

UGA CITRUS ORCHARD NUTRITIONAL SURVEY

For the past three growing seasons, the UGA Agricultural and Environmental Services Labs (AESL) has been conducting a foliar nutrient survey of Georgia's citrus industry with funding from the USDA and Georgia Department of Agriculture's Specialty Crop Block Grant Program. One of the conditions of the project's grant funding is that researchers seek stakeholder feedback on the effectiveness of the program, and how this work may influence future grower decisions. The project researchers ask that you please complete this short (7 questions, 3-5 minutes) Citrus Nutrition Questionnaire [here](#). These results will help UGA researchers demonstrate the importance of this work to their sponsors, which increases the likelihood of future funding in this area. If you would like to learn more about this project and the results of the study, visit the [project website](#).
