue pediatric dentistry because is a true service specialty, where we provide support not just to our patients, but also to their families by building trust, educating them and shaping healthy oral habits that lead to positive dental experiences that can last a lifetime. I was also inspired by the leadership and advocacy roles as pediatric dentists and the impact that we have, given that we have a unique voice in guiding community programs and ensuring access to care for vulnerable children.

2) What do you like most about training our next group of pediatric dentists?

I find great fulfillment in mentoring residents not only to build their clinical confidence and professional identity, but also to help them develop skills in critical thinking. The training goes beyond new techniques and treatment plans to include a holistic lens, empathy, patient-centered communication, and advocacy for the oral health of children and families.

3) What is your most memorable clinical experience in pediatric dentistry?

In practicing pediatric dentistry every interaction has the potential for meaningful care. Our patients may feel insecure about their oral health and the ability for us to provide care, reassurance or professional guidance can be life changing. Our impact may also go beyond oral health. Sometimes we are the first to identify a systemic medical problem, physical abuse with the need to make timely and appropriate referrals. The opportunities facilitate overall well-being and care for our patients leading to a better quality of life.

4) What is one lesson you have learned from a pediatric patient that has stuck with you?

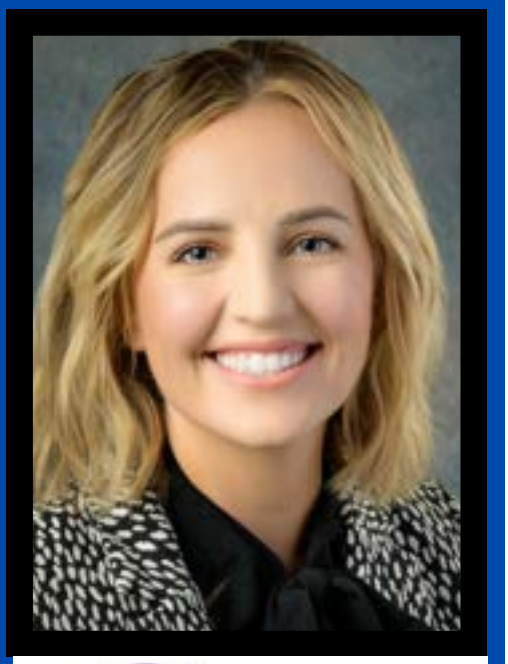

The most important lesson that I have learned is how vulnerable our patients are and how much trust they place in us. This realization has led me to pour my energy, heart and compassion into every interaction. It reminds me how precious children are and that every moment we need to be self-aware of the importance of attention to their needs and impact of how we deliver our communication. These qualities are just as essential as our procedural skills.

5) What is a hobby that you have outside of dentistry?

One of my biggest passions is to travel. I love immersing myself in unique places and learning about various cultures. These experiences broaden my perspective and help me to stay open-minded and adaptable. I also appreciate learning different languages. I enjoy meeting and connecting with people from different backgrounds. My hobbies have definitely helped me to stay, culturally aware and engaged with the world around.

Pediatric Dental Residency Program Co-Director Spotlight

Eva Dupay, DMD, MSD

NYU Langone Health

1) What inspired you to pursue pediatric dentistry?

I was drawn to pediatric dentistry because I've always felt called to care for children and patients with special healthcare needs. Nothing compares to the joy of making a child smile, feel seen, and truly cared for. My parents both worked in healthcare, and I grew up watching them go the extra mile for their patients, even heading into the office on weekends when families needed help. That spirit of service inspired me. I've always wanted to be that kind of doctor, someone who shows up, advocates for their patients, and makes a lasting difference in their lives. Pediatric dentistry allows me to do exactly that.

2) What do you like most about training our next group of pediatric dentists?

What inspires me most is their passion. Our residents are fierce advocates for their patients, eager to learn, and open to feedback. They ask thoughtful questions, push for better solutions, and keep me on my toes. Teaching them is a two-way street, and I'm constantly learning from them as well. Their energy and dedication remind me why I chose this field..

3) What is your most memorable clinical experience in pediatric dentistry?

One experience I'll never forget was with a teenage patient. At our first visit, his oral hygiene was poor, but instead of focusing only on his teeth, we spent time talking about school, life, and what name he preferred. That simple conversation built trust. At his next visit, I was amazed to see his teeth were spotless, not a trace of plaque. In that moment, I wasn't just proud of his progress, I was humbled by the power of connection and how it can motivate lasting change.

4) What is one lesson you have learned from a pediatric patient that has stuck with you?

One lesson that has stayed with me is how deeply children look up to us. Every word, every action, every bit of encouragement matters. As pediatric providers, we have the privilege of being role models, not just for oral health, but for kindness, resilience, and care. That responsibility is something I carry with me every day.

5) What is a hobby that you have outside of dentistry?

Outside of dentistry, I play competitive beach volleyball. It's a sport that challenges me physically, clears my mind, and connects me with a wonderful community. When I'm not on the court, I love spending time with my dog, Mardi, who brings so much joy and balance to my life.

Pediatric Dental Residency Program Co- Director Spotlight

Fatima Khan, DMD

NYU Langone Health

1) What inspired you to pursue pediatric dentistry?

Working alongside children and families has been a lifelong dream of mine. As a child, my dream job was to be a pre-school teacher which naturally transitioned into my undergraduate major of Family and Child Sciences. As my inclination for dentistry grew, I attended dental school and really enjoyed my rotations through the pediatric dental clinic. I worked as a general dentist for about two years in both pediatric and general dentistry and found myself gravitating towards pediatric dentistry. Realizing there were many knowledge gaps as a general dentist as well as my desire to provide the best pediatric dental care, I returned back to complete my residency. There are so many lessons and experiences children can teach you daily and I am really so grateful to be in the best dental profession.

2) What do you like most about training our next group of pediatric dentists?

Training the next generation is extremely rewarding in so many ways. One of my most favorites is seeing the confidence and independence grow in budding pediatric dentists from their first year of residency to their second year of residency and even right before graduation. That progress is priceless and, being a small part of training the next group of pediatric dentists, is such an honor.

3) What is your most memorable clinical experience in pediatric dentistry?

Some of my most memorable clinical experiences in pediatric dentistry include patient's first dental visits. Whether they are an infant, or older and have not been to the dentist, imparting personalized and tailored knowledge to pediatric patients is very memorable.

4) What is one lesson you have learned from a pediatric patient that has stuck with you?

Making patients and parents feel as comfortable as I can is a high priority for me. Including learning about different languages and about different cultures. Most patients and families really appreciate the effort of caring and making them feel comfortable, which is the motivation for me daily.

5) What is a hobby that you have outside of dentistry?

I really enjoy traveling, exploring, and trying new things. I also love spending time with my lovely family and my two precious cats, Nella and Penny.

FAPD South

Pediatric Dental Residency Program Meetup

Sponsored by NPC Financial, Wells Fargo and Ruiz Construction Inc.

NPC FINANCIAL EST 1951

RCI™

WELLS FARGO

Dr. Helena Urrea-Feldsberg, FAPD South representative hosted a happy hour for the Nicklaus Children's Hospital (Miami) and NOVA pediatric dental residency programs on September 18, 2025. Featured are FAPD Vice President, Dr. Marcie Young, Nicklaus Children's Hospital Associate Director, Dr. Lesbia Drukteinis, NOVA program director, Dr. Roberto Cabassa, FAPD South representative, Dr. Helena Urrea-Feldsberg and sponsors.

Rosemary Beach 2025

FAPD Panhandle

Hosted by FAPD Panhandle Representative Dr. Michelle Thomas

It's been a long time coming... and we were thrilled to finally host the first ever FAPD Panhandle Regional event! We spent the afternoon on the Pescado Rooftop sipping, snacking, and socializing with an amazing group of FAPD Pediatric Dentists. A huge thank you to Nick & Tatiana at Pescado for being such wonderful hosts - we had the best time!

Are you located in this area and want to be more involved? Make sure to renew your membership so that you can take advantage of all of our perks!

Join now

www.fapd4kids.org

FAPD Central

HOSTED BY FAPD CENTRAL REPRESENTATIVE
DR. KHUSBU PATEL

The Central Florida region of FAPD had a Summer Social for local members to snack, sip and socialize. Attendees learned more about the Nu Smile Soan system for delivery of local anesthetic. Additionally, representatives from the Florida Medical Advisors were present to answer questions about their services.

FAPD West

HOSTED BY FAPD WEST REPRESENTATIVE
DR. MARK DAWOUD

The Overjet-sponsored Topgolf event at the Florida Academy of Pediatric Dentistry (FAPD) brought together dental professionals for an evening of networking, fun, and community building. Attendees enjoyed a relaxed environment to connect with colleagues while learning more about how Overjet's AI technology is shaping the future of pediatric dentistry. The event successfully combined education, relationship building, and entertainment in a memorable setting.

FAPD NORTH

JACKSONVILLE, FLORIDA

FAPD North had a great turnout with 14 attendees, and it was truly a pleasure to reconnect with familiar faces and welcome some new ones. If you weren't able to make it that night, you were truly missed and we hope to see you at the next one!

The evening was filled with engaging conversations, meaningful connections, and a shared sense of community. A heartfelt thank you goes to Dr. Stephen Cochran for generously providing such an incredible venue for our gathering and for your outstanding leadership as our past FAPD president.

A special thank you goes to our speaker, Dr. Craig Hadgis, for delivering such an insightful and engaging presentation regarding early interceptive orthodontics.

OTHER ENGAGEMENTS

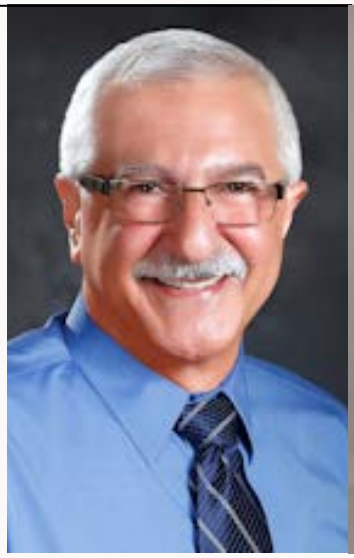

On a separate occasion, the FAPD North region got together to practice suturing techniques.

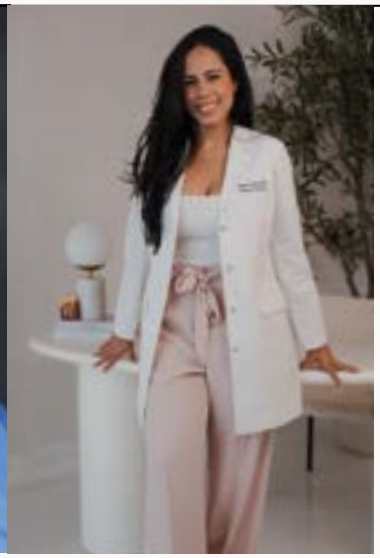

Hosted by FAPD North Representative Dr. Amber Sun

FAPD MEMBERS IN THE COMMUNITY

DR. JOHNNY JOHNSON

Johnny has been featured locally, nationally, and will be discussing Opinion and Politics vs Fluoride Science along with other featured speakers on the FAPD CE Cruise from Fort Lauderdale to Nassau and Coco Kay on March 13-16, 2026. Please see our website for more information. Registration is now open.

DR. SHANA CAPRA

Shana's article on "Pediatric Dentistry for the General Dentist" was featured in the Florida Academy of General Dentistry Magazine. She discussed comprehensive care and collaboration with the pediatric specialist. To see the entire article, click here.

DR. YOSHITA PATEL HOSKING

Yoshita presented at the 8th BABT Meeting in Louisville, Kentucky, on "Tying Tongue-Tie into Your Office." She highlighted the value of a multidisciplinary approach in caring for patients and shared practical strategies for successfully integrating this specialty into a pediatric dental practice.

She also presented at the Florida Chapter of the American Academy of Pediatrics Meeting, where she spoke on pediatric oral healthcare and its systemic effects on overall health.

DR. ERIKA KING

Erika delivered an engaging presentation at the 112th National Dental Association Convention in Kansas City, Missouri. Her talk, "Beauty is in the Eye of the Beholder: The Esthetic Restorative Options of Severe Early Childhood Caries," explored esthetic options following Silver Diamine Fluoride application, and sparked valuable discussion among attendees.
