Single Source

Coatings • Contracting • Consulting

Innovative Industrial Coatings is a unique company devoted to providing turn-key solutions for today's industrial marketplace. From initial project consultation to superb installation support, you can be assured Innovative Industrial coatings will provide the highest level of expertise with each project.

IIC offers a wide range of floor products designed to meet the most stringent demands of various industries. These products, combined with years of knowledge, consulting and contracting experience, are the cornerstone of what brings IIC to the table everyday – on every project.

IIC offers complete flooring solutions for the heavy manufacturing, commercial, food and beverage, pharmaceutical and biotech markets, with a keen focus toward ESD control, ignition control and anti-microbial solutions for today's high-tech industries.

Safety Striping

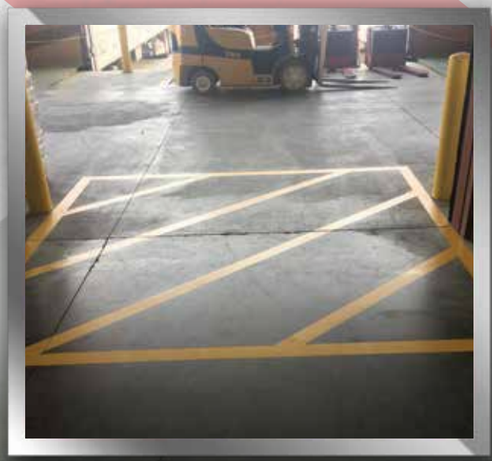

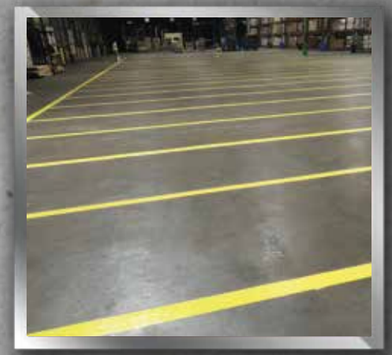

Primary Applications:

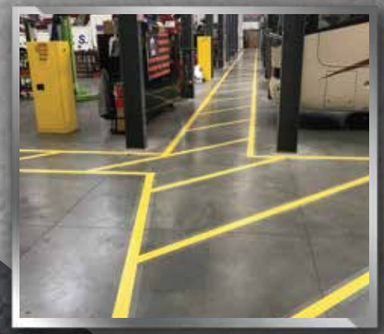

• Epoxy Floor Striping
• Directional Arrows, Signage
• Floor Tape Striping
•External Striping (Parking Lots, Docks)

Key Advantages:

• Fast Cure Time (Reduces Downtime)
• Keeps Facility Safe and Organized
• Durable
• Meets OSHA Guidelines
• Available In Many Colors

Decorative Concrete for Retail

The Innovative team has been installing decorative concrete flooring in retail locations for over 20 years. We work primarily with corporate clients and have installed flooring in over 1000 retail locations nationwide.

Concrete Polishing

Polished concrete's superior durability and performance have made it a top finish for retail stores. These smooth, high-luster floors imitate the look of polished stone. Polished concrete floors are very economical. Unlike many other floor surface materials, a polished concrete floor can last up to ten years or longer before it needs to be refinished. Maintenance on a polished floor is also minimal, thereby reducing costs associated with keeping floors clean, durable, and traffic-friendly.

Custom Design

We can match existing flooring or custom design a floor to meet your needs. We can repair badly damaged concrete slabs and install an overlay to make it new again. We employ a myriad of proprietary techniques that have come from years of experience to insure that every floor is unique to your store. We use stains, dyes, custom colored overlays, epoxy and polyurethane sealers in gloss or satin sheen. All of our products are formulated for use in public locations so odor is never an issue.

We Deal with the Moisture

Our flooring systems take moisture issues into account. Every system that we install includes a moisture vapor transmission reduction system or allows moisture to migrate through without harming the floor.

A Coat above the rest!

Performance Flooring - *Floor and Wall Systems*

Innovative Industrial Coatings engineers floor and wall systems for environments with multiple degradation factors. Designed to withstand severe thermal shock, chemical attack and forklift abuse. These systems also incorporate multiple levels of skid resistance.

It's in the Fiber

When it comes to coating walls and ceilings we have many alternatives. A good option for hard to clean areas such as ceilings is an anti-microbial coating. If thermal shock is an issue adding fiber into epoxy wall coatings is similar to putting rebar into concrete. It radically increases the strength while tightening the crosslink which improves chemical resistance. The result is a highly chemical resistant surface that withstands frequent high pressure wash downs with no seams to caulk.

Seamless Wall to Floor Transition

We custom design a floor coating system for your environment. They can range from 1/16" thick up to several inches if slope to drain or fill is required. For high impact situations trowel applied epoxy works well with a compressive strength that exceeds 10,000 PSI. In wet environments that are subject to thermal shock Polyurethane Cement is our most common recommendation. It can handle wash down temperatures that exceed 220 degrees Fahrenheit. Floors and walls can be tied together in a seamless transition through the use of an integral covebase. Skid resistance can be added to any of the floors that we install.

IICI is a dedicated full service contractor

The right product for the job

IICI installs products made by only the leading material manufacturers and will specify the right product for your job. We are part of an elite group of Master Contractors that install Ucrete, the inventor and longest standing manufacturer of Polyurethane Cement Flooring.

Trained and Experienced Installers

Our specialized crews resurface concrete tanks as well as install FDA approved interior lining systems. Each crew is trained for a different facet of the industry. Whether your need is polyurethane cement flooring, decorative concrete, polishing or abrasive blasting and coating of concrete or steel we've got you covered.

Perfect For:

TANK LININGS • INDUSTRIAL PAINTING
ABRASIVE BLASTING • POLYURETHANE CEMENT FLOORING
SECONDARY CONTAINMENT • CONCRETE STAINING AND OVERLAYS
CONCRETE POLISHING

Services Provided:

Seamless Floor and Wall Systems • Fiber Reinforced Wall Systems • Industrial Flooring
Decorative Flooring • Concrete Restoration • Industrial Painting
Polished Concrete • Install, Coat & Repair Trench Drains
Joint & Crack Repair • Safety Striping • Parking Lot Striping
Moisture Mitigation Systems & Testing • Overlays

Features & Specifications:

Thermal Resistance up to 240°F • USDA Approved
ISO 9002 Approved • 150 Types of Chemical Resistance
Wear & Crack Resistant • Fast Installation
Easy to Clean • Anti-Static
