

New FAQs – January 27, 2021

1. *Once you receive the vaccine, do we know if you can still be a carrier of COVID-19 and transmit it to others? Is there a lesser chance of transmission?*

From the COVID-19 Response Team:

We do not know if people that have received the vaccine are still able to transmit the Sars-CoV2 virus to others. We still need to behave as we have been with physical distancing, universal mask wearing, washing hands and surfaces frequently and staying home if one is exposed or sick.

2. *Do you have any plans to provide vaccines to the family members of employees?*

From the COVID-19 Response Team:

We are closely following federal and state guidelines for vaccination priority. When more groups are added to the list to be vaccinated, AltaMed will share the information.
