

Bright beginnings build a brighter world.

Celebrate Babies Partnership

Our Most Precious Resource

Investing in babies is our greatest opportunity to create a brighter, healthier future for our entire community.

Investing in the well-being of babies and young children is an investment in our collective future. The first years of a child's life are critical for brain development, emotional growth, and the establishment of a foundation for lifelong health and success.

By ensuring that babies receive proper nutrition, medical care, and a nurturing environment, we set the stage for them to become healthy, educated, and productive members of society. Early interventions can prevent a host of problems later in life, reducing the need for more costly care.

Supporting the well-being of babies not only changes individual lives but also strengthens communities and economies, creating a brighter, more stable future for all. Investing in babies is not just a moral imperative, it is a smart, impactful choice with enduring benefits for generations to come.

October 22, 2024

Nadine Burke Harris, MD

Founder of the Understanding ACEs Movement!

A call to action to prevent and heal childhood adversity and trauma.

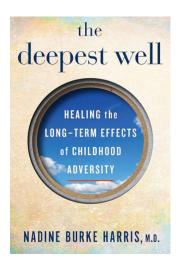

Dr. Burke Harris is the founder of the Center for Youth Wellness in San Francisco, an organization dedicated to improving the health of children exposed to ACEs. Dr. Burke Harris also served as California's first Surgeon General, focusing on addressing the root causes of health disparities and promoting early interventions for childhood trauma.

Her influential book, "The Deepest Well: Healing the Long-Term Effects of Childhood Adversity," has brought widespread attention to the impact of early adversity on long-term health and well-being.

Exclusive Discussion!

This exclusive, hybrid in-person (by invitation-only) and virtual event (open to all) will be hosted by Kathy Leone at The Breakers.

Live, In-Person and Virtual Event!

Dr. Nadine Burke Harris was already known as a crusading physician delivering targeted care to vulnerable children. But it was Diego — a boy who had stopped growing after a sexual assault — who galvanized her journey to uncover the connections between toxic stress and lifelong illnesses.

Dr. Burke Harris's research shows just how deeply our bodies can be imprinted by ACEs —adverse childhood experiences like abuse, neglect, parental addiction, mental illness, and divorce.

Childhood adversity changes our biological systems, and lasts a lifetime. For anyone who has faced a difficult childhood, or who cares about the millions of children who do, the fascinating scientific insight and innovative, acclaimed health interventions in The Deepest Well represent vitally important hope for preventing lifelong illness for those we love and for generations to come.

"It could be a dad hugging and listening. The buffer is hugely important, not just to attenuate the stress hormones but also to prevent the kind of epigenetic changes that lead to a dysregulated stress response and the major health issues that come with it."
