Rich Experience: Owl Pellet Dissection Lab

What: Students in Grades 4-8 will work with GOC science teachers on dissecting Owl pellets.

When: Friday, October 7, 2016 10—11:30 a.m.

Where: GOC Campus 713 Hi Hope Road Lawrenceville, GA 30043

Cost: Free

The Facts: We can identify precisely what the bird has been feeding on and gain clues to the owl's hunting habits from the prey it has taken. We can estimate the numbers of different kinds of prey it takes. If we find out more about the prey animals, we learn a great deal about food chains and the important role of the owl. We can get a great deal of information about the different small mammals and where they are found. This kind of information would otherwise be very difficult to discover.
