A MESSAGE FROM THE PRESIDENT

Dear FAPD Members,

I hope you enjoyed a wonderful summer with your teams and families. Advocacy remains a top priority for us in Florida. Over the past several months, we have been working to enhance our website and communication systems to allow for more timely responses to legislative and regulatory issues affecting pediatric dentistry in our state. These updates will help us mobilize our membership more effectively and strengthen our collective voice to ensure that we remain actively engaged in protecting the oral health of Florida's children and the future of our profession.

This summer, our Executive Board gathered in Delray Beach for strategic planning and leadership discussions as we continue building on the momentum of the past year. We focused on identifying new opportunities to serve our members and strengthen our organization.

We are currently preparing for our Annual Meeting on October 24 at the Loews Sapphire Falls Resort in Orlando, and the excitement is evident. Registration is filling quickly, and we are thrilled by the incredible response from our members. If you have not yet registered, I encourage you to do so soon.

FAPD is only as strong as its members. If you are interested in becoming more involved through advocacy, committee service, leadership opportunities, or mentorship, please let us know—we would love to connect with you. Your ideas, energy, and involvement help shape the future of our organization and our profession. If there is anything I can do for you, please don't hesitate to reach out.

Warm regards,
Dr. Marcie Young

Mission

To provide community, advocacy, and resources for the pediatric dentists in Florida so that we can provide optimal care for infants, children, adolescents, and persons with special health care needs.

Vision

A group of pediatric dentists who are passionate, engaged and are supported by peers, healthcare professionals and community as the authority for pediatric oral health.

Membership

We hope that you will read our newsletter to learn more about organized pediatric dentistry in Florida and discover upcoming events where you can learn online and in person while connecting with colleagues. Visit www.fapd4kids.org to join.

AAPD
UPDATE

The past several months have been an exciting and meaningful time for pediatric dentistry, both nationally and here in Florida. As many of you know, the American Academy of Pediatric Dentistry recently concluded a highly successful 79th Annual Session in Las Vegas. The meeting brought together pediatric dentists, residents, students, and industry partners from around the world for outstanding continuing education, collaboration, and fellowship. The energy throughout the meeting reflected the strength of our specialty and the bright future that lies ahead.

The Annual Session also marked an important moment in the history of the AAPD. After 27 years of extraordinary leadership, Dr. John Rutkauskas concluded his tenure as Chief Executive Officer. His contributions to our Academy are difficult to overstate. Under his leadership, AAPD experienced remarkable growth in membership, influence, advocacy, education, research, and philanthropic impact. On behalf of pediatric dentists everywhere, we extend our sincere gratitude to John for his unwavering commitment and exemplary service to our profession and the children we serve.

At the same time, we are excited to welcome Dr. Jessica Lee as AAPD's new Chief Executive Officer. Jessica brings a deep understanding of our specialty, a passion for leadership, and a compelling vision for the future of pediatric dentistry. Her enthusiasm, energy, and commitment to innovation position the Academy well as we begin this next chapter.

I am also deeply honored to have been installed as President of the AAPD. It is a privilege to serve our members and our profession during such a significant period of transition and opportunity. I am equally proud to serve alongside our newly installed Southeastern District Trustee, Dr. Reza Ardalan, another Past President of the FAPD. Together, we will work to ensure that all AAPD members are well represented and that their voices continue to help shape the future of our Academy.

One of the best examples of what can be accomplished through engagement and collaboration occurred earlier this year through a partnership between the AAPD and the Florida Academy of Pediatric Dentistry. In response to a specific need identified by Florida members, our organizations worked together to develop and deliver AAPD's Safe and Effective Sedation for the Pediatric Dental Patient Course in Orlando this past April. The course was designed specifically to meet Florida's regulatory requirements and provide a pathway for pediatric dentists who were beyond their initial two-year certification period to qualify for state sedation permitting. Nearly 30 Florida pediatric dentists successfully completed the program, allowing them to pursue sedation permits and continue providing comprehensive care to children in their communities. This initiative demonstrates the power of organized dentistry to identify challenges, develop solutions, and deliver meaningful value directly to our members.

As we look ahead, I remain optimistic about the future of our specialty. With strong leadership at both the national and state levels, an engaged membership, and a shared commitment to the oral health of children, we are well-positioned to build upon the successes of the past while embracing the opportunities of the future. Thank you for your continued support of the FAPD and AAPD. Together, we will write the next chapter of pediatric dentistry.

Dr. Charlie Bertot
President, American Academy of Pediatric Dentistry
Past-President, Florida Academy of Pediatric Dentistry

AAPD-SSPD-FAPD TRIPARTITE

BECOME A MEMBER

July 1,2026– June 2027

AAPD

The American Academy of Pediatric Dentistry (AAPD) is a leading professional association for pediatric dentistry, established in 1947. AAPD membership offers numerous benefits, including access to a network of professionals, resources to enhance dental careers, and opportunities for collaboration in advancing pediatric dentistry. It caters to both seasoned practitioners and newcomers.

$795

FAPD

The Florida Academy of Pediatric Dentistry is the state component of our American Academy of Pediatric Dentistry's tri-partite. There is an e-board to serve and represent you across our Panhandle, Notheast, Central, West, East, Southeast and Southern regions of Florida. A quarterly newsletter is available electronically with our latest updates. Reach out to find out how you can become more involved.

$220

SSPD

The Southeastern Society of Pediatric Dentistry represents the specialty of pediatric dentistry in Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands. There are eleven (11) categories of membership: Active, International, Life, Inactive, Associate, Retired, Student, Affiliate, Affiliate Life, Allied and Honorary.

UPDATE

PUBLIC POLICY

DR. MICHELLE THOMAS

Although important work is occurring behind the scenes, meaningful policy change, and therefore the reporting of progress, often moves at a glacial pace. This season, however, I am pleased to share multiple encouraging updates that reflect the impact of our collective efforts.

First, in June, the House Subcommittee markup of the FY2027 Labor-HHS-Education appropriations bill included the AAPD's top appropriations priority: Title VII Health Professions Training funds for pediatric dentistry. The bill also increases funding for Pediatric Dentistry by $500,000, bringing the total to $14 million. This is a significant achievement at a time when many federal programs are facing budget reductions. Congratulations to our Florida advocacy team, who traveled to Washington, D.C., this year to share with legislators the critical importance of investing in pediatric dental education and workforce development.

In addition, after many meetings over the past year between AHCA, myself, and our FAPD advocacy team, AHCA recently announced that dentists who provide care in conjunction with an anesthesiologist in the office setting will be eligible for Medicaid reimbursement for Dental Anesthesia Support in the Office Setting using code D9999 beginning July 1, 2026. This code is intended to function similarly to D9420, which is utilized when care is provided in an ASC or hospital setting. While the AHCA Health Care Alert is the only guidance that has been released so far, we look forward to sharing additional information as it becomes available. You can read the full Health Care Alert here.

This accomplishment reflects the collaborative efforts of many individuals. I would especially like to thank Dr. Irwine Sainvil, Dr. Robbie Harrell, and Dr. Walmir Da Costa for their continued dedication, willingness to share their expertise, and ongoing advocacy on behalf of Florida's children and providers as members of our FAPD Advocacy Team.

FAPD continues to meet regularly with AHCA and remains actively engaged with the Florida Dental Association's Insurance Task Force. While there is still much work to be done, these recent successes demonstrate what can be accomplished through persistent advocacy and strong collaboration.

If any issues arise or you would like to connect regarding advocacy matters, please feel free to reach out to me, the FAPD Public Policy Advocate, at FAPDPPA@gmail.com. Thank you to everyone who continues to lend their voice and expertise as we work to improve access to quality pediatric oral healthcare across Florida.

RETREAT
SUMMER
2026

FLORIDA ACADEMY OF PEDIATRIC DENTISTRY

EXECUTIVE BOARD

Big Vision *For Little Smiles*

The Florida Academy of Pediatric Dentistry leadership team gathered in Delray Beach for a productive retreat centered on strengthening our organization and planning for the future. Through thoughtful discussion and collaboration, we evaluated our leadership priorities, established goals, explored opportunities for organizational growth, and identified new ways to enhance the value and benefits provided to our members. The retreat reaffirmed our shared commitment to supporting Florida's pediatric dentists, advancing the specialty, and building an even stronger and more connected FAPD.

Our morning session with Katherine Eitel Belt of LionSpeak focused on the power of authentic, unscripted communication and personal leadership. Through practical strategies, including her signature Lioness Principle, Katherine equipped FAPD leaders with tools to communicate with greater clarity, confidence, and purpose while strengthening collaboration and organizational effectiveness

Sedation and General Anesthesia in Pediatric Dentistry- an Anesthesiologist's Perspective

SATURDAY, AUGUST 8, 2026
3-6PM
ORLANDO, FL

1 Hour CE followed by food and fun

DESCRIPTION

This lecture, presented by a pediatric anesthesiologist, highlights critical yet often overlooked considerations in the care of pediatric dental patients. Focusing on factors beyond the oral cavity, it will explore airway nuances, fasting and medication implications, behavioral and developmental variability, and hidden risks associated with common sedation practices.

OBJECTIVES

- Recognize key airway and anatomical considerations in pediatric patient that may impact dental sedation and anesthesia
- Identify systemic health factors and comorbidities that increase risk during dental procedures
- Understand the implications of fasting guidelines, medications, and recent illnesses on anesthesia safety

7 hours of Continuing Education

AM session with Dr. Joshua Solomon: Confidence in Anterior and Posterior Composite Restorations for the Pediatric Dentist

Course Description

Treating decalcification, caries and fractures in permanent incisors can be some of the most professionally rewarding procedures for a pediatric specialist. However, working in the esthetic zone can be time consuming and unpredictable. Color matching, recreation of natural anatomy and avoiding debonds will be explored. Time permitting Class II restorations will also be discussed. Dr. Solomon will use a mix of slides and live procedures with overhead video and a typodont.

Objectives

- Learn to use anatomically-accurate, clear matrices in conjunction with heated and injection molded composite
- Learn to how to quickly place composite, shape and polish restorations that have little risk of debunking
- Understand the basics of vital tooth bleaching and color matching
- Review the concepts of golden portions, gingival architecture, and smile design
- Watch live demonstrations of placement of a class III composites, fracture repair and restoration peg lateral

PM Session with Dr. Jeanette Maclean: Trends in Minimally Invasive Dentistry

Course Description

Increasing patient awareness and demand for minimally invasive treatment options calls for dental providers to expand their clinical training beyond conventional surgical interventions. This course will review the scientific evidence for minimal interventions and bioactive restorative treatments.

Objectives:

- Review the scientific literature for nonsurgical caries treatments
- Describe the case selection, materials, and clinical protocols for minimal interventions

NEW!

A FAQ SECTION FOR GETTING YOUR SEDATION PERMIT IS BEING ADDED TO OUR WEBSITE. STAY TUNED.

ORAL CONSCIOUS SEDATION -MEDS, REVERSALS AND PROTOCOLS was presented by Paul A. Bahn, III, DMD on Wednesday, July 22, 2026 7-8pm EST. We had 420+ people in attendance. If you missed it, the video is now available on our website along with the powerpoint slides.

Course Overview

Current events have highlighted concerns for oral conscious sedation safety. While this lecture does not discuss recent events, place blame or make judgements, we will review various oral conscious sedation medications, individually and when utilized in combination. We will also discuss emergency procedures and the use of reversal agents.

Course Objectives:

- Discuss various oral conscious sedation medications including Chloral Hydrate, Meperidine, and Hydroxyzine individually and used in combination.
- Review dosages of various oral conscious sedation medication.
- Review documentation and disposal for the usage of various sedation medications.
- Discuss how to recognize an overdose of oral conscious sedation medications.
- Review emergency procedures and protocols.

Beyond Compliance: A Practical Approach to Neurodivergent Care in Pediatric Dentistry with Mark Bowers, Ph.D. COMING SOON

This presentation introduces a practical shift from behavior management to a nervous system-based understanding of patient experience. Attendees will learn why cooperation can break down even when a child appears “calm,” how sensory input and loss of control contribute to overwhelm, and why some seemingly successful visits lead to avoidance at future appointments.

Through real clinical examples and immediately applicable strategies, this session will provide a clear framework for increasing patient capacity during dental visits by adjusting predictability, control, and sensory load in real time.

Participants will leave with concrete language, tools, and workflow adjustments that can be implemented the next day to improve patient regulation, increase successful outcomes, and build long-term trust with neurodivergent children and their families.

LEARNING OBJECTIVES:

- Differentiate between behavioral challenges and nervous system dysregulation in pediatric dental patients.
- Identify early signs of sensory overload and distress during dental visits.
- Apply strategies to increase predictability, control, and reduce sensory load in real time.
- Modify communication and appointment structure to improve cooperation and patient outcomes.

DOMESTIC VIOLENCE

DATE
TUESDAY, SEPTEMBER 29, 2026

TIME
7-9PM

JOHN P. KENNEY DDS, MS. FACD, FICD, FAAPD (LIFE), FAAFS

Diplomate, American Board of Pediatric Dentistry
Diplomate, American Board of Forensic Odontology
Assistant Professor, Pediatric Dentistry,
Meharry Medical College, School of Dentistry

Course Overview

The presentation will cover all aspects of Domestic Violence. As pediatric health professionals our primary focus in children, however during our interactions with patients and their accompanying persons we may be presented with evidence of acute or ongoing abuse within the family structure. By use of actual cases, you will see the evidence of such abuse and learn how to recognize subtle signs, and what your responsibilities are under Florida Law. Often dental offices are not seen as a threat to the abuser as they doctor or hospital "shop". One form of abuse does not preclude other types occurring. Even as a well-educated practitioner I missed a serious spousal abuse case right in front of me with a family I knew well. Human trafficking too is an ongoing problem and you will have some tools to recognize and report at the completion of this course.

Course Objectives

- Learn signs and symptoms of Child Abuse
- Learn Signs and symptoms of Domestic Violence
- Learn Signs and symptoms of Human Trafficking
- Learn actions to be taken both from and legal and practical/practice aspect.

PREVENTION OF MEDICAL ERRORS FOR FLORIDA DENTISTS

Tuesday, December 8, 2026 7-9pm

ONLINE ZOOM REGISTRATION

Patti Ellis, RN, BSN, LHRM, CPHRM, FASHRM

Course Overview

This course meets requirements in FL Statute 456.013 (7) and includes information on error reduction and prevention, patient safety, and root-cause analysis. The course addresses the impact of medical errors on people we serve as well as the impact on dentists and all health care professionals.

Course Objectives

1. Assess provider and patient factors that contribute to common performance and diagnostic errors.
2. Analyze dentistry errors and implement proven strategies to improve patient safety.
3. Educate staff on the appropriate timing and methods for conducting a root cause analysis when an adverse event or near miss occurs.

PALS/BLS/ACLS RENEWAL
AIRWAY MANAGEMENT
AND MEDICAL EMERGENCIES
AN OFFICE-BASED APPROACH USING MOCK DRILLS

This program meets the Florida standard by discussing monitoring and recognition of airway, respiratory emergencies, and the recognition and management of medical complications in the dental setting.

COURSE INFORMATION

This didactic and hands-on educational experience is appropriate for any pediatric dental staff member interested in reinforcing the knowledge and performance skills requisite to providing best practices for the emergency management of the pediatric dental patient. This course will provide instruction and practice in the performance and communication skills necessary among the dental team while interacting with simulation manikins and various case scenarios involving emergency events in the pediatric dental office. Goals and length of course are adjustable to the practice's needs. The intent is to interact with the office's existing emergency management system / protocols, equipment and supplies. Visit the website for precourse information and to register.

2026 RECAP

FAPD West
Tampa, Florida

Our West Coast FAPD dentists gathered in late April for our annual Topgolf event for an evening of learning, laughter, and a little friendly competition!

We enjoyed learning about Kinder Krowns' newest innovation - their ResiCeramiX™ crowns, Fireside Dental's incredible community built specifically for pediatric dentists, and the exciting role of Curodont in remineralizing incipient carious lesions.

It was wonderful catching up with familiar faces, meeting new friends, sharing great food, and seeing everyone's golf skills (or lack thereof) on display. Let's just say... some of us are definitely better with a handpiece than a golf club!

A huge thank you to our speakers, sponsors, and everyone who joined us for such a fantastic evening. We truly appreciate your support and look forward to seeing you all at our next West Coast FAPD event!

NITROUS OXIDE CE ADVENTURE:
A CATCH OF A LIFETIME

The Florida Academy of Pediatric Dentistry's CE "Adventure" aboard the Double O (Ocean Obsession) was an outstanding success, drawing enthusiastic interest in future multidisciplinary collaborations. The evening brought together pediatric dentists, orthodontists, oral surgeons, anesthesiologists, family, and friends for a unique blend of clinical education, networking, and sport fishing under perfect weather and a breathtaking sunset.

We extend our gratitude to Captain Kyle and the deck crew, who expertly managed the group and the water, and to Grills Portside Restaurant for providing a delicious dinner that kept everyone energized and socializing by the starboard rail.

The educational focus centered on Nitrous Oxide Saftey Updates, generously sponsored and supported by Porter Instruments. The program highlighted patient safety, including the use of a demand valve with 100% positive-pressure oxygen availability in the event of an emergency, as well as the importance of a new Shiloette nitrous oxide hood design with an improved seal and scavenging to enhance occupational safety for providers.
Special thanks to Dr. Mike Sroka, pediatric dental anesthesiologist with the PDAA Pediatric Dental Anesthesia Associates, for contributing additional insights on patient safety during the onboard discussion. His expertise deepened the clinical value of the evening beyond the standard CE format.

The night's fishing highlights were unforgettable. Our youngest guest was the first to land a bottlenose shark, inspiring the entire group, and our own Dr. Tamara Kristine Robison (DDS, MBA) caught a hammerhead shark – both of which were safely handled in true catch-and-release fashion, preserving the experience as well as the resource.

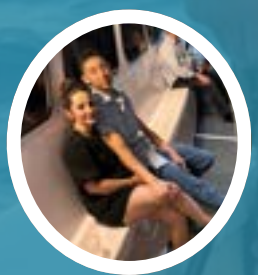

We also recognize our sponsors, including Melbourne Orthodontics (Dr. Chad Reddick), Doug Dasher of Porter Instrument, and DentalEZ, whose partnership helped make this event both educational and enjoyable. Interest in follow-up "CE Adventures" is already strong, and we are hard at work planning the next opportunity to blend evidence-based nitrous education with unforgettable experiences on the water. Stay tuned for more fun, educational, and memorable events ahead.

EMPLOYMENT OPPORTUNITY

JOIN OUR TEAM

We are a thriving, patient-centered pediatric dental practice seeking a compassionate and enthusiastic Associate Dentist to join our team. We are committed to providing exceptional dental care in a fun, welcoming environment where children and families feel comfortable and valued.

New graduates are encouraged to apply! We welcome dentists at all stages of their careers and are excited to mentor motivated clinicians who are passionate about serving the community.

POSITION HIGHLIGHTS

Full-time or part-time opportunities available
Established patient base with a strong referral network
Modern, fully equipped facility with advanced technology
Supportive clinical and administrative team
Competitive compensation package
Mentorship and professional development opportunities
Flexible scheduling to promote work-life balance

RESPONSIBILITIES

- Provide comprehensive dental care to infants, children, adolescents, adults and special needs patients
- Educate patients and families on preventive oral health practices
- Diagnose and develop treatment plans tailored to each patient's needs
- Collaborate with team members to ensure an exceptional patient experience
- Maintain accurate clinical records and adhere to all regulatory requirements

QUALIFICATIONS

- DDS or DMD degree from an accredited dental school
- Active state dental license (or ability to obtain licensure)
- Strong communication and interpersonal skills
- Commitment to providing high-quality, compassionate patient care

The ideal candidate is energetic, positive, team-oriented, and passionate about helping patients of all ages develop healthy smiles. Whether you are a seasoned general or pediatric dentist or a recent graduate seeking mentorship and growth, we would love to hear from you.

Benefits May Include: Competitive daily guarantee, Malpractice coverage, Retirement plan options.

If you are looking for a rewarding opportunity to make a lasting impact in the lives of children and families while growing your career in a supportive environment, we invite you to apply.
