Experience the next evolution of your MAXI system. Upgrade to continuous-motion welding and discover how much more you can accomplish.

**46 Key**  
Magazine Capacity

*Includes a Sample of 20 Flat Keys*

### Work Smarter

Complete 2-5 more repairs per day while feeling fresher at closing time. The Speed Loader's continuous-motion design reduces repetitive hand movements and maintains consistent key placement for reliable welds and supreme repairs. Your technique stays sharp, your body stays comfortable, and your productivity soars, all without pushing harder or rushing quality. Every second counts when you are on the clock so make them count with the Speed Key Loader.

### Magazine Performance

The spring-loaded magazine holds your welding keys ready for instant deployment. Load multiple keys at the start of your repair, position the first key against your panel, trigger your MAXI to weld, then simply cycle the handle to advance the next key into position. No reaching, no repositioning, no interruption. It's the ultimate technician experience. Everything you need is already in your hand, letting you work with the precision and rhythm of a master craftsman operating at peak performance.

### Perfect Upgrade

Your MAXI system is already the industry standard for steel dent repair. The DF-503WKSL takes it to the next level. Engineered specifically for seamless integration with all MAXI Steel Dent Repair Station configurations, this upgrade enhances your proven system's capabilities without changing what makes it great. Better workflow, same trusted MAXI performance.
