

AH Then & Now – 80-86 Hawthorn

The photo above shows the site of what was an Aetna Parking lot for many years, and that near the end of that life was only really used to store snow during heavy storms. As home-ownership became increasingly important to Aetna, the property was deeded to NINA, and late last year work was begun on what is being called The Neo-Gothic Townhouses on Hawthorn

The two townhouses below are the first half of the project and will be completed and hopefully sold yet this year. Two more are being planned next door at 80 Hawthorn to be completed in 2021. All together NINA will have added five owner-occupied homes to the Hawthorn area that is bolstering more than 20 that have been added by Habitat for Humanity and CIL in the last decade.

Some of the material used in the construction of these homes has come from another AH nonprofit, Fresh Start Pallet Products. More on that in another article.
