ALLEN TEL PRODUCTS, INC.

Distributed by: GraybaR

ESTABLISHMENT:

Allen Tel was founded in 1952 and has been a key player in manufacturing custom communications products that are not readily available from other suppliers.

PRODUCT FOCUS:

They specialize in creating innovative, high-quality products for the communication industry. Their offerings include a comprehensive line of structured connectivity products that adhere to industry standards. These products cover voice and data solutions for various networking applications.

UNIQUE OFFERINGS:

What sets Allen Tel apart is their ability to provide custom-designed solutions. They've built a strong reputation among installers, consultants, engineers, and end users by delivering products that meet specific needs. From telephones for specialized applications (such as Courtesy Telephones, Vandal Resistant Telephones, and Outdoor Telephones) to complete connectivity solutions, Allen Tel has consistently delivered quality.

VERSATAP MODULAR NETWORK SYSTEM:

Allen Tel's Versatap System offers full flexibility when creating Local Area Networks (LANs), cabling systems, data processing networks, or telecommunications panels. These components come with a 25-year warranty and are designed to provide cost-effective, reliable solutions in any networking environment.

COMMITMENT TO STANDARDS:

Allen Tel actively participates in industry standards committees and promotes interoperable, standards-based solutions. Their staff holds the RCDD (Registered Communication Distribution Design) certification from BICSI. Additionally, their products undergo rigorous testing to ensure compliance with industry standards.
