

Share Your Experience: Accessing Health Care for Your Child with an Intellectual or Developmental Disability (I/DD)

Join an online discussion for caregivers of children with I/DD who receive NC Medicaid health insurance.

We want to hear from parents and caregivers who have a child with an intellectual or developmental disability (I/DD) covered by North Carolina Medicaid. This includes families caring for children with conditions such as Autism, Down syndrome, cerebral palsy, and other developmental disabilities.

We are hosting a small, online group discussion to talk about what it is like to get health care for your child. We want to know what is working well, what is hard, and how things can be improved. During the group, we will talk about your experiences, which may include getting regular doctor check-ups, specialist visits, mental health support, and/or other types of care for your child. Any information you share will only be seen by the research team and will not be shared with anyone else.

We welcome community members from all backgrounds.

This small group discussion will last about 1.5 hours. Each participant in the discussion will receive a \$75 gift card.

To join this small group discussion, you need to:

- Be a caregiver to a child (under 21 years old) with an I/DD condition who receives Medicaid health insurance through a Tailored Plan (Alliance, Trillium, Partners, or Vaya).
- Be an adult 18 years of age or older
- Live in North Carolina
- Participate in the discussion in English
- Join a 90-minute discussion using a computer or phone
