

The CLEAR Project Viewing, Downloading, and Listening Instructions

TO SEE AND HEAR THE CONCERT VIDEO:

From the main page, click on the blue link that says “Watch the recording.” When the big black screen appears, click on the triangular Play button. This will make a small rectangle appear on the right side showing a stage with a screen in the background that says Villanova University. Click on the video of the stage to enlarge it. You might also use the controls which can appear at the bottom of your screen to push the “four piece square” button in the bottom right to enlarge it once more to full screen size. We suggest putting your volume to maximum as the concert recording is somewhat quieter than we would have liked! The introductions begin around the 3:00 mark. The music begins at 11:33.

TO DOWNLOAD THE ALBUM OR INDIVIDUAL SONG AUDIO FILES (recorded with various local musicians before the concert):

From the main page, click on the box that says “Stream the Album on Bandcamp.” This takes you to the Project’s album page on the third-party site Bandcamp.com which will ask you to accept cookies (you can click on “Accept necessary only”). To hear a song, click on the Play button to the left of the song title. Normal volume is fine for the audio! To download the song, click on the blue link of the song’s title. On the next page, which has more info about the song, click on the large blue “Buy Digital Track.” In the box next to Enter Amount enter a zero to download it (it’s free!) or choose to add at least \$0.50 as a donation with some extra benefits. Alternatively, you can click on the smaller blue link “Send as Gift” and follow those instructions to share an audio file with friends.

To download the entire album for free, click on the blue “Free Download” link, choose your preferred audio format from the dropdown menu, and click the small blue “Download” link. The file will arrive as a Zip file on your desktop or in your download folder which you will need to click or double-click to expand.

TO DOWNLOAD THE SHEET MUSIC:

From the main page, click on the box that says “Download the Sheet Music.” You will go directly to a single 140-page PDF file that contains two scores for each song in concert and album order (sorry, there is no index or page guide): first a vocal or choir-only score, and then a full score with vocals, piano accompaniment, and guitar chords. To download the file, look in the upper right corner of the screen for the Save icon. To only print pages, click on the Print icon next to the Save icon and select the page range(s) you wish. Careful: without a page range your printer will be printing all 140 pages at once!
