

Conversation about Tornadoes

Part 1

Student 1	Hi! Did you hear about what happened yesterday near my house?
Student 2	Wasn't there a thunderstorm and something happened to damage the trees and houses?
Student 1	Yes. A tornado caused all of the damage.
Student 2	What is a tornado?
Student 1	A tornado is a dangerous windstorm whose clouds are shaped like a funnel.
Student 2	Wow, that sounds scary.

Part 2

Student 1	A tornado is very scary! It moves close to the ground and destroys everything in its path.
Student 2	Is your house okay?
Student 1	Yes, I was very lucky. My house was not damaged, but there are trees down all over my yard.
Student 2	Wow! Tornadoes are very dangerous.
Student 1	Well, I have to go now. Bye.
Student 2	Bye. I will see you later.
