About Our Cabinets

CONSTRUCTION

All of our cabinet boxes are fabricated locally at our shop in Kailua, Hawaii. We source Domestic 3/4" pre-finished Maple ply which utilizes SoyStrong ELX technology, an insecticide additive in the glue line. The insecticide permeates into the wood fiber protecting the plywood from termites and other wood boring insects. SoyStrong ELX is all soy with no formaldehyde and meets rigorous standards for indoor air quality.
Material: Tacoma, WA

HARDWARE

Our standard TANDEM plus BLUMOTION and Movento runners, from Blum USA, are the latest advancement in concealed runner technology. They offer excellent stability while maintaining smooth running action and unmatched soft close feature. Our BLUMOTION soft close concealed hinges offer a smooth and quiet operation. Separate cabinet legs are adjustable for ease during installation.
Made in the USA

DOOR STYLES

Our high quality, European style doors are fabricated as a modern, flat-panel style with other options as an upgrade. Our high gloss and ultra matte doors are available in the modern flat-panel, 5-piece shaker, or 3-piece option. All doors are fabricated with precise detail, resulting in a high quality cabinet

PRE-FINISHED VENEER

Pre-finished, wood veneered panels offer the same unique look and feel of real wood veneer. This material is made up of a top layer of veneer, a high quality mdf core, and a balance layer on the back for stability. Material is pre-finished and doesn't require staining or additional finishing.

TEXTURED MELAMINE

A textured melamine door with a deeper look and feel of natural wood grain, creating a 3-D effect. High impact surfaces and easy maintenance makes our textured melamine one of the more popular choices to use throughout or mix with our Ultra Matte door options.

HIGH GLOSS & MATTE

We offer a variety of High Gloss and Ultra Matte door options. Both are highly scratch-resistant and color rich. The High Gloss is at a 90% gloss level with a smooth surface creating a mirror effect. The Ultra Matte is designed to absorb the majority of light reflection creating a soft appearance and touch.
