

## **Pollinators**

Growing a garden is hard enough  
But keeping it going is more than just tough  
Water it, feed it, keep it in sun  
Or else your garden's days are done  
But the most important things of all  
Are the bees, butterflies, even moths at nightfall  
And with those insects your garden will thrive  
With those pollinators your garden won't die  
Who knew that one bee, pollinating one flower,  
Could create a vast garden with so much power.

Name: Deanna Deecken

Address: 679 Garden St. Trumbull, CT 06611

Age: 9

Grade: 4

School: Homeschooled

Sponsor: Westport Garden Club (CT)
