

Bid Matching Services

By: Stephanie Prince, Procurement Technician

If you are a business owner looking for Government contracting opportunities, we offer a free Bid- Matching service that many do not know about. In an initial counseling session with one of our APAC Procurement Counselors, we will go over several different aspects of contracting and how it benefits not only your business but keeps federal money here in the state of Arkansas. Once we have gotten to know what your business offers in reference to goods and services, we will set up a free bid matching service for you.

Bid matching is taking key descriptive words that you have given us about your business and plugging them into our online search data base, which generates federal, state and local government opportunities that match your specific business qualifications. Once a match is found, an alert is sent to you via email for every day there are funding opportunities available to you. You may then review solicitations for funding opportunities all with a few clicks of your mouse that are tailored to your specific business products or services.

Contact the Arkansas Procurement Assistance Center today for more information on bid matching as well as for all of your Federal Contracting needs, at 501-671-2390 or email us at APAC@uaex.edu.
