

To set up your phone number for authenticating your identity, you will select “I want to set up a different method.”

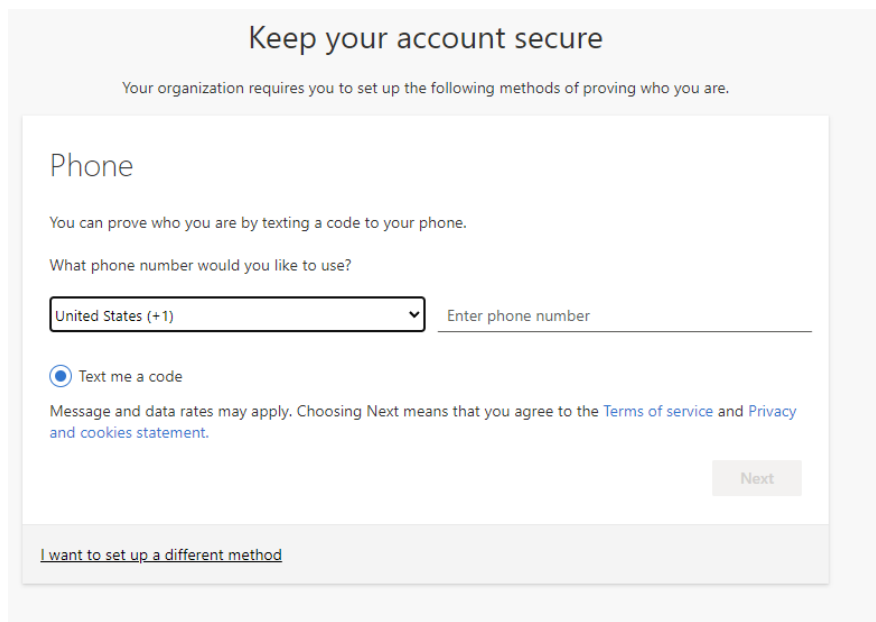

The screenshot shows a window titled "Keep your account secure" with a subtitle "Your organization requires you to set up the following methods of proving who you are." Inside, the "Microsoft Authenticator" section features a blue shield icon and the text "Start by getting the app". It provides instructions to download the app and choose "Next". A link "I want to use a different authenticator app" is present. At the bottom right is a blue "Next" button, and at the bottom left is a link "I want to set up a different method".

Select “Phone” as the method, then select Confirm.

The dialog box is titled "Choose a different method" with a close button (X). It asks "Which method would you like to use?" and has a dropdown menu showing "Phone". Below the dropdown are "Cancel" and "Confirm" buttons.

Type in your phone number, then select Next.

The screen is titled "Keep your account secure" with the subtitle "Your organization requires you to set up the following methods of proving who you are." The "Phone" section explains that a code will be texted to the user's phone and asks for the phone number. It includes a dropdown for the country (set to "United States (+1)") and a text input field for the number. A radio button is selected for "Text me a code". A disclaimer about message and data rates is shown, along with links to terms of service and privacy. A grey "Next" button is at the bottom right, and a link "I want to set up a different method" is at the bottom left.

Enter in the six-digit code, then select Next.

The screenshot shows a web interface titled "Keep your account secure" with a subtitle "Your organization requires you to set up the following methods of proving who you are." Below this is a white box labeled "Phone". Inside the box, it says "We just sent a 6 digit code to +1 [redacted] Enter the code below." There is a text input field with the placeholder "Enter code" and a "Resend code" link below it. At the bottom right of the box are "Back" and "Next" buttons. At the bottom left of the box is a link that says "I want to set up a different method".

Once verified, select Next

The screenshot shows the same "Keep your account secure" interface. The "Phone" box now displays a green checkmark icon and the text "SMS verified. Your phone was registered successfully." The "Next" button is now highlighted in blue.

then Done

The screenshot shows the "Keep your account secure" interface with a "Success!" heading. Below it, the text reads "Great job! You have successfully set up your security info. Choose 'Done' to continue signing in." Under the heading "Default sign-in method:", there is a phone icon, the word "Phone", and the number "+1 [redacted]". A blue "Done" button is located at the bottom right.
