

Brock Pest Control Covers

Rooms are already pre-baited for roaches

General Pest which is roaches, beetles, ants, silver fish and spiders.

Procedures used

Dry baiting for roaches and ants. The brands they switch between is Max force and Advion. This procedure is called integrated pest management for or IPM.

Pesticide will not be used on a regular basis unless warranted for spot treatments only. Pest control comes 1 time a quarter per unit to do maintenance consisting of roach baiting and will be replacing existing roach bait in kitchen

**Large palmetto bugs are the American roach. It is a flying bug that will come through the doors if you leave them open. It is impossible for this roach to live indoors without water and greenery. The only way to keep these away is to not leave the doors open since they are not attracted to any kind of bait.

Please do not encourage guests to spray using any insecticide or home defense for bugs for this will ruin pre bait and void the pest controls warranty.

Rodents are not covered. Brock has provided traps but it is not warrantied.
