

COVID-19 FAQs
March 8, 2022

Q: Does the Montebello Corporate office staff have to continue wearing masks indoors even though we are not patient- facing? Also, how long will we have to do the entry survey and temperature check if most COVID-19 guidelines in California are being lifted for those who are vaccinated?

From the COVID-19 Response Team

A: Yes, masks need to be worn at all sites, including non-patient facing sites at all times regardless of vaccination status. Screening will also continue upon entry. All safe environment measures are to continue. We will update the company if things change and you will be sure to be informed at that time. Please stay tuned to our email communications updates.
