

Enough Food for You and Me

By

Sean A.

I have a garden to grow vegetables
My mother and I plant the seeds, water them, and watch them grow
My nice garden has tomatoes, carrots, peppers, asparagus, broccoli and corn,
and many more vegetables
More than enough for me and my family to eat

How about sharing with others, I thought
I'll share it with my neighbors
"yes please" they say, and "thank you"
I'll share it with my classmates
"I'll cook it with my parents" they say

My nice garden has enough vegetables to share
Water, sunlight, and love makes it grow
Kinda like me, at least that's what my mom says
