

**MMA WEEKLY TREASURIES, CRUDE OIL AND SOYBEAN REPORT
FOR THE WEEK OF JULY 6, 2026**

Note: Mercury turned retrograde June 29 and will remain retrograde until July 23. As Ray has often advised, Mercury retrograde periods can coincide with mixed signals, false starts, and sudden reversals. Position traders may wish to exercise added caution before initiating new positions during this period and wait for stronger confirmation before entering new trades.

GEOCOSMIC CRITICAL REVERSAL DATES (CRDs)

These dates affect all markets. They are the midpoints of geocosmic clusters and have a normal orb of three days on either side (82% rate of frequency). Sometimes, they expand to as much as six days (90+% frequency with that orb). The idea is to see a new two-week or greater high or low and then a reversal. It is especially effective when major, half-primary, or primary cycle troughs are due. These are more important than the solar-lunar reversal dates: the more stars, the greater the historical correlation with a cycle culmination. Please read Volume 3 of the Stock Market Timing series for more information. Below is the midpoint date, and in parentheses, the length of time containing the geocosmic signatures (known as a "cluster"). If the cluster is long (more than 15 days), there may be other possible reversals based on tighter geocosmic clusters within the greater cluster.

June 26-29* (Mercury retrograde)

July 6**

July 11* (midpoint of Mercury Rx when markets that did not reverse at the time of the retrograde +/- 2 trading days may do so now)

July 17-20* (This is the magnet for trend continuation and then reversal +/- 10 days)**

July 24-27 (Mercury direct)**

Aug 7-10*

Aug 14-17**

These periods are usually more important than the solar/lunar reversal zones. They are usually more accurate because they have a wider orb of time (+/- 3 trading days vs. +/- 1 trading day for solar/lunars). They will correspond more often with major, half-primary, or full primary cycles, whereas lunar reversals need only correspond to 2.5% reversals in stocks.

ABBREVIATIONS:

CRD = Geocosmic Critical Reversal Date

ATH = All-Time High

MA = Moving Average

PB = Primary cycle bottom

PT = Primary cycle top

MB = Major cycle bottom

MT = Major cycle top
 TB = Trading cycle bottom
 TT = Trading cycle top

TYU (Sep T-Notes) by Wyatt Fellows, MMA Analyst:

Last week's close was mostly bearish. The close was back below the trend indicator point (TIP), keeping it neutral.

This week's trend indicator point is 109/24.

Weekly support is 109/03-109/06. A trade below followed by a close back above is a bullish trigger.

Weekly resistance is 110/01-110/04. A trade above followed by a close back below is a bearish trigger.

No bullish crossover zones are in effect. Prices closed below bullish crossover zones at 109/22-109/23, 125/22-125/31, 126/29-127/13, 135/25-135/28, and 138/29-138/30, so these are now resistance.

Bearish crossover zones are in effect at **113/30.5-114/12**, 115/15-115/21, 123/03-123/18.5, 129/14.5-130/04, 136/00.5-136/10, 137/15.5-137/27.5, and 139/21-139/21.5, so these are resistance. Prices closed above the most recent bearish crossover zone at 110/00-110/08, so this is now support.

Primary cycles in T-Notes typically last 15-21 weeks and break down into two phases of 8-11 week half-primary cycles and/or three phases of 5-7 week major cycles.

Preferred Primary cycle: July 6 begins the 7th week of a new primary cycle, measured from the May 19 low of 108/18 in the nearby contract. T-notes have yet to get anything going on the upside as we approach the halfway point of the cycle.

Prior to this week, we had thought the first major cycle crest occurred June 15, followed by a major cycle low on June 22, forming in the 5th week. However, I think a better fit now might be that the first major cycle crest formed on June 26 (right on the June 26-29 CRD) at 110/10.5, and this market is now in a corrective 3-8 day decline into a major cycle low due by the end of this week. It's even possible the low came in on July 2 following a four-day decline. If it did, then July 6 would mark the 1st week of the second major cycle.

Alternate Primary cycle: There is none.

Price targets and technicals: If a major cycle crest did occur on June 26, then the bullish price target for a major cycle low is 109/09 +/- 08. The July 2 low was right there at 109/12. If this confirms, then the upside price target for the next major cycle crest is 111/14 +/- 08. This is right in line with the initial price target for the primary cycle at 111/15 +/- 22.

T-notes are immersed in a week's-long flag or wedge pattern. The high for this primary cycle so far has occurred in the 5th week. This is a bit concerning as primary cycles that are turning bearish often top out in weeks 2-5, and the high of June 26 was also a CRD. It is imperative that they break out to the upside in order to keep the bullish thesis alive.

Geocosmics: Last week stated, *"We are still in the orb of the June 26-29 CRD that includes Mercury turning retrograde on Monday. The T-note market has shown a propensity to make reversals around retrograde and direct stations in the past. For this reason, I can't rule out that T-notes aren't rallying to a major cycle crest now, to be followed by a decline into the July 6 CRD for a major cycle low."* This now looks like it is playing out, so we would look for a major cycle low and reversal back higher early this week if it didn't already form on July 2, which was in orb of the July 6 CRD.

Strategy: Position traders are long. Keep the stop loss on a weekly close below 108/00 or 108/15, depending on your risk allowance. Exit 1/3 at 111/10 +/- 05.

Aggressive traders are long. Exit 1/3 at 111/00 +/- 05 if offered. Keep the stop loss on a weekly close below 108/15.

CLQ (Crude Oil – Aug) by Pouyan Zolfagharnia, MMA Analyst. We will switch to the September contract next week, which is currently trading 5 cents below August.

Last week's close was neutral, trading within the weekly support and resistance zones. The close was below the TIP, retaining the trend run-down.

This week's trend indicator point (TIP) is 72.60. It will be upgraded to neutral if we close above here next week.

Weekly support is 66.18-66.47. A weekly close below this range is bearish. A trade below followed by a close back above is a bullish trigger.

Weekly resistance is 70.74-71.03. A weekly close above this range is bullish. A trade above followed by a close back below is a bearish trigger.

Bullish crossover zones remain in effect at 68.67-78.27, 61.90-62.14, 53.08-54.02, 49.15-49.46, and 43.27-43.54.

Prior bearish crossover zones remain in effect at 89.37-89.81 and 115.23-115.26. Prices closed above bearish crossover zones previously at 38.25-38.98 and 41.88-42.21, so these are now support zones.

Preferred primary cycle labeling: Primary cycles in Crude Oil last 15-23 weeks, and the phases of the primary cycle include half-primary cycles lasting 8-12 weeks and major cycles lasting 5-8 weeks.

We are commencing week 12 of the primary cycle that bottomed April 17 at 78.97 (75.45 in the August contract). We now have the bearish confirmation for the primary cycle, as prices have dropped below the low that commenced the cycle.

The first major cycle trough formed on May 29 at 86.35 (84.00 in the August contract) in the orb of the May 22-26 CRD and was accompanied by bullish oscillator divergence in the CCI. Prices are now either dropping into the half-primary cycle or the second major cycle low. We remain in the orb of the half-primary trough this week. We also remain in orb of the second major cycle over the next 3 weeks. As noted last week, *"We need to finish filling the gap from February, which means prices have to continue dropping as low as 66.29-67.80."* We have now filled this gap and could now see a rally at least to the 16-day MA.

Alternate primary cycle: There is none.

Geocosmics:

The overall trend remains bearish until mid to late July, where the seasonal pattern suggests a trough formation. This is in time for the Jupiter-Pluto opposition. However, there are a couple of disruptive geocosmic aspects coming up in early July and form part of the July 6 CRD, which is suggestive of a reversal in the trend. Neptune will station retrograde on July 7. I generally like to see a reversal in the trend of Crude oil within 10 days of this signature. We also have a Mars-Uranus conjunction on July 4, which is a war/conflict aspect. Given the bullish divergence that is building in the CCI, we may have seen the bottom

of either the half-primary or second major cycle with last week's 67.04 low, as both cycles overlapped then (and will remain so this week if last week wasn't a low). If that was the low last week, we would anticipate at least a 3-8 day rally, but it may last longer if last week was indeed a half-primary low.

Technicals and Price Targets: The downside MCP price target for the primary cycle low is 70.42 +/- 5.79. We are now in this price target zone. If a trough formed on July 2 at 67.04, we could see a corrective rally up to 81.21 +/- 3.33. In that case, we should rally and at least test the 16-day moving average and perhaps fill the gap around 82.42-83.20.

Strategy: Position traders are now long as last week advised to, *"Look to go long on a decline to 67.80 +/- 0.50 with a stop-loss below 64.30."* Cover 1/3 at 78.00 +/- .50 if offered.

Aggressive traders are now long as last week advised to, *"Let's probe the long again on a decline to 67.80 +/- 0.50 with a stop-loss below 64.30."* Cover 2/3 at 78.00 +/- .50 if offered.

Very aggressive traders are now long as last week advised to, *"Let's probe the long again on a decline to 67.50 +/- 0.50 with a stop-loss below 64.30."* Cover 2/3 at 78.00 +/- .50 if offered.

ZSX (Nov Soybeans) by Wyatt Fellows, MMA Analyst:

Last week closed with a bullish trigger. The close was above the trend indicator point (TIP) for the 2nd week in a row, remaining neutral.

This week's TIP is 1144.50. It will be upgraded to a trend run up with a higher weekly close. The weekly pivot point is also at 1144.25 this week, giving this price level extra significance.

Weekly support is 1127.25-1128.50. A weekly close below this range is bearish. A trade below followed by a close back above is a bullish trigger.

Weekly resistance is 1163.75-1165.00. A weekly close above this range is bullish. A trade above followed by a close back below is a bearish trigger.

Bullish crossover zones are in effect at **1044.00-1047.25**, 998.00-1010.25, 914.00-925.00, and 859.00-861.00. These are all support. It closed below previous crossover zones at 1403.00-1416.50 and 1227.75-1270.00, which are now resistance.

The most recent bearish crossover zone formed at **1160.00-1177.25** (held the high this week in the November contract). Others are in effect at 1647.25-1675.25, 1360.75-1368.00, and 1274.25-1287.25. These are all resistance zones. Prices closed above others at 1124.25-1126.50, 1065.75-1066.00, 940.00-950.00, 860.00-861.50, and 824.00-831.00, so these are now all support zones.

Primary cycles in Soybeans typically last 15-21 weeks and break down into two phases of 8-11-week half-primary cycles and/or three phases of 5-7-week major cycles.

Preferred primary cycle: July 6 begins the 13th week of the primary cycle, measured from the April 8 low of 1135.00 in the November contract. It is next due to bottom in 3-9 weeks. The primary cycle in this labeling is technically bearish even though the June 15 low was above the March 17 low in the now prompt November contract. This implies lower prices below 1121.75 before the next bottom is in.

Following last week's new corrective high, the best fit for the phase breakdown of this primary cycle is that July 6 will begin the 3rd week of the second half-primary cycle measured off the June 15 low. We

would be expecting a 3-13 day corrective rally back to the 45-day moving average before Soybeans turn back lower. The July 1 high was the 11th day of the rally, so that might have been it. This scenario implies Soybeans won't find a lasting bottom until August at the earliest.

Alternate primary cycle: July 6 could be starting just the 3rd week of a new primary cycle, measured off the June 15 low of 1121.75. The previous primary cycle would have bottomed in the 24th week, so it expanded by a few weeks. Furthermore, there was intermarket bullish divergence to the Aug contract, which made a slightly lower low last week, but the Nov contract did not (made a double bottom instead). This implies June 15 could have also been an 11-month low, as shorter cycles can and do distort when longer-term cycles are due. In order for this labeling to become the preferred one, Soybeans will need to start closing above the 45-day moving average. If they can, then this market could be turning quite bullish here.

It should be noted that both primary cycle labelings are in play at the moment, with either labeling having an equal chance at being correct.

Price targets and technicals: If July 1 marked a half-primary cycle crest, the downside price target for the primary cycle low becomes 1069.00 +/- 17.00. The 1100.00 price level would likely offer some support as well. However, if July 1 was not a top, Soybeans could have further potential up to, say, 1172.00 +/- 10.00 before finding resistance.

Alternatively, if this is the 3rd week of a new primary cycle, Soybeans should take out the 45-day moving average on this rally. If it can, the previous primary cycle crest of 1214.00 becomes the initial upside price target. Supporting the prospects that a primary cycle low did form on June 15 is the bullish oscillator divergence that formed between price and the CCI indicator.

Geocosmics: Last week stated, "Mercury will turn retrograde on Monday. Jeanne Long had a rule stating that whatever price Soybeans are trading at the time of Mercury retrograde, they will return to that price when Mercury turns back direct. This rule has had a pretty good track record as of late, so we need to pay attention to where Soybeans close on Monday." Soybeans closed around 1140.00 on Monday.

Soybeans are rallying into the July 6 CRD that contains a strong reversal aspect in Mars conjunct Uranus on July 4. If the preferred labeling is correct, then this is the time for the second half-primary top to occur. The next important geocosmic zone for a reversal occurs July 17-20 +/- 10 days. For Soybeans, we would focus on the early part of that time band around Venus square Uranus July 13, or later around July 24-27 +/- 3 trading days with Mercury and Saturn stationing and Venus squaring Mars.

Strategy: Position traders are long with a stop loss on a weekly close below 1100.00. Exit 1/3 at 1180.00 +/- 7.00 if offered.

Aggressive traders are long with a stop loss on a weekly close below 1121.00. Exit 1/3 at 1167.00 +/- 7.00 if offered.

ANNOUNCEMENTS & EVENTS

ANNOUNCEMENTS

NOTE 1: THE JULY ISSUE OF THE [MMA MONTHLY CYCLES REPORT](#) WILL BE RELEASED THIS WEEK, JULY 7–8. This issue will be especially timely because it will cover the powerful Jupiter convergence taking place July 15–25, when Jupiter will sextile Uranus, trine Neptune, and form an opposition to Pluto, all during the first of five passages of the Uranus–Pluto trine that will continue into 2028. Will the U.S. stock market melt up to a new all-time high before beginning a powerful decline? Or will it continue breaking to new highs? Each issue includes our outlook for the U.S. stock market (DJIA and S&P), Gold, Silver, Copper, Treasuries, the Euro currency, Crude Oil, and Soybeans. The MMA Monthly Cycles Report also provides MMA’s original geocosmic CRDs and solar/lunar reversal dates over the next several weeks, as well as trading strategies for both position traders and aggressive short-term traders. If you would like to try a one-month subscription, you can sign up for the [July issue](#) for only \$35 — or save by ordering a three-report or twelve-report subscription.

Additionally, the monthly [MMA European Cycles Report](#), covering the DAX and SMI, and the [MMA Japan Cycles Report](#), covering the Nikkei stock index and the Dollar/Yen outlook, will be issued Tuesday–Wednesday, when these markets will also be at critical junctures.

NOTE 2: A SIX-WEEK SUMMER SCHOOL COURSE ON ESOTERIC ECONOMICS: THE HIDDEN ARCHITECTURE OF WEALTH, BY GIANNI DI POCE, WILL BEGIN ON SUNDAY, JULY 12. This immersive, six-week online course is the complete companion to *Esoteric Economics*, the financial astrology textbook by [Gianni Di Poce](#). The course touches on conventional economics, but it also reveals the deeper, often invisible currents that truly govern wealth: archetypal forces, temporal rhythms, capital flows, and the ancient principles that have shaped civilizations for millennia. The course blends rigorous historical and technical analysis with esoteric insight, practical tools, and visionary thinking. You will not simply study economics — you will be initiated into its hidden language and learn to navigate it with clarity, confidence, and creative power. The cost of this six-week course is \$300, and registration is now open! Click [here](#) to register.

NOTE 3: [THE ANNUAL MMA MID-YEAR MARKET WEBINAR](#) WITH MMA MARKET ANALYSTS WAS GREAT — AND RECORDINGS ARE NOW AVAILABLE. This year’s webinar was conducted in an interview format hosted by Raymond Merriman. The feedback from attendees was very positive, with many saying they loved the new interactive format in which Ray presented his views and then invited each analyst to share their outlook for the second half of 2026. The analysts and markets covered this year included NASDAQ

(Wiebke Held), DJIA (Gianni Di Poce), Euro (Ulric Aspegren), Bitcoin (Ray Merriman), Silver and Crude Oil (Pouyan Zolfagharnia), and Gold and T-Notes (Wyatt Fellows). The webinar lasted just over three hours, with two five-minute breaks, yet no one seemed to get exhausted thanks to the lively exchanges. The recording costs \$66 (a super bargain for a workshop covering these markets), which includes the presentation slides. The markets discussed are still very relevant, and many of the setups described are indeed unfolding now! To order, [click here](#).

Here are three of the many positive responses to the new format and the content:

Today's webinar was fantastic. I loved the format. There's a lot of talent in MMA. I listen, learn, and make a lot of money using MMA's products. Your technical analysis schoolhouse mirrors what the CIA created 25 years ago for their analysts (Sherman Kent School for Intelligence Analysis). Students graduating from your program today will carry your legacy forward for the next 50 years.

— R.B., veteran trader

That is great feedback! I really enjoyed it too and learned a lot from the team.

— Pouyan Zolfagharnia, MMA Crude Oil and Silver analyst

I also noticed a great improvement, as we showed a unified team (including the same slide background) and more of a discussion rather than a presentation. I think it helped viewers acquire greater clarity through a more active process during the webinar, where you tightened up possible outcomes across many markets.

— Ulric Aspegren, MMA Euro analyst from the webinar

NOTE 4: COMING SOON: RAY MERRIMAN'S NEW BOOK, [JUPITER AND SATURN TRANSITS: MASTERING THE CYCLES OF LIFE](#). This is Book One, the first of five books that will be written on the outer planets transiting the natal chart over the next four years. Nothing like this has ever been done in the history of astrology. This first book, on the transits of Jupiter and Saturn, is approximately 425 pages long, covering all the major transits of Jupiter to one's natal planets and angles, including interpretations of the opening and closing sextile, square, and trine aspects. The Saturn section also includes the opening and closing semi-square and sesquiquadrate transits to all natal planets and angles, plus the "Business Cycle" of transiting Saturn. Each transiting aspect is ranked on a scale of -3 to +3 in terms of trading and investment potential, which alone is worth the price of the book.

Here are early reviews by two of the world's leading astrologers after receiving an early draft of this book:

Ray's Jupiter and Saturn Transits: Mastering the Cycles of Life is a fabulous, comprehensive guidebook rich with humanistic wisdom for astrologers. This book is amazing... exceptional in every way! Articulating the Saturn and Jupiter transits to natal planets and angles, Ray offers special emphasis on delineating the waxing and waning aspects. His house-by-house interpretation of these powerful astrological energies and influences brilliantly combines useful tips and insightful keywords. Ray also shares his valuable expertise in financial astrology by including the Financial Ranking for trading with the transits, which makes this book very special!

— Kathy Rose, renowned full-time consulting astrologer and curator of Rose Astrology, with over 40 years of professional practice

Jupiter and Saturn Transits: Mastering the Cycles of Life is a valuable reference guide from financial astrologer and analyst Raymond A. Merriman. This book covers the transits of Jupiter and Saturn to one's natal chart and applies them to financial trading or investing. Ray has once again dispensed his

wisdom and decades of research experience in 400+ pages of a keepsake for this and future generations of astrologers.

The book begins with a personal story, perfectly setting the stage for Ray's analysis of how these two powerful influencers can affect one's life, and what opportunities or potential pitfalls in trading might also appear. Written in a clear reference style, it allows readers to go directly to the areas that are affecting them now. As the planets advance, check the latest updates, and then use the book the rest of the time as an astrology textbook on synthesizing transiting planets, the most-requested area of astrology for consultations and readings.

For traders or investors, the inclusion of Ray's practical +3 to -3 "Ranking of Financial and Trading Potential" is worth the book alone, providing a quick scale to evaluate periods of potential opportunity or caution during a Jupiter or Saturn transit. No question, Ray has penned another classic. This book should be in any astrologer's collection, whether they are involved in the financial markets or not.

— Thomas Miller, prominent astrologer and host of the popular daily audio program, the *Fun Astrology with Thomas Miller* podcast

The book **JUPITER AND SATURN TRANSITS: MASTERING THE CYCLES OF LIFE** is due for release in mid-August. The list price is \$39.99. However, those who order now, prior to the actual printing of the book in mid-August, will receive the special pre-publication price of \$33.00 (plus postage for the printed edition; the eBook requires no postage). To order at the pre-publication price, click [here](#).

NOTE 5: THE [JUPITER REPORT: YOUR MOMENTS OF OPPORTUNITY!](#) The *Jupiter Report* is written by Raymond Merriman. It is a 30- to 40-page report that all traders (and even non-traders) will find highly valuable. It identifies the times during the year when Jupiter transits are highlighted in your natal chart and explains the meaning of Jupiter's transits to your natal planets and angles over a 14-month period (including one month before your order date and one month after the year ends). *As an added bonus, each transit is ranked on a scale from -3 to +3 in terms of favorability for trading. Traders may find this especially valuable!* Would you like to know if you are under a +3 transit and therefore most likely to experience trading success? Or a -3 transit, with a stronger-than-usual potential for misjudgments that can be costly? The price for a personal 14-month *Jupiter Report* based on your birth data is \$69.

Coming soon! *The Saturn Report: Mastering Your Life Cycles*. Due out in late summer or early fall.

NOTE 6: THE [MMA SOLAR-LUNAR APP](#) OFFERS REVERSAL SIGNALS FOR THE DJIA, NASDAQ, GOLD, AND SILVER. It is an ideal tool to have in your back pocket if you are a short-term swing trader looking for high-probability dates that identify isolated lows and highs in these markets. Please note that this should not be used as a standalone system. It works best as an adjunct tool when cycle lows or highs are due, when a market is in a technically overbought or oversold condition, or when it is exhibiting intermarket bullish or bearish divergence relative to a related market. The app is currently available only on Apple devices (iPhone and iPad). *HOWEVER, IT WILL SOON BE AVAILABLE BY SUBSCRIPTION ON THE NEW MMA WEBSITE TO EVERYONE, INCLUDING USERS OF ANDROID PHONES, AROUND JULY 4!* **To learn more about the MMA app, [click here](#).** To order on your iPhone, go to the Apple App Store and search for *Merriman Solar/Lunar Reversals*.

EVENTS

JULY 12, 2026: Esoteric Economics course begins with Gianni Di Poce. The six-week course costs \$300

and runs from July 12 to August 16. See above for further details. Click [here](#) to register.

SEPTEMBER 3, 2026: A UAC PRE-CONFERENCE WORKSHOP ON FINANCIAL ASTROLOGY BY RAYMOND MERRIMAN, 1:00–5:00 PM. This workshop will take place at the United Astrology Congress (UAC), the largest astrological conference in the world, which is held every four to eight years. More than 150 world-class astrologers will be presenting, and over 1500 attendees will be present. The conference will be held at the Marriott Downtown Chicago Magnificent Mile Hotel. In addition to the workshop, Ray will present another lecture during the six-day event on mundane astrology, titled "What Is Happening in the World from an Astrological Viewpoint," on September 5. **For more information, visit www.uacastrology.com.**

Disclaimer and proper use of this information: Futures and options trading involve the risk of large losses as well as large gains.

Information is provided herein with sincere intent and according to MMA's original research studies and methodologies. These reports are provided mainly for "speculators." By its very nature, "speculation" means "willing to take the risk of loss." "Speculators" must be willing to accept the fact that they are going to have losing trades, many more than, say, "investors." That is why they are "speculators." The way "speculators" become profitable is not so much by a high percentage of winning trades but by controlling the amount of loss on any given trade, so the average trade on winners is considerably more than the average trade on losing trades.

MMA's comments, strategies, and data are provided as guidelines for traders each day and/or week. Comments and strategies are based upon intraday and intraweek highs, lows, and closes at the end of the day or week. Traders are advised to use these only as guidelines - and use intraday analysis to establish positions in the directions of comments given, so long as those support/resistance (entrance) areas. Looks favorable according to intraday analysis as well. Support and resistance are areas for day traders to look to buy and sell intraday. No guarantees are made for accuracy.

Support may represent favorable risk/reward places to buy if the trend is up. If prices trade below support, then have a close back above; it is considered a bullish "trigger" and oftentimes represents a good buy signal. Resistance may represent favorable risk/reward places to go short if the trend is down. If prices trade above it, then have a weekly close back below; it is considered a bearish "trigger" and oftentimes is a good sell signal.

By signing up for these reports, the reader agrees that he/she is solely responsible for any actions taken in markets, and neither the author, publisher, analyst, or any person associated with MMA assumes any responsibility whatsoever for the reader's decisions.
