Speaker: Stephanie Flamini, M.S.,
BCBA, LBA, IMH-E®**
is the Training and Technical Assistance Coordinator at the SNJREIC and has close to 20 years of experience supporting children on the autism spectrum. Stephanie specializes in the dissemination of evidence-based practices related to applied behavior analysis, natural environment teaching, and early relational health.

Please contact **Stephanie** at stephanief@snjreic.org if you have any questions

Virtual Workshop

What to Expect from ABA Services

for professionals and caregivers!

Autism New Jersey is the state's leading autism advocacy organization, passionate about evidence-based practices to support children with autism.

The science and practice of ABA includes a variety of evidence-based practices.

Come join Autism New Jersey's Directors of Family Wellness and Emerging Challenging Behavior Manager in a virtual workshop to learn about Applied Behavior Analysis (ABA).

You'll learn about ABA and how it can help children in a variety of settings, common skills assessments, considerations for home programs, and how to connect with behavior analysts and evidence-based resources to support children with autism and treating challenging behavior.
