

Sun God Medicinals: Herbal Infused Blunt Toolkit

The Artisan Comeback | Southern Oregon Bioregional Herbalism

The "Elevator Pitch" (How to sell it in 15 seconds):

“ Unlike standard infused blunts that are infused with THC distillate, Sun God Medicinals uses Whole-Plant Herbalism. They blend premium flower, kief, and live rosin with actual medicinal herbs for a smoother, functional high that you can see, smell, and feel. It’s a craft smoking ritual, not just a potency play. ”

Product Breakdown: Which one is for them?

Product	The "Vibe"	Key Herbs	Cannabis Type	Best For...
HYPNOS	Nightcap	Skullcap, Lemon Balm	Indica	Deep sleep, unwinding after a high-stress day, and body relaxation.
HEKA	Visionary	Damiana, Motherwort	Sativa	Creative projects, meditation, "Daytime Vision Quests," and enhanced dreaming.
PANACEA	Balance	Chamomile, Rose Petals	Hybrid	Life's transitions, finding balance, social anxiety, or "centering" the mind.

3 Fast Facts for Budtenders:

1. **The Best of the Best:** This is a "Southern Oregon All-Star" passionately produced using high-quality, organically grown cannabis via regenerative farms from Southern Oregon.
2. **No Synthetic Terpenes:** The flavor and aroma come entirely from the organic herbs and cannabis, never from bottled botanical terpenes.
3. **The Visual Hook:** Point out the hand-coated herbal exterior. It’s a beautiful, even, slow-burning smoke, rolled in an all-natural hemp wrap.

! Pro-Tip for Handling "Potency" Questions: "What's the THC percentage?"

Answer: "These are designed for the Entourage Effect. While the THC is high because of the live rosin and kief, the medicinal herbs are there to 'steer' the high. Instead of relying on THC alone like a distillate product, the combination of whole-plant cannabis and complementary herbs creates a more balanced, nuanced effect, so customers often find the experience feels fuller than THC percentage alone would suggest."

If They Still Want a Straight Potency Comparison:

"Think of it like tuning a sound system... the cannabinoids, terpenes, and herbs are working together to shape how the high feels, not just how loud it is."
