

# » How to Open a Private/Incognito Window

## Step 1: Open a Private/Incognito Window

**Chrome:** Keyboard shortcut combination Ctrl-Shift-N (Windows) or Command-Shift-N (macOS) **OR** click on the menu on the upper right - the three vertical dots - and select New Incognito Window from the list.

**Edge:** Keyboard shortcut combination of Ctrl-Shift-N (Windows) or Command-Shift-N (macOS) opens an InPrivate window **OR** click on the menu at the upper right - three dots arranged horizontally - and choose New InPrivate Window from the menu.

**Firefox:** Keyboard shortcut combination of Ctrl-Shift-P (Windows) or Command-Shift-P (macOS) **OR** from the menu at the upper right of Firefox - three short horizontal lines - after selecting New private window.
