

FSA ACREAGE REPORTING

July 15

next major deadline to complete reports

Agricultural producers in Georgia should make an appointment with their local FSA office to complete crop acreage reports before the applicable deadline after planting is complete. An acreage report documents a crop grown on a farm or ranch, its intended use, and location. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits. Acreage reporting dates vary by crop and by county. Producers should contact their local USDA Service Center for a list of acreage reporting deadlines by crop. The next major acreage reporting deadline is July 15, 2025, for corn, cotton, grain sorghum, peanuts, sesame, soybean, tobacco, and whole farm revenue protection.
