

# Borgia Alumni Spotlight

## Dr. Kristopher Feldmann '04

### What are you currently up to?

Currently I keep busy with work, spending time with my family, and volunteering with a few organizations in town. My most exciting change recently is purchasing Washington Chiropractic Clinic from Dr. Larry Gerstein, where I have been working as a chiropractor since I graduated from Logan College of Chiropractic in 2013. Dr. Gerstein will remain seeing patients and being a mentor. Outside of work, I also enjoy playing in volleyball leagues, being on the board at the Knights of Columbus, a member of the Washington Area Chamber of Commerce, the Washington Junior Chamber of Commerce (Jaycees), and keeping up with events going on at Borgia through my parents, Ken and Chris Feldmann.

### Tell us about your family?

My wife, Jenna, and I have been married for 8 years and have two daughters, Abigail (4 years old) and Audrey (16 months old), and a dog, Charlee (9 months old). They also keep us very busy. Jenna is a nurse in the Interventional Radiology Department at Mercy Hospital in Washington.

### What was your favorite memory of high school?

It's hard to pick out one favorite memory out of 4 years. I had a lot of great experiences while in high school, whether it be being with friends, running track, playing football, or even going to classes and other functions at school. One thing that really stands out was being a leader during the Luke 18 retreats. Those were always a lot of fun for everyone and was a great way to get to know people that I wouldn't normally have the opportunity to be around.

### How has your Borgia education helped you in your life?

Borgia's education helped me to realize my potential and what I was capable of doing. It gave me a sense of accountability for my education and responsibilities. It also provided crucial stepping stones to help with the transition from high school to college.

### What is the great takeaway from your Borgia education?

My greatest takeaway from my Borgia education is the sense in volunteerism and helping other people I received while attending. I always felt encouraged to be active in the many programs that Borgia has to offer, outside of the classroom. I believe these opportunities helped me to learn how to balance the many things life can throw at you and to see the importance of being involved in a community while still focusing on a career and family. Not only did Borgia help me with this, but I saw it through my parents, who also value volunteering and being involved, especially in the Borgia family.

### What word or adjective would you use to describe Borgia?

Community/Family
