MMA DAILY RECOMMENDATIONS FOR
TUESDAY, JUNE 30, 2026

Geocosmic Critical Reversal Dates (CRD): These dates affect all markets. They are the midpoint of geocosmic clusters and have a range of three days on either side. Sometimes, they expand to as much as 5 days. The idea is to see a new two-week or greater high or low and then a reversal. It is especially effective when major, half-primary, or primary cycle troughs are due. These are more important than the solar-lunar reversal dates. The more stars next to the date, the greater the historical correlation with a cycle end and reversal. For more information, please read Volume 3 of the Stock Market Timing series. Below is the date of the midpoint, and in parentheses, the length of time containing the geocosmic signatures (known as a "cluster"). If the cluster is long (more than 15 days), there may be other possible reversals based on tighter geocosmic clusters within the greater cluster.

June 16-17* (watch grains and currencies)

June 26-29* (Mercury retrograde)

July 6**

July 17-20*** (This is the magnet for trend continuation and then reversal +/- 10 days)

July 24-27** (Mercury direct)

Aug 7-10*

Aug 14-17**

These periods are usually more important than the solar/lunar reversal zones and are usually more accurate because they have a wider orb of time (+/- 3 trading days vs. +/- 1 trading day for solar/lunars). They will correspond more often with major, half-primary, or full primary cycles, whereas lunar reversals need only correspond to 2.5% reversals in stocks.

ABBREVIATIONS:

CRD = Geocosmic Critical Reversal Date

ATH = All-Time High

MA = Moving Average

NOTE: Mercury is now retrograde until July 23. As a policy, we do not initiate new position trades during this time and instead focus on 1-4 day sharp reversals.

BTCN (July Bitcoin): Monday's close was a bullish trigger. The close was above the trend indicator point for the 1st time in 8 days, which means it is upgraded back to neutral.

The daily TIP is 60,147. It will be downgraded back to a trend run down if it closes below there today.

Daily support is 59,188-59,310.
Daily resistance is 61,368-61,490.

Bullish crossover zones are in effect at 55,205-55,797, 52,155-53,270, 46,203-46,325, 40,348-41,072, 30,536-30,625, 20,033-22,440, 17,723-18,362, 14,535-14,590, 12,140-12,233, 11,240-11,420, 9685-10,445, 7850-8183, 5546-5673, 4166-4293, 3920-3940, 3602-3735, 3357-3413 and 3215-3327. It closed below others at 61,057-61,437, 64,315-64,625, 80,956-81,000, 77,945-84,510, 95,795-96,125, 98,613-100,180, 112,812-113,230, and 115,503-115,615, so this is now resistance.

Bearish crossover zones are in effect at 80,658-82,692, 87,492-88,561, 92,672-94,747, and 119,580-119,981. It closed above others at 51,443-55,205, 59,601-61,588, 49,840-50,666, 49,472-49,562, 43,345-44,157, 45,240-45,312, 38,440-38,617, 33,007-35,217, 25,610-25,712, 21,130-21,833, 17,060-17,062, 9537-9588, 9003-9005, 8170-9070, 7112-7115, 3957-3960 and 3852-3950, so these are support now.

No change from yesterday, which stated, *"There is a little bounce here that should be faded. Still have a clean pattern projection to 40,000-45,000. Looking for another lower high as the July 6 CRD approaches, and especially Mars conjunct Uranus."*

LUNAR REVERSAL SIGNALS (FOR CASH): These values pertain to the Moon's position at noon GMT instead of noon NYC, since GMT is the change of date associated with Bitcoin.

NOTE!!! We are changing our tables now, as of March 27. The left-hand column is based on the same 12% studies since July 17, 2014. The right-hand column now gives weighted values of the Moon when Mercury is only direct and has reversals of 10% or more as measured from July 17, 2014! It omits cases where Mercury was retrograde. When Mercury is retrograde, we will post those weighted values in effect.

For now, we want to look for dates when reversals, highs, or lows are consistent between the two columns, as the best indicator of reversals in BTC. The more *, the stronger it is; it represents a low likelihood of a reversal. The more #, the less likely a reversal or big range day. The best setup is when both sets of numbers for each sign agree with a reversal, low, or high. Keep in mind that these are purely lunar days, not solar/lunar days, as with metals and stocks. Please note that our studies are based on noon GMT, not Eastern Time, since Bitcoin's day is based on GMT, not Eastern Time, and noon is the middle of the trading day. However, since the high or low of the day may happen before or after noon, and the Moon can move up to 7 degrees in half a day, we have to allow a one-day orb for these dates to manifest a correct setup.

The Bitcoin lunar cycles for the next few days are as follows. Note that we may update these values by next week, so the values shown here may adjust slightly.

Position traders are flat and may stand aside today.

Aggressive traders are flat and may stand aside today.

VAT: Very Aggressive Traders, trading mostly by the Moon cycle, are short with a stop loss on a close above 66,590 after covering 1/3 for a nice first profit. Let's cover another 1/3 on a drop to 53,000 +/- 1000.

ETHN (July Ethereum): Monday's close was mixed and maintains the bearish sequence. It was also above the TIP for the 1st time in 8 days, which means it is upgraded back to neutral.

The daily TIP is 1586. It will be downgraded back to a trend run down if it closes below there today.

Daily support is **1565-1573**.

Daily resistance is 1655.50-1664.

Bullish crossover zones are in effect at **1452-1589 (held the low)**, and 1353.50-1384. It closed below others at 1683-1719, **1826.50-1993**, **1882-1952**, **2480.50-2485**, 3270.50-3322, 3035-3070, 3758.50-3779, **4141-4162**, and **4138-4164**, so this is now resistance.

Bearish crossover zones are in effect at 1853.50-1859, **2447-2622**, 2952.50-2989, 3797-3845, and 4763.30-4916.80. This is resistance. It closed above others at 1134-1183 and 1083-1110.50, so these are now support.

The intermarket bullish divergence is worth monitoring, although it will be interesting to see if we see a similar divergence to Bitcoin at the 4-year low where Ethereum bottomed first. Downside target of 1000-1100 remains.

Position traders are flat and may stand aside.

Aggressive traders are flat and may stand aside.

VAT: are flat and may sell short on a rally to 1700 +/- 12 with a stop loss on a close above 1950.

NOTE 1: [THE ANNUAL MMA MID-YEAR MARKET WEBINAR](#) WITH MMA MARKET ANALYSTS WAS GREAT — AND RECORDINGS ARE NOW AVAILABLE. This year's webinar was conducted in an interview format hosted by Raymond Merriman. The feedback from attendees was very positive, with many saying they loved the new interactive format in which Ray presented his views and then invited each analyst to share their outlook for the second half of 2026. The analysts and markets covered this year included NASDAQ (Wiebke Held), DJIA (Gianni Di Poce), Euro (Ulric Aspegren), Bitcoin (Ray Merriman), Silver and Crude Oil (Pouyan Zolfagharnia), and Gold and T-Notes (Wyatt Fellows). The webinar lasted just over three hours, with two five-minute breaks, yet no one seemed to get exhausted thanks to the lively exchanges. The cost of the recording is \$66 (a super bargain for a workshop covering these markets), which includes the presentation slides. The markets discussed are still very relevant, and many of the setups described are indeed unfolding now! To order, [click here](#).

Here are three of the several positive responses to the new format and the content:

Today's webinar was fantastic. I loved the format. There's a lot of talent in MMA. I listen, learn, and make a lot of money using MMA's products. Your technical analysis schoolhouse mirrors what the CIA created 25 years ago for their analysts (Sherman Kent School for Intelligence Analysis). Students graduating from your program today will carry your legacy forward for the next 50 years.

— R.B., veteran trader

That is great feedback! I really enjoyed it too and learned a lot from the team.

— Pouyan Zolfagharnia, MMA Crude Oil and Silver analyst

I also noticed a great improvement, as we showed a unified team (including the same slide background) and more of a discussion rather than a presentation. I think it helped viewers acquire greater clarity through a more active process during the webinar, where you tightened up possible outcomes across many markets.

— Ulric Aspegren, MMA Euro analyst from the webinar

NOTE 4: COMING SOON: RAY MERRIMAN'S NEW BOOK, [JUPITER AND SATURN TRANSITS: MASTERING THE CYCLES OF LIFE](#). This is NOT the book you would expect from Ray Merriman. But it is a book you will use and value for the rest of your life if you study astrology, and especially if you are also a trader. This 425-page book covers all the major transits of Jupiter to one's natal planets and angles, including interpretations of the opening and closing sextile, square, and trine aspects. The Saturn section also includes the opening and closing semi-square and sesquiquadrate transits to all natal planets and angles, plus the "Business Cycle" of transiting Saturn. Each transiting aspect is ranked from -3 to +3 in terms of trading and investment potential, which alone is worth the price of the book.

Here are early reviews by two of the world's leading astrologers after receiving an early draft of this book:

Ray Merriman's [Jupiter and Saturn Transits: Mastering the Cycles of Life](#) is beautifully and fluidly written, and we know from the first chapter that we are in the hands of a master with his experience of astrology honed over decades. I loved his descriptions of the Jupiter and Saturn cycles in our lives, detailing the transits to all of the personal planets in one's birth chart. Even being an experienced astrologer myself, I learned a lot through these descriptions in terms of how these transits affect us personally. However, what is unique about this book is that Ray has also written it through the lens of financial market investment potential and timing for each aspect, also differentiating between waxing and waning aspects, which was fascinating. He has used a scale of positive and negative potential for each aspect, also drawing a distinction between that potential for traders and investors. This is invaluable advice. I highly recommend this book to all budding and more experienced astrologers. Thank you, Ray, for this unique contribution!

— Pam Gregory, prominent British astrologer, bestselling author (*How to Co-Create Using the Secret Language of the Universe* and *You Don't Really Believe in Astrology, Do You?*), and host of a widely followed YouTube channel

Jupiter and Saturn Transits: Mastering the Cycles of Life is a fabulous, comprehensive guidebook rich with humanistic wisdom for astrologers. This book is amazing...exceptional in every way!! Articulating the Saturn and Jupiter transits to natal planets and angles, Ray offers special emphasis on delineating the waxing and waning aspects. His house-by-house interpretation of these powerful astrological energies and influences brilliantly combines useful tips and insightful keywords. Ray also shares his valuable expertise in financial astrology by including the Financial Ranking for trading with the transits, which makes this book very special!

— Kathy Rose, renowned full-time consulting astrologer and curator of Rose Astrology, with over 40 years of professional practice

The book **JUPITER AND SATURN TRANSITS: MASTERING THE CYCLES OF LIFE** is due for release in mid-August. The cost for this book is \$39.99. However, those who order now, prior to the actual printing of the book in mid-August, will receive the special pre-publication price of \$33.00 (plus postage for the printed edition; no postage is required for the eBook version). To order at the pre-publication price, click [here](#).

NOTE 5: THE [JUPITER REPORT: YOUR MOMENTS OF OPPORTUNITY!](#) The *Jupiter Report* is written by Raymond Merriman. It is a 30- to 40-page report that all traders (and even non-traders) will find highly valuable. It identifies the times during the year when Jupiter transits are highlighted in your natal chart and explains the meaning of Jupiter's transits to your natal planets and angles over a 14-month period (including one month before your order date and one month after the year ends). *As an added bonus, each transit is ranked on a scale from -3 to +3 in terms of favorability for trading. Traders may find this especially valuable!* Would you like to know if you are under a +3 transit and therefore most likely to experience trading success? Or a -3 transit, with a stronger-than-usual potential for misjudgments that can be costly? The price for a personal 14-month *Jupiter Report* based on your birth data is \$69.

Coming soon! *The Saturn Report: Mastering Your Life Cycles*. Due out in late summer or early fall.

NOTE 6: THE [MMA SOLAR-LUNAR APP](#) OFFERS REVERSAL SIGNALS FOR THE DJIA, NASDAQ, GOLD, AND SILVER. It is an ideal tool to have in your back pocket if you are a short-term swing trader looking for high-probability dates that identify isolated lows and highs in these markets. Please note that this should not be used as a standalone system. It works best as an adjunct tool when cycle lows or highs are due, when a market is in a technically overbought or oversold condition, or when it is exhibiting intermarket bullish or bearish divergence relative to a related market. The app is currently available only on Apple devices (iPhone and iPad). *HOWEVER, IT WILL SOON BE AVAILABLE BY SUBSCRIPTION ON THE NEW MMA WEBSITE TO EVERYONE, INCLUDING USERS OF ANDROID PHONES, AROUND JULY 4!* **To learn more about the MMA app, click [here](#).** To order on your iPhone, go to the Apple App Store and search for *Merriman Solar/Lunar Reversals*.

Disclaimer and use of this information properly: Futures and options trading involve the risk of large losses as well as large gains.

Information is provided herein with sincere intent and according to MMA's original research studies and methodologies. These reports are provided mainly for "speculators." By its very nature, "speculation" means "willing to take the risk of loss." "Speculators" must be willing to accept the fact that they are going to have losing trades, many more than, say, "investors." That is why they are "speculators." The way "speculators" become profitable is not so much by a high percentage of winning trades but by controlling the amount of loss on any given trade, so the average trade on winners is considerably more than the average trade on losing trades.

MMA's comments, strategies, and data are given to serve as guidelines for traders for each day and/or week. Comments and strategies are based upon intraday and intraweek highs, lows, and closes at the end of the day or week. Traders are advised to use these only as guidelines - and use intraday analysis to establish positions in directions of comments given, so long as those support/resistance (entrance) areas. Looks favorable according to intraday analysis as well. Support and resistance are areas for day traders to look to buy and sell intraday. No guarantees are made for accuracy.

Support may represent favorable risk/reward places to buy if the trend is up. If prices trade below support, then have a close back above; it is considered a bullish "trigger" and oftentimes represents a good buy signal. Resistance may represent favorable risk/reward places to go short if the trend is down. If prices trade above it, then have a weekly close back below; it is considered a bearish "trigger" and oftentimes is a good sell signal.
