

THE LUMECON RETROFIT

SAMPLE CATALOG

LUMECON RETROFIT CATALOG

D2125-01 LED Retrofit Kit

Description

The D2125-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2125-01	55W	6,325 (est)	115 LPW (est)

D2130-01 LED Retrofit Kit

Description

The D2130-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2130-01	55W	6,325 (est)	115 LPW (est)

D2115-01 LED Retrofit Kit

Description

The D2115-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2115-01	130W	14,950 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2117-01 LED Retrofit Kit

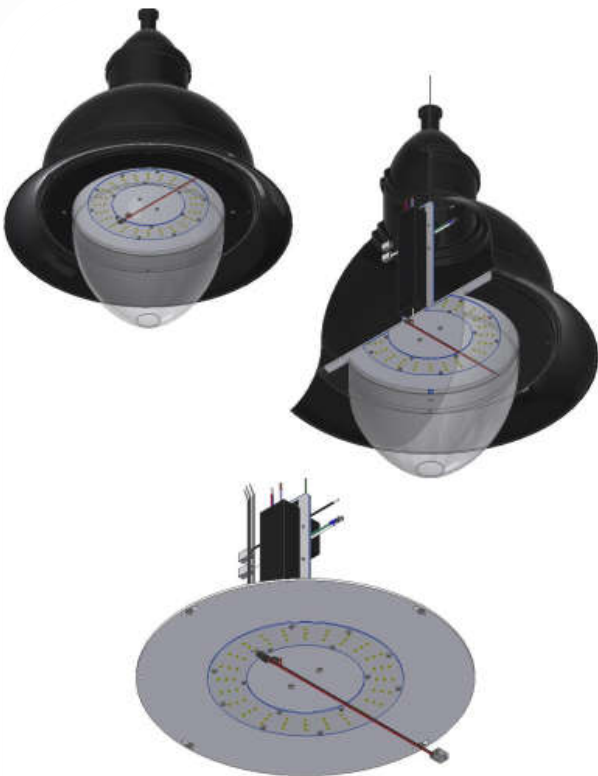

Description

The D2117-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2117-01	20W	2,300 (est)	115 LPW (est)

D2038-01 LED Retrofit Kit

Description

The D2138-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2138-01	75W	8,625 (est)	115 LPW (est)

D2133-01 LED Retrofit Kit

Description

The D2133-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2133-01	65W	7,475 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2120-01 LED Retrofit Kit

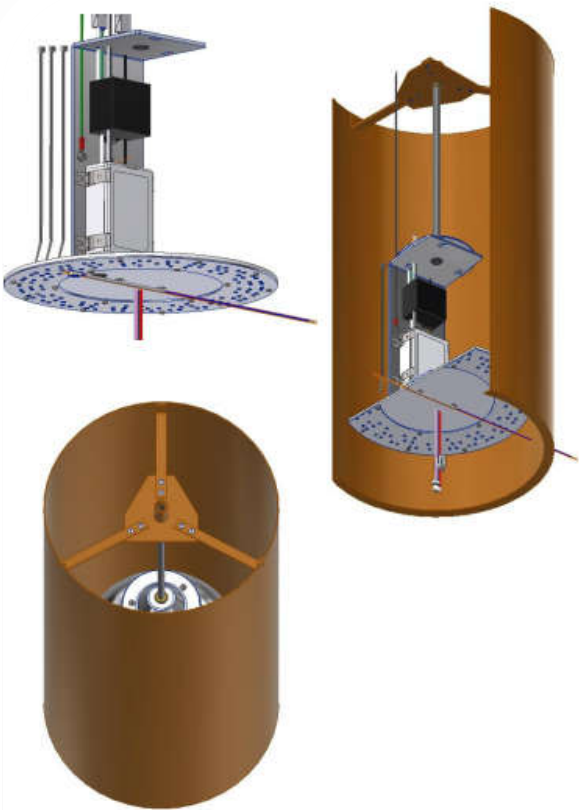

Description

The D2120-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2120-01	82W	9,430 (est)	115 LPW (est)

D2119-01 LED Retrofit Kit

Description

The D2119-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2119-01	60W	6,900 (est)	115 LPW (est)

D2121-01 LED Retrofit Kit

Description

The D2121-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2121-01	37W	4,255 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2112-01 LED Retrofit Kit

Description

The D2112-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2112-01	13W	1,500 (est)	115 LPW (est)

D2110-01 LED Retrofit Kit

Description

The D2110-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2110-01	100W	11,500	115 LPW (est)

D2106-01 LED Retrofit Kit

Description

The D2106-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2106-01	40W	4,600 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2139-01 LED Retrofit Kit

Description

The D2139-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2139-01	75W	8,625 (est)	115 LPW (est)

D2147-01 LED Retrofit Kit

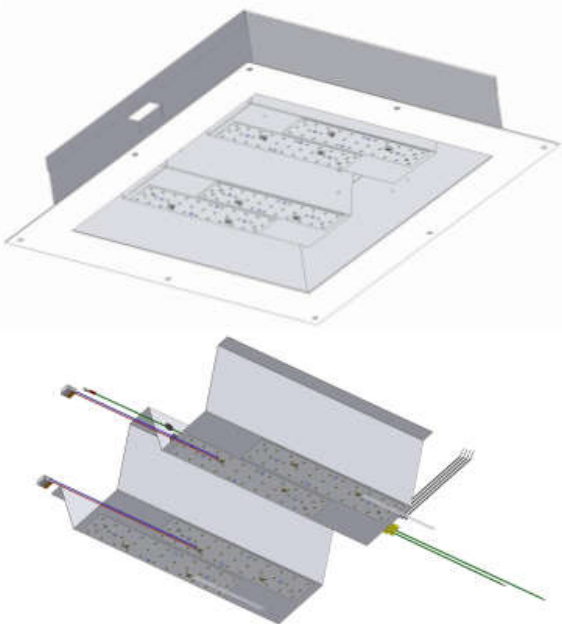

Description

The D2147-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2147-01	125W	14,375 (est)	115 LPW (est)

D2136-01 LED Retrofit Kit

Description

The D2136-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

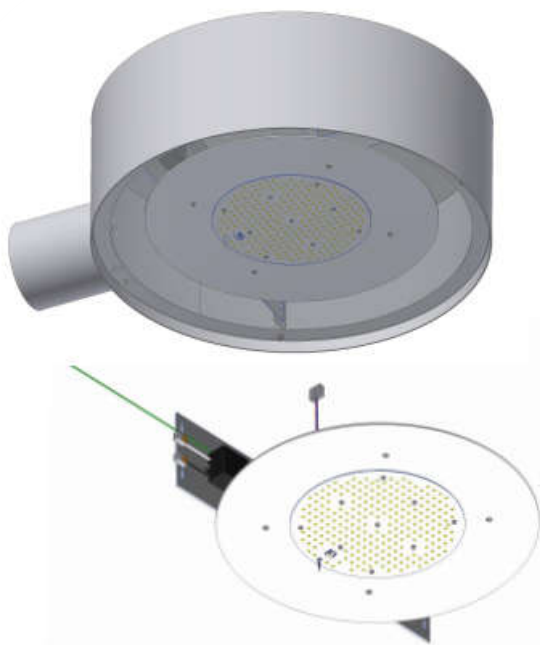

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2136-01	40W	4,600 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2134-01 LED Retrofit Kit

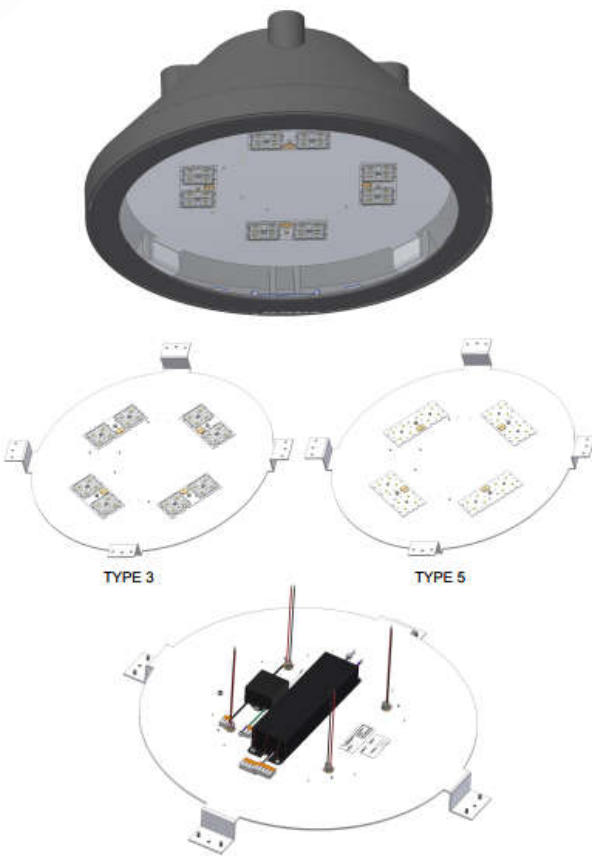

Description

The D2134-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2134-01	120W	13,800 (est)	115 LPW (est)

D2135-01/02 LED Retrofit Kit

Description

The D2135 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2135-01/02	115W	13,225 (est)	115 LPW (est)

D2131-01/02 LED Retrofit Kit

Description

The D2131-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

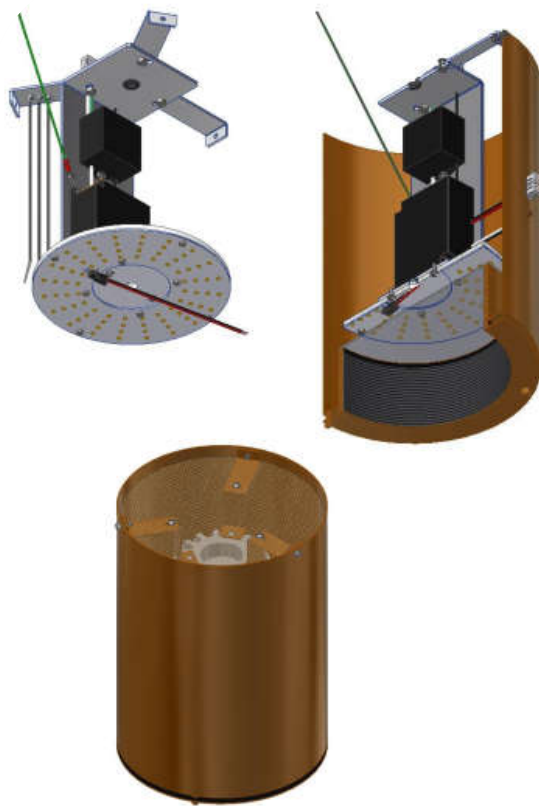

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2131-01/02	55W	6,325 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2118-01 LED Retrofit Kit

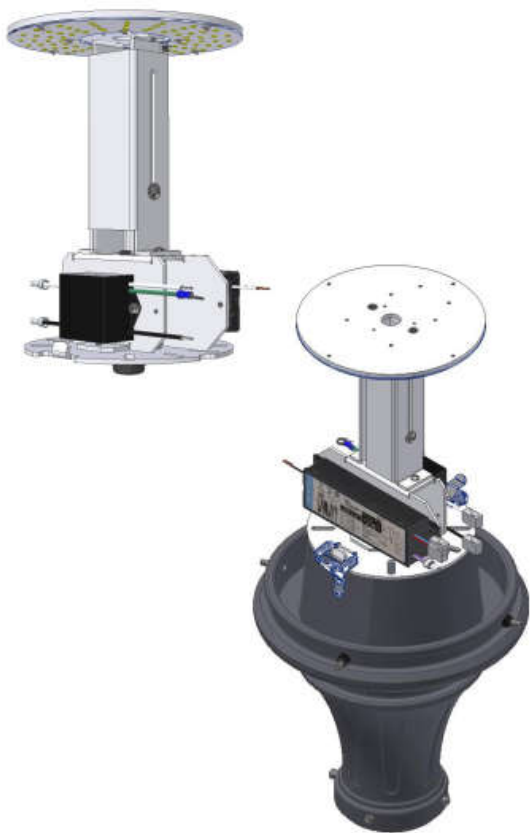

Description

The D2118-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2118-01	35W	4,025 (est)	115 LPW (est)

D2124-01 LED Retrofit Kit

Description

The D2124-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2124-01	55W	6,434(est)	115 LPW (est)

D2114-01 LED Retrofit Kit

Description

The D2114-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

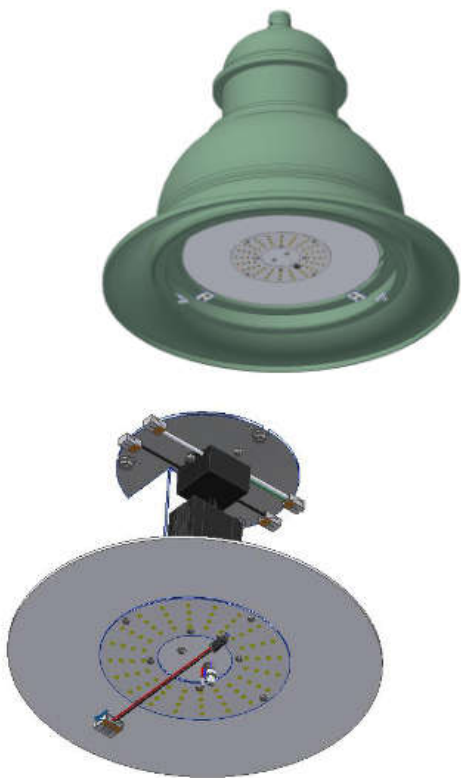

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2114-01	18W	2,070 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2111-01 LED Retrofit Kit

Description

The D2111-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2111-01	55W	6,325 (est)	115 LPW (est)

D2116-01 LED Retrofit Kit

Description

The D2116-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2116-01	43W	4,945 (est)	115 LPW (est)

D2140-01 LED Retrofit Kit

Description

The D2140-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

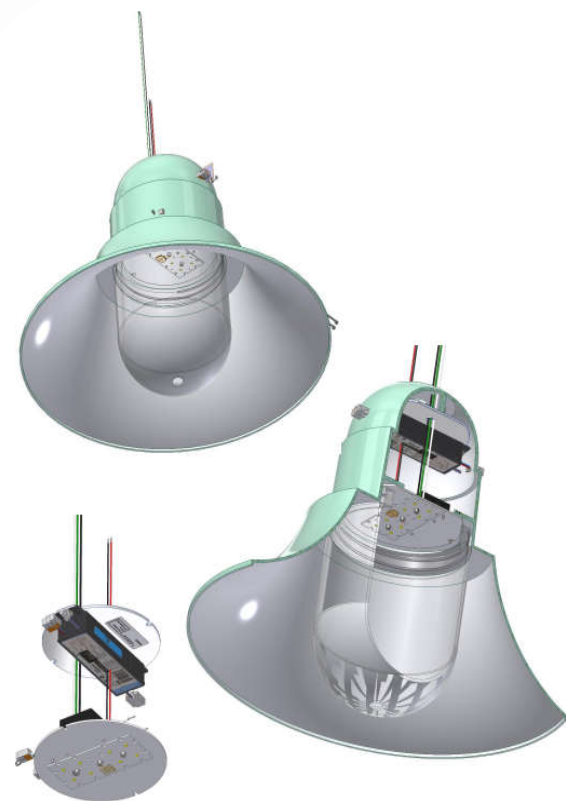

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2140-01	40W	4,600 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2149-01 LED Retrofit Kit

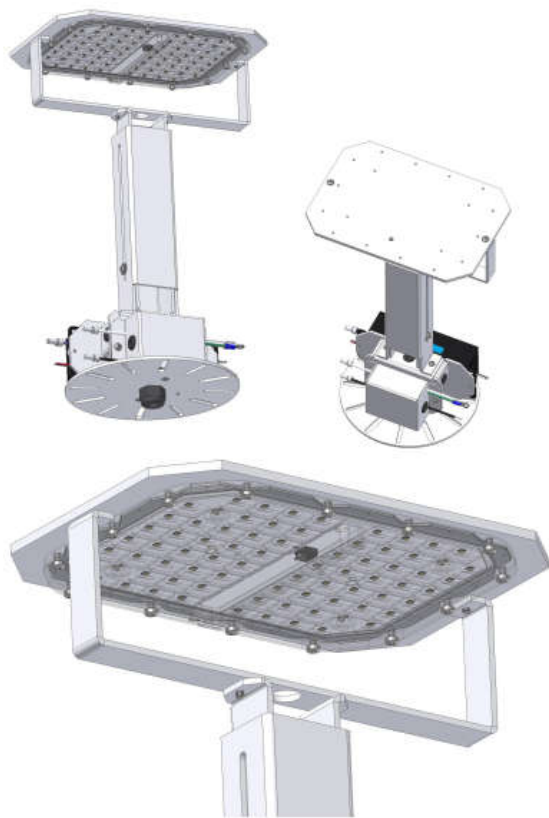

Description

The D2149-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2149-01	35W	4,025 (est)	115 LPW (est)

D2146-01 LED Retrofit Kit

Description

The D2146-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2146-01	70W	8,050 (est)	115 LPW (est)

D2156-01 LED Retrofit Kit

Description

The D2156-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

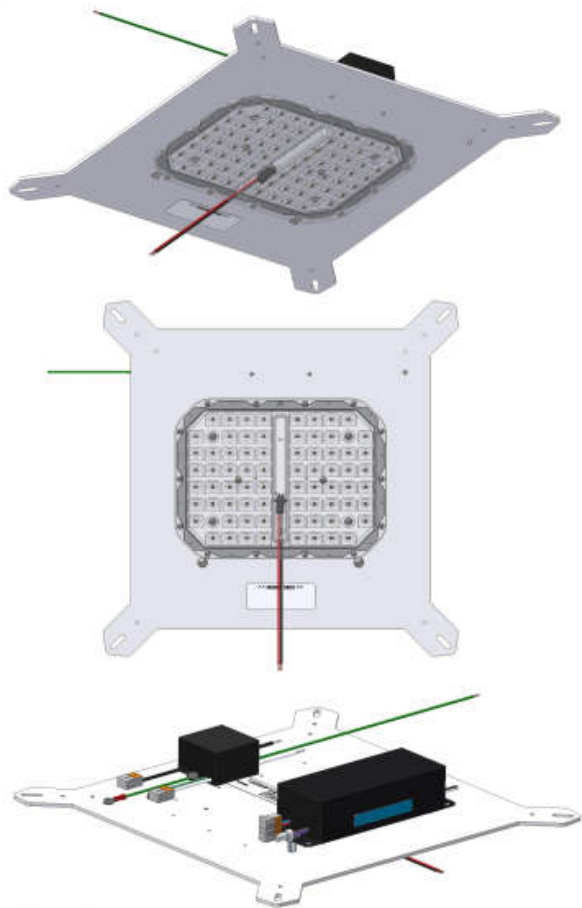

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2156-01	45W	5,175 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2160-01 LED Retrofit Kit

Description

The D2160-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2160-01	45W	5,175(est)	115 LPW (est)

D2162-01 LED Retrofit Kit

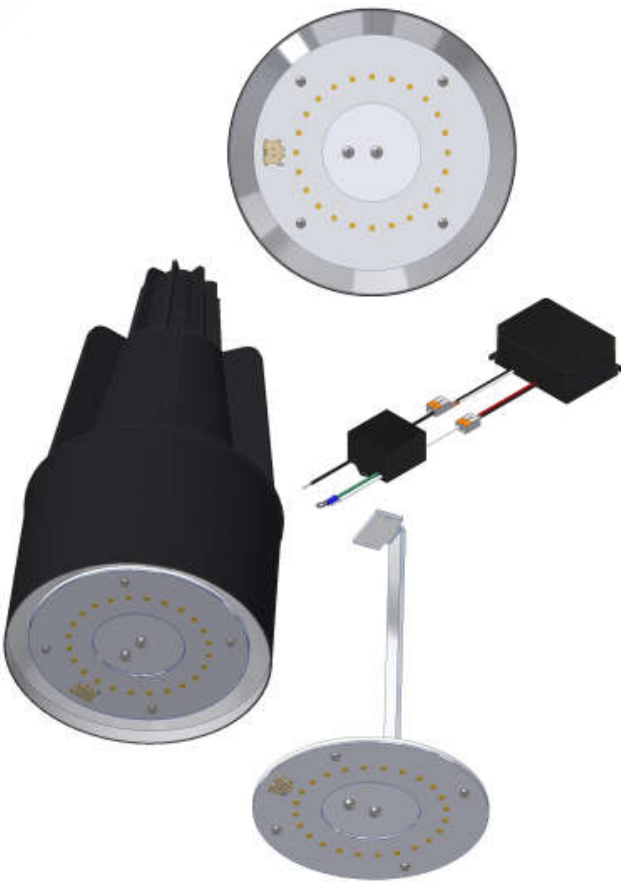

Description

The D2162-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2162-01	85W	9,775 (est)	115 LPW (est)

D2157-01 LED Retrofit Kit

Description

The D2157-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

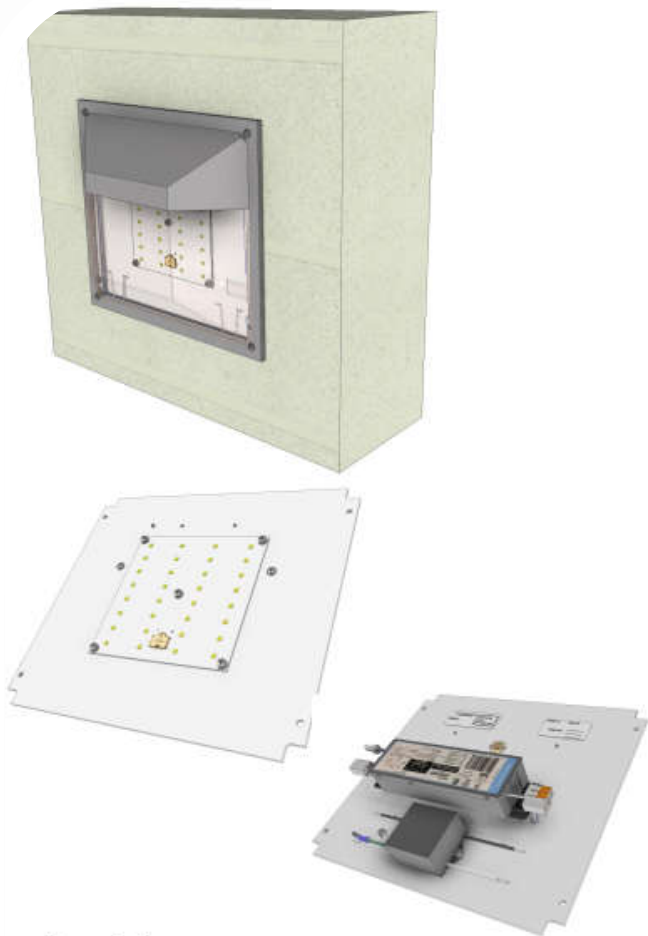

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2157-01	36W	4,140 (est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2151-01 LED Retrofit Kit

Description

The D2151-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2151-01	35W	4,025 (est)	115 LPW (est)

D2155-01 LED Retrofit Kit

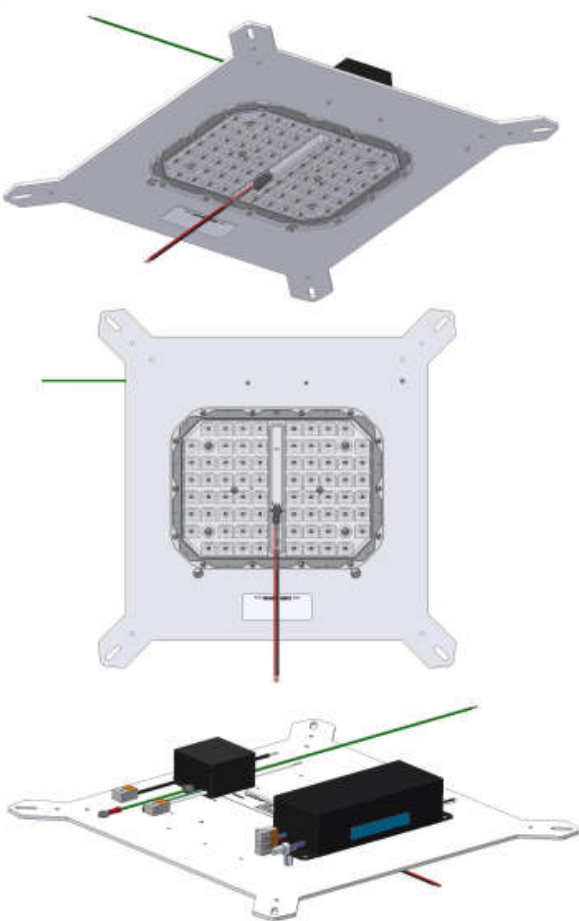

Description

The D2155-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2155-01	105W	12,075 (est)	115 LPW (est)

D2160-01 LED Retrofit Kit

Description

The D2160-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D 2160-01	45W	5,175(est)	115 LPW (est)

LUMECON RETROFIT CATALOG

D2158-01 LED Retrofit Kit

Description

The D2158-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2158-01	65W	7,475 (est)	115 LPW (est)

D2159-02 LED Retrofit Kit

Description

The D2159-02 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

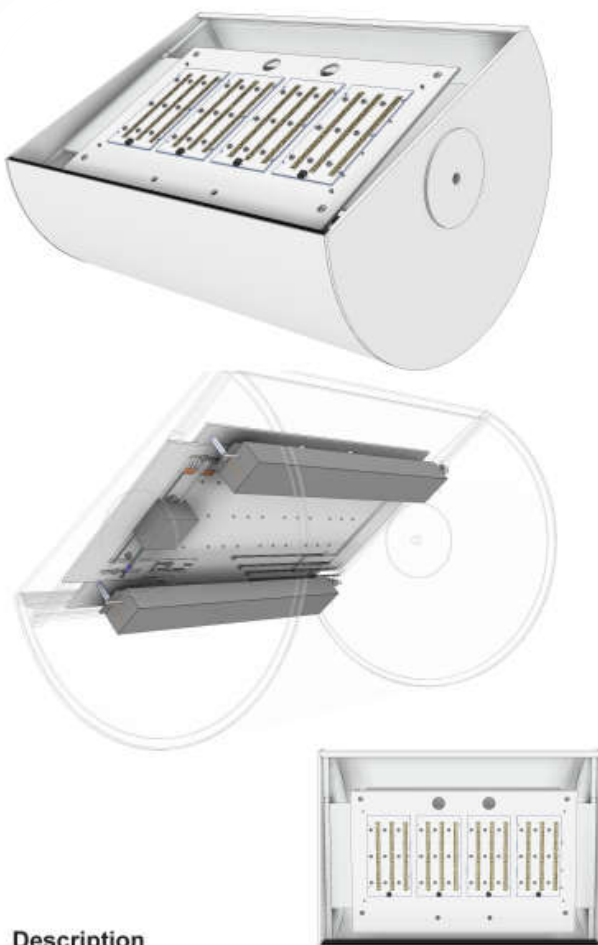

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2159-02	100W	14,950 (est)	130 LPW

D2159-01 300W KIT*

D2159-02 100W KIT*

D2159-01 LED Retrofit Kit

Description

The D2159-01 retrofit kit is designed to upgrade the submitted fixture sample to the latest LED technology. Installation is designed to be simple and efficient using existing hardware. No drilling is required.

Performance Data

Model	Watts	Delivered Lumens	Efficacy
D2159-01	300W	40,950 (est)	130 LPW
