

**MMA WEEKLY GOLD AND SILVER REPORT
FOR THE WEEK OF JULY 6, 2026**

Note: Mercury turned retrograde June 29 and will remain retrograde until July 23. As Ray has often advised, Mercury retrograde periods can coincide with mixed signals, false starts, and sudden reversals. Position traders may wish to exercise added caution before initiating new positions during this period and wait for stronger confirmation before entering new trades.

GEOCOSMIC CRITICAL REVERSAL DATES (CRDs)

These dates affect all markets. They are the midpoints of geocosmic clusters and have a normal orb of three days on either side (82% rate of frequency). Sometimes, they expand to as much as six days (90+% frequency with that orb). The idea is to see a new two-week or greater high or low and then a reversal. It is especially effective when major, half-primary, or primary cycle troughs are due. These are more important than the solar-lunar reversal dates: the more stars, the greater the historical correlation with a cycle culmination. Please read Volume 3 of the Stock Market Timing series for more information. Below is the midpoint date, and in parentheses, the length of time containing the geocosmic signatures (known as a "cluster"). If the cluster is long (more than 15 days), there may be other possible reversals based on tighter geocosmic clusters within the greater cluster.

June 26-29* (Mercury retrograde)

July 6**

July 11* (midpoint of Mercury Rx when markets that did not reverse at the time of the retrograde +/- 2 trading days may do so now)

July 17-20* (This is the magnet for trend continuation and then reversal +/- 10 days)**

July 24-27 (Mercury direct)**

Aug 7-10*

Aug 14-17**

These periods are usually more important than the solar/lunar reversal zones. They are usually more accurate because they have a wider orb of time (+/- 3 trading days vs. +/- 1 trading day for solar/lunars). They will correspond more often with major, half-primary, or full primary cycles, whereas lunar reversals need only correspond to 2.5% reversals in stocks.

ABBREVIATIONS:

CRD = Geocosmic Critical Reversal Date

ATH = All-Time High

MA = Moving Average

PB = Primary cycle bottom

PT = Primary cycle top

MB = Major cycle bottom

MT = Major cycle top

TB = Trading cycle bottom

TT = Trading cycle top

GCQ: AUG Gold, by Wyatt Fellows and Ray Merriman.

Last week's close was another bullish trigger. The close was still below the Trend Indicator Point (TIP), but just barely, for the 11th week in a row, maintaining the trend run down. This is now getting quite extended, so we would look for a close back above the TIP in the next few weeks.

This week's trend indicator point is 4153.70. It will be upgraded to neutral with a close above here this week.

Weekly support is 4008.10-4034.20. A weekly close below this range is bearish. A trade below followed by a close back above is a bullish trigger.

Weekly resistance is 4210.40-4236.60. A weekly close above this range is bullish. A trade above followed by a close back below is a bearish trigger.

Bullish crossover zones remain in effect in the nearby contract at 3836.90-3843.20, 3557.70-3565.10, 3442.60-3454.90, 2950.50-2961.70, 2555.40-2556.00, 2356.77-2362.75, 2279.10-2298.65, 2114.67-2128.75, 2058.03-2059.75, 2039.97-2054.85, 1866.63-1901.55, 1893.50-1934.20, 1487.30-1496.30, 1363-1364, 1316.40-1324, 1296.30-1301, 1236.20-1239, 1132.20-1144.30, 1070.50-1078.10 and 1014.80-1018.10. These are all support areas. It closed below another one recently at **4690-4835.50**, so it remains a resistance zone.

The most recent bearish crossover zone formed at **4777.50-4941.90**. Gold closed above other zones previously at 1974.30-1980.15, 1906.85-1929.03, 1790.20-1800, 1489.90-1498.30, 1404.70-1418.20, 1316.30-1319.60, 1117.40-1126.80, so these are now support zones.

Primary cycles in Gold typically last 15-21 weeks and break down into two phases of 8-11-week half-primary cycles and/or three phases of 5-7-week major cycles.

Preferred primary cycle labeling: July 6 will begin the 15th week of the primary cycle, measured from the March 23 low of 4162.60 in the August contract (this labeling is shown on the Aug daily chart). The cycle has now turned bearish by taking out the March 23 low, but has now entered the time band for a bottom to occur anytime in the next 7 weeks.

My bias for this labeling continues to be that June 17 was a major cycle crest, and Gold is now in the 4th week of the final major cycle due to bottom in 2-4 weeks. However, as this is the final phase of the primary cycle, it may contract by a week. For this bias to continue to be valid, Gold would need to find a corrective top soon, perhaps in this July 6 CRD, and then fall below last week's 3955.40 low.

Alternate primary cycle labeling: July 6 could begin the 1st week of a new primary cycle, measured off the June 30 low. Repeating what was implied last week, the June 30 low is now a compelling bottom for a primary cycle for a few different reasons. First, it could have been either a contracted primary cycle in the 14th week of the preferred labeling, or a normal-length primary cycle that bottomed in the 21st week if measured from the February 2 low (shown on the daily nearby futures chart). Second, it occurred in the June 26-29 CRD period. And finally, last week's low was into a downside price target, and the low formed with bullish oscillator divergence as well as bullish intermarket divergence with Silver.

This labeling could become the preferred if Gold can start having consecutive daily closes above the 15-day moving average, and certainly if Gold trades above the June 17 high of 4403.60.

Price targets and technicals: As stated above, Gold dipped briefly to 3955.40 before rallying sharply to close out the week. The fact that this low occurred with bullish oscillator divergence between price and the CCI, stochastics, and the RSI, as well as forming a new weekly low while Silver remained above its June 26 low last week, is sending strong signals that Gold may have formed its primary cycle low. If this is confirmed, Gold could be set up for a nice bullish run in the next 2-5 weeks. The initial price target on the upside would be 4436.50 +/- 113.00.

If, on the other hand, this is just a correction to a trading cycle crest before Gold falls back below 3955.40, a routine corrective price target would be 4179.50 +/- 53.00. Gold reached 4208.30 on Friday's Globex market, but closed the week near the highs, which could be a bullish precursor.

Geocosmics: Gold made a low on June 30 which was well within the three-day trading orb of the June 26-29 CRD. This, along with other strong signals, is suggesting that this may have been a primary cycle low, and in fact my bias is starting to lean in that direction. However, Mercury turned retrograde one day before Gold made its low, so this is giving some pause here. Signals that occur when the trickster is retrograde are often not reliable.

On the bearish side, the low of last week occurred during heliocentric Mercury transiting Sagittarius, which negates the usually bullish pattern, as Gold fell below the low of the 0-5-day period (3976) before turning retrograde. Ray's studies show that Gold rises when heliocentric Mercury is in Sagittarius about 80% of the time, while declining 20% of the time (a primary low forms during heliocentric Mercury in Sagittarius, which occurs from June 25 to July 7). This could be that 20% type of pattern, which would support this being a new primary cycle if the 45-day moving average is exceeded.

Being that we have now entered the July 6 +/- 3 trading day CRD, Gold should soon give us a clue as to whether or not this rally is set to continue. A reversal back lower early this week would point to a more lasting bottom forming in the upcoming July 17-20 +/- 10 day CRD.

The solar/lunar dates below show more of an edge for lows forming this week.

Solar/Lunar Dates and Weighted Values for Gold

Note: The solar-lunar studies reflect Gold's correlations from 1975 through April 19, 2024, by MMTA graduate student Yating Hu. These will be updated at the end of December. We now give values for full reversal, highs, and lows. These values are based on the history of Sun/Moon positions at 11:00 AM Greenwich (or 6:00 AM Eastern) and their correlation to 3% or greater reversals from isolated highs or lows projected during these days. These are the same values given in the MMA App and will be updated every year.

Note that we now consider any moon sign change within 4 hours of 11:00 AM GMT to be in an orb of influence for two dates for two data sets.

Also, note that we anticipate updating these values by the end of this month.

* Represents a strong reversal possibility. The more *, the stronger it is. # represents a low likelihood of a reversal: the more #, the less likely a reversal or big range day.

The solar-lunar cycles for Gold for the next few days are given below. If it states, "often a high" or "often a low," it means that a high or a low has occurred about twice as often as a high or a low in the past. However, if the value has an asterisk next to it, it should be looked upon more as a reversal, whether historically it has been more often a high or a low.

	Total WV	Highs	Lows	Big Range Day
July 2-3	81.3	86.4	76.8	130.1
July 4-6	81.3	21.6##	134.4**	117.1
July 7-8	99.5	148.0**	56.4	89.1
July 9-10	135.2**	110.5	157.1***	119.8
July 11-12	106.0	81.9	127.4*	61.6
July 13-14	127.9*	167.3***	92.9	88.1
July 15-16	114.4*	154.7***	78.6	79.8

July 17-18	62.4	66.3	58.9	113.1
July 19-21	75.4	0###	142.4**	82.7
July 22	75.5	80.2	71.3	102.6
July 23	122.9*	91.8	155.9***	107.0

Aug 5-6	81.8	31.8##	134.9**	87.7
Aug 7-8	101.7	89.8	114.4*	104.6
Aug 9-10	135.8**	158.2***	112.0	86.2

Strategy: Position traders are flat. Stand aside this week, with Mercury retrograde. We do not usually give position trading recommendations when Mercury is retrograde.

Aggressive traders were flat and advised, *"Let's go long at 3900.00 +/- 20.00, or go long if there is a case of intermarket bullish divergence between Gold and Silver, where one metal makes a new low this week but the other does not."* Got it, as there was bullish intermarket divergence to Silver. Exit 1/3 at current prices and 1/3 at 4300.00 +/- 15.00. Move the stop loss up to a daily close below 3955.00.

Very aggressive traders (VAG) were flat and advised, *"Let's go long at current prices or 4060.00 +/- 10.00, depending on your risk tolerance."* Got this too. Exit 1/3 at current prices and 1/3 at 4275.00 +/- 15.00. Move the stop loss up to a daily close below 3955.00.

GLD (the SPDR ETF for Gold) by Wyatt Fellows, MMA Analyst: Weekly support is 369.98-371.48. Resistance is 383.28-384.78. The weekly TIP is 380.39. A bearish crossover zone is in effect at 405.48-408.36. It's bearish as long as weekly prices stay below here.

Position traders are flat. Stand aside this week.

Aggressive traders are long. Exit 1/3 at 385.00 +/- 2.50. Keep the stop loss on a weekly close below 363.

Very Aggressive Traders (VAG) were flat and advised, *"Let's go long again at 370 +/- 2."* Got it. Exit 1/3 at 382.00 +/- 1.5 and another 1/3 at 395.50 +/- 1.50. Keep the stop loss on a daily close below 363.00.

SIU: September Silver by Pouyan Zolfagharnia, MMA Analyst: We are rolling to the September contract this week, which is 42 cents higher than the July contract.

Last week's close was neutral, with prices trading between the weekly support and resistance zones. The close was below the TIP for the 8th consecutive week, retaining the trend run down.

The TIP is now 6319. The trend will be upgraded to neutral if we close above the TIP next week.

Weekly support is 5814-5868.

Weekly resistance is 6366-6420.

Bullish crossover zones remain in effect at 5241-5348, 4404-4458, 3355-3441, 2904-2944, 2534-2622, 2347-2381, 2135-2169, 1961-1983.50, 1625-1626, 1486-1505, and 1096-1103. These are all support zones. Prices closed below prior bullish crossover zones and below resistance at 6952-7356, 9580-9657, 8951-8959, turning them into resistance zones.

Prices closed above the previous bearish crossover zone at 3257-3376, 2704-2755, 2484-2527, 1994-2028.50, 2319-2333, and 2396-2419, so these are now support.

Preferred primary cycle labeling: The primary cycle in Silver has a range of 13-21 weeks. Major cycle phases tend to form between weeks 4-7 in a three-phase cycle and weeks 7-11 in a two-phase cycle.

My bias is that the new primary cycle may have formed on June 26 at 5570 (5613 in Sept). This low was bang on the June 26-29 CRD, and in the 13th week of the primary cycle. Prices tested the lower boundary of the bearish price channel and held. The low was also accompanied by intermarket bullish divergence to Gold, which made a new low, and a powerful bullish oscillator divergence in the CCI. A primary cycle low having formed is further being supported by the fact that Gold fell to a new low last week, but Silver did not, for a case of bullish intermarket divergence.

Therefore, we are commencing the 2nd week of a new primary cycle. For confirmation that the low is in, I would like to see prices rally and close above the 14-day MA and test the 43-day MA. This has not happened yet, and we are on the July 6 CRD as we test the 14-day MA, which may reject prices.

Alternate primary cycle labeling: It is possible that we are commencing week 15 of the primary cycle that last bottomed on March 23. We are commencing week 4 of the final major cycle, measured off the June 11 low, which is due to bottom over the next four weeks. Under this scenario, we would have to take out the low of June 26 at 5570 (5613 in Sept).

Geocosmics: As noted last week, "The June 26-29 CRD lasts through Thursday of this week, however, and then we will be in the orb of the July 6 CRD. We can't rule out a brief rally here and then another decline into a bottom." As we test the 14-day MA, this may be a good juncture to cover some profits.

Interesting that Silver is following the usual pattern of heliocentric Mercury in Sag, but Gold broke that pattern. Now we see if Gold is the leader or Silver at this stage. If Gold, both are coming down. If Silver, both are going up. Gold is usually the leader except in the last phase of a long-term bullish cycle, when Silver takes over.

Technicals and Price Targets: If the low has formed, we should see a rally back up to 7290 +/- 406, although the ascending trendline that was broken in early June may act as resistance, as it did with the third major cycle crest of June 17, when we retested the trendline after it broke as support.

Longer-term, keep in mind that the 5000 area served as major resistance for over 40 years. Once broken, former resistance becomes support. If Silver breaks to a new cycle low here, look for support around 5000.

Solar/Lunar Dates and Weighted Values for Silver

These solar-lunar studies (after updating Silver correlations from 1998 through April 19, 2024) were conducted by MMTA graduate student Yating Hu. We will now give values for full reversal, as well as Highs and Lows. These values are based on the history of Sun/Moon positions at 11:00 AM Greenwich (or 6:00 AM Eastern) and their correlation to 4% or greater reversals from isolated highs or lows projected during these days.

* Represents a strong reversal possibility. The more * the stronger it is. # represents a low likelihood of a reversal. The more #, the less likely a reversal or big range day.

The solar-lunar cycles for Silver for the next few days are given below. If it states, "often a high" or "often a low," it means that a high or a low has occurred about twice as often as a high or a low in the past. However, if the value has an asterisk next to it, it should be looked upon more as a reversal, whether historically it has been more often a high or a low.

	Total WV	Highs	Lows	Big Range Day
Jul 6-8	51.1##	56.3##	46.9###	101.0
Jul 8-10	127.3*	62.2#	181.5***	88.6
Jul 10-12	119.7	146.3**	97.5	97.8
Jul 12-14	62.7##	82.8	46.0###	102.5
Jul 14-17	162.5***	130.0*	189.6***	108.7
Jul 17-19	122.1*	208.9***	49.7###	96.1
Jul 19-21	61.8##	34.0###	85.0	88.5
Jul 21-22	66.5##	58.5##	73.1#	108.7
Jul 22-24	108.6	104.5	112.2	112.3
Jul 24-26	122.8*	144.9**	103.8	100.7

Strategy: Position traders are long with a stop-loss below 5350. Since Mercury is retrograde, let's cover some profits faster than normal. Cover 1/3 at current prices and 1/3 at 6800 +/- 50 if offered.

Aggressive traders were stopped out of the short trade but should now be long as last week advised, "If the short is stopped out, go long with a stop-loss below 5700." Look to cover 2/3 at 6800 +/- 50.

Very aggressive traders are long with a stop-loss below 5400. Bring the stop-loss up to 5569. Cover 1/3 at current prices and another 1/3 at 6415 +/- 50 if offered.

SLV by Pouyan Zolfagharnia, MMA Analyst: Weekly support is 52.59-52.92. Weekly resistance is 56.79-57.12. The weekly TIP is 56.67.

Position traders are long with a stop-loss below 48.30. Bring the stop-loss up to 50.30. Cover 1/3 at current prices and another 1/3 at 56.79 +/- 0.50.

Aggressive traders were advised to “Go long at current prices or a re-test of 50.00 +/- 0.50 with a stop-loss below 48.00 for now.” If long, let’s cover 1/3 at current prices and another 1/3 at 56.70 +/- 0.50. Raise the stop-loss to 50.30.

Very aggressive traders are long with a stop-loss below 50.00. Cover 2/3 at current prices and the remainder at 56.70 +/- 0.50.

ANNOUNCEMENTS & EVENTS

ANNOUNCEMENTS

NOTE 1: THE JULY ISSUE OF THE [MMA MONTHLY CYCLES REPORT](#) WILL BE RELEASED THIS WEEK, JULY 7–8. This issue will be especially timely because it will cover the powerful Jupiter convergence taking place July 15–25, when Jupiter will sextile Uranus, trine Neptune, and form an opposition to Pluto, all during the first of five passages of the Uranus–Pluto trine that will continue into 2028. Will the U.S. stock market melt up to a new all-time high before beginning a powerful decline? Or will it continue breaking to new highs? Each issue includes our outlook for the U.S. stock market (DJIA and S&P), Gold, Silver, Copper, Treasuries, the Euro currency, Crude Oil, and Soybeans. The MMA Monthly Cycles Report also provides MMA’s original geocosmic CRDs and solar/lunar reversal dates over the next several weeks, as well as trading strategies for both position traders and aggressive short-term traders. If you would like to try a one-month subscription, you can sign up for the [July issue](#) for only \$35 — or save by ordering a three-report or twelve-report subscription.

Additionally, the monthly [MMA European Cycles Report](#), covering the DAX and SMI, and the [MMA Japan Cycles Report](#), covering the Nikkei stock index and the Dollar/Yen outlook, will be issued Tuesday–Wednesday, when these markets will also be at critical junctures.

NOTE 2: A SIX-WEEK SUMMER SCHOOL COURSE ON ESOTERIC ECONOMICS: THE HIDDEN ARCHITECTURE OF WEALTH, BY GIANNI DI POCE, WILL BEGIN ON SUNDAY, JULY 12. This immersive, six-week online course is the complete companion to *Esoteric Economics*, the financial astrology textbook by [Gianni Di Poce](#). The course touches on conventional economics, but it also reveals the deeper, often invisible currents that truly govern wealth: archetypal forces, temporal rhythms, capital flows, and the ancient principles that have shaped civilizations for millennia. The course blends rigorous historical and technical analysis with esoteric insight, practical tools, and visionary thinking. You will not simply study economics — you will be initiated into its hidden language and learn to navigate it with clarity, confidence, and creative power. The cost of this six-week course is \$300, and registration is now open! Click [here](#) to register.

NOTE 3: [THE ANNUAL MMA MID-YEAR MARKET WEBINAR](#) WITH MMA MARKET ANALYSTS WAS GREAT — AND RECORDINGS ARE NOW AVAILABLE. This year’s webinar was conducted in an interview format hosted by Raymond Merriman. The feedback from attendees was very positive, with many saying they loved the new interactive format in which Ray presented his views and then invited each analyst to share their outlook for the second half of 2026. The analysts and markets covered this year included NASDAQ (Wiebke Held), DJIA (Gianni Di Poce), Euro (Ulric Aspegren), Bitcoin (Ray Merriman), Silver and Crude Oil (Pouyan Zolfagharnia), and Gold and T-Notes (Wyatt Fellows). The webinar lasted just over three hours, with two five-minute breaks, yet no one seemed to get exhausted thanks to the lively exchanges. The recording costs \$66 (a super bargain for a workshop covering these markets), which includes the presentation slides. The markets discussed are still very relevant, and many of the setups described are indeed unfolding now! To order, [click here](#).

Here are three of the many positive responses to the new format and the content:

Today's webinar was fantastic. I loved the format. There's a lot of talent in MMA. I listen, learn, and make a lot of money using MMA's products. Your technical analysis schoolhouse mirrors what the CIA created 25 years ago for their analysts (Sherman Kent School for Intelligence Analysis). Students graduating from your program today will carry your legacy forward for the next 50 years.

— R.B., veteran trader

That is great feedback! I really enjoyed it too and learned a lot from the team.

— Pouyan Zolfagharnia, MMA Crude Oil and Silver analyst

I also noticed a great improvement, as we showed a unified team (including the same slide background) and more of a discussion rather than a presentation. I think it helped viewers acquire greater clarity through a more active process during the webinar, where you tightened up possible outcomes across many markets.

— Ulric Aspegren, MMA Euro analyst from the webinar

NOTE 4: COMING SOON: RAY MERRIMAN'S NEW BOOK, [JUPITER AND SATURN TRANSITS: MASTERING THE CYCLES OF LIFE](#). This is Book One, the first of five books that will be written on the outer planets transiting the natal chart over the next four years. Nothing like this has ever been done in the history of astrology. This first book, on the transits of Jupiter and Saturn, is approximately 425 pages long, covering all the major transits of Jupiter to one's natal planets and angles, including interpretations of the opening and closing sextile, square, and trine aspects. The Saturn section also includes the opening and closing semi-square and sesquiquadrate transits to all natal planets and angles, plus the "Business Cycle" of transiting Saturn. Each transiting aspect is ranked on a scale of -3 to +3 in terms of trading and investment potential, which alone is worth the price of the book.

Here are early reviews by two of the world's leading astrologers after receiving an early draft of this book:

Ray's Jupiter and Saturn Transits: Mastering the Cycles of Life is a fabulous, comprehensive guidebook rich with humanistic wisdom for astrologers. This book is amazing... exceptional in every way! Articulating the Saturn and Jupiter transits to natal planets and angles, Ray offers special emphasis on delineating the waxing and waning aspects. His house-by-house interpretation of these powerful astrological energies and influences brilliantly combines useful tips and insightful keywords. Ray also shares his valuable expertise in financial astrology by including the Financial Ranking for trading with the transits, which makes this book very special!

— Kathy Rose, renowned full-time consulting astrologer and curator of Rose Astrology, with over 40 years of professional practice

Jupiter and Saturn Transits: Mastering the Cycles of Life is a valuable reference guide from financial astrologer and analyst Raymond A. Merriman. This book covers the transits of Jupiter and Saturn to one's natal chart and applies them to financial trading or investing. Ray has once again dispensed his wisdom and decades of research experience in 400+ pages of a keepsake for this and future generations of astrologers.

The book begins with a personal story, perfectly setting the stage for Ray's analysis of how these two powerful influencers can affect one's life, and what opportunities or potential pitfalls in trading might also appear. Written in a clear reference style, it allows readers to go directly to the areas that are affecting them now. As the planets advance, check the latest updates, and then use the book the rest

of the time as an astrology textbook on synthesizing transiting planets, the most-requested area of astrology for consultations and readings.

For traders or investors, the inclusion of Ray's practical +3 to -3 "Ranking of Financial and Trading Potential" is worth the book alone, providing a quick scale to evaluate periods of potential opportunity or caution during a Jupiter or Saturn transit. No question, Ray has penned another classic. This book should be in any astrologer's collection, whether they are involved in the financial markets or not.

— Thomas Miller, prominent astrologer and host of the popular daily audio program, the *Fun Astrology with Thomas Miller* podcast

The book **JUPITER AND SATURN TRANSITS: MASTERING THE CYCLES OF LIFE** is due for release in mid-August. The list price is \$39.99. However, those who order now, prior to the actual printing of the book in mid-August, will receive the special pre-publication price of \$33.00 (plus postage for the printed edition; the eBook requires no postage). To order at the pre-publication price, click [here](#).

NOTE 5: THE [JUPITER REPORT: YOUR MOMENTS OF OPPORTUNITY](#)! The *Jupiter Report* is written by Raymond Merriman. It is a 30- to 40-page report that all traders (and even non-traders) will find highly valuable. It identifies the times during the year when Jupiter transits are highlighted in your natal chart and explains the meaning of Jupiter's transits to your natal planets and angles over a 14-month period (including one month before your order date and one month after the year ends). *As an added bonus, each transit is ranked on a scale from -3 to +3 in terms of favorability for trading. Traders may find this especially valuable!* Would you like to know if you are under a +3 transit and therefore most likely to experience trading success? Or a -3 transit, with a stronger-than-usual potential for misjudgments that can be costly? The price for a personal 14-month *Jupiter Report* based on your birth data is \$69.

Coming soon! *The Saturn Report: Mastering Your Life Cycles*. Due out in late summer or early fall.

NOTE 6: THE [MMA SOLAR-LUNAR APP](#) OFFERS REVERSAL SIGNALS FOR THE DJIA, NASDAQ, GOLD, AND SILVER. It is an ideal tool to have in your back pocket if you are a short-term swing trader looking for high-probability dates that identify isolated lows and highs in these markets. Please note that this should not be used as a standalone system. It works best as an adjunct tool when cycle lows or highs are due, when a market is in a technically overbought or oversold condition, or when it is exhibiting intermarket bullish or bearish divergence relative to a related market. The app is currently available only on Apple devices (iPhone and iPad). *HOWEVER, IT WILL SOON BE AVAILABLE BY SUBSCRIPTION ON THE NEW MMA WEBSITE TO EVERYONE, INCLUDING USERS OF ANDROID PHONES, AROUND JULY 4!* **To learn more about the MMA app, [click here](#).** To order on your iPhone, go to the Apple App Store and search for *Merriman Solar/Lunar Reversals*.

EVENTS

JULY 12, 2026: *Esoteric Economics* course begins with Gianni Di Poce. The six-week course costs \$300 and runs from July 12 to August 16. See above for further details. Click [here](#) to register.

SEPTEMBER 3, 2026: A UAC PRE-CONFERENCE WORKSHOP ON FINANCIAL ASTROLOGY BY RAYMOND MERRIMAN, 1:00–5:00 PM. This workshop will take place at the United Astrology Congress (UAC), the largest astrological conference in the world, which is held every four to eight years. More than 150 world-class astrologers will be presenting, and over 1500 attendees will be present. The conference will be held at the Marriott Downtown Chicago Magnificent Mile Hotel. In addition to the workshop, Ray will present another lecture during the six-day event on mundane astrology, titled "What Is Happening in the World

from an Astrological Viewpoint," on September 5. For more information, visit www.uacastrology.com.

Disclaimer and proper use of this information: Futures and options trading involve the risk of large losses as well as large gains.

Information is provided herein with sincere intent and according to MMA's original research studies and methodologies. These reports are provided mainly for "speculators." By its very nature, "speculation" means "willing to take the risk of loss." "Speculators" must be willing to accept the fact that they are going to have losing trades, many more than, say, "investors." That is why they are "speculators." The way "speculators" become profitable is not so much by a high percentage of winning trades but by controlling the amount of loss on any given trade, so the average trade on winners is considerably more than the average trade on losing trades.

MMA's comments, strategies, and data are provided as guidelines for traders each day and/or week. Comments and strategies are based upon intraday and intraweek highs, lows, and closes at the end of the day or week. Traders are advised to use these only as guidelines - and use intraday analysis to establish positions in the directions of comments given, so long as those support/resistance (entrance) areas. Looks favorable according to intraday analysis as well. Support and resistance are areas for day traders to look to buy and sell intraday. No guarantees are made for accuracy.

Support may represent favorable risk/reward places to buy if the trend is up. If prices trade below support, then have a close back above; it is considered a bullish "trigger" and oftentimes represents a good buy signal. Resistance may represent favorable risk/reward places to go short if the trend is down. If prices trade above it, then have a weekly close back below; it is considered a bearish "trigger" and oftentimes is a good sell signal.
