HIGHLIGHTS

CAHS Connects with Future Leaders of the Industry

We were recently chosen to participate in the 2-day HCISD Construction Summer Camp. We took this opportunity to showcase our Scanning and Modeling Technology, which introduced the students to new career paths within our industry. Community involvement through programs like this allows us to prepare the industry and our business for the future. In addition, from similar activities, we hired two summer interns. **Michael Young:** Comes to us from UT El Paso, majoring in Business Management with a minor in Marketing. Mr. Young is new to the industry and has quickly realized that he loves the excitement and challenges and has already expressed interest in returning upon graduation. **Corvin Jonas:** Comes to CAHS from SHSU. He will graduate in 2025 with a degree in Criminal Justice. Mr. Jonas has worked in the industry previously as a welder with a structure company. Although Mr. Jonas will return to Houston this fall to continue his degree, he has told us that this internship helped him realize what career path he wants to take: HVAC!

Climate Solutions Moves to a New Facility

Climate Solutions recently moved to a 6,000 SF warehouse/office building situated in the Pflugerville Industrial Center. The property consists of office and warehouse space with two grade-level doors. This new space will allow us to continue to grow our operation and better serve the Austin market.

600 E. Las Colinas Phase Two

We recently completed the removal of two of three Trane CVHE Chillers and the installation of two York YK Chillers. Thanks, in-house, to Clay Allison, Andy Capehart, and Chad Roper for making this project successful from the service to the project side.

City of Plano Event Center

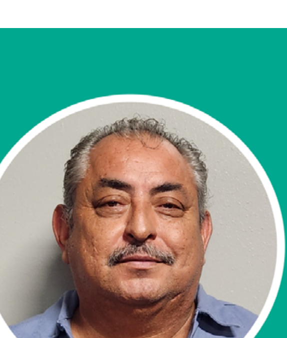
The Plano Event Center Project consisted of the replacement of (14) condenser self-contained water source heat pumps, along with exhaust and supply fans serving the building. This project was a scheduling challenge as the Event Center continued to hold its scheduled events in the venue to continue generating its revenue expectations.

FEEDBACK

What would you like to see in next quarter's newsletter?

SUBMIT YOUR INPUT

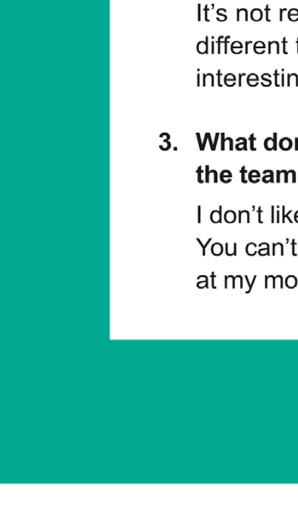
TEAM



Meet Mario
from CAHS

Mario Valadez
Fabrication Foreman

1. **How would you summarize what you do?**
   My responsibility at the company is overseeing sheet metal production. I motivate and help my team to produce and complete jobs, prioritizing quality and efficiency. This has caused the company to have trust in my department.
2. **Tell us a few details about the favorite part of your job?**
   I have more than 20 years of manufacturing duct. I like what I do. My favorite part is teaching and training new people, but it fills me with satisfaction to deliver the required product on time and with quality.
3. **What don't people know about you that you would like the team to know?**
   I am a person who has fought to be where he is with dedication and responsibility to be a better person and a good worker, and to get ahead, always trying to learn as much as possible.



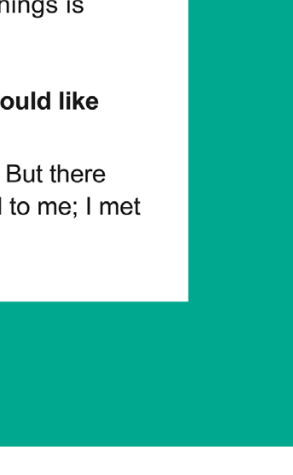
Meet Jorge
from Climate Solutions

Jorge Fructuoso
Service Technician

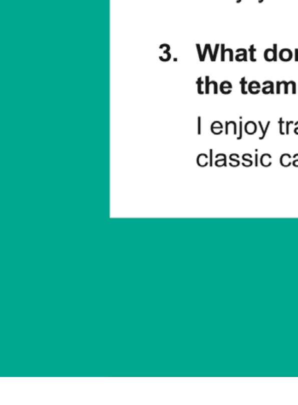
1. **How would you summarize what you do?**
   I am a Service Technician. I honestly do whatever is asked of me. We work with a lot of different equipment. I might start my day starting on a drinking fountain, then move on to a split system and end the day working on a cooler. I also might work on a vehicle, run supplies – whatever they ask me to do.
2. **Tell us a few details about the favorite part of your job.**
   It's not repetitive. I really like that. The variety and the different types of equipment I work on makes this job interesting.
3. **What don't people know about you that you would like the team to know?**
   I don't like Tex Mex food. The world needs to know that. You can't find good authentic Mexican food in Texas, except at my mom's house.

Meet Jose
from Evolution Mechanical

Jose Alonzo
Service Technician



1. **How would you summarize what you do?**
   I am a Service Technician for Evolution. I service multiple types of air conditioning equipment. I try to do my best on each job to make sure the customer is happy, that Evolution is happy, and to make sure that I am happy with the work I do.
2. **Tell us a few details about the favorite part of your job?**
   I get to go to multiple places. It is never the same; always different. Constantly learning and seeing new things is probably the best part of my job.
3. **What don't people know about you that you would like the team to know?**
   I'm pretty open; most know everything about me. But there was one thing that was interesting that happened to me; I met Mark Cuban at the Adolphus Hotel.



Meet Patrick
from Infinity

Patrick Dougherty
Assistant Project Manager

1. **How would you summarize what you do?**
   In my new role as Assistant Project Manager, I am still expediting projects in the field as well as assisting Project Managers with planning and monitoring.
2. **Tell us a few details about the favorite part of your job.**
   I enjoy the finished work and watching a job materialize.
3. **What don't people know about you that you would like the team to know?**
   I enjoy traveling with my wife and collecting and restoring classic cars in my free time.

OPEN POSITIONS

Introducing
TIM CLEMENTE
Director of Enterprise Safety

Safety is our top priority! We've added Tim Clemente, Director of Enterprise Safety, to the Modigent team to ensure all operating companies in the Modigent family have the resources needed to maintain a safe work environment.

Tim will be responsible for providing leadership for all enterprise-wide environmental, health, and safety ("EHS") activities and strategies focused on enabling Modigent to move "All Ways Forward" safely. Tim will work closely with Regional and Operating Company (OpCo) leadership teams to develop and execute safety initiatives for their market locations. Tim will also serve as a safety resource for our OpCos by providing advice and consultation on EHS matters to support their operational needs.

Tim joins us from McKinney, Texas. His extensive background in overseeing all EHS programs, including both employee and fleet safety and compliance with applicable regulatory standards, as well as his 15 years of commercial nuclear power plant operations and maintenance experience, make him a great fit for this role.

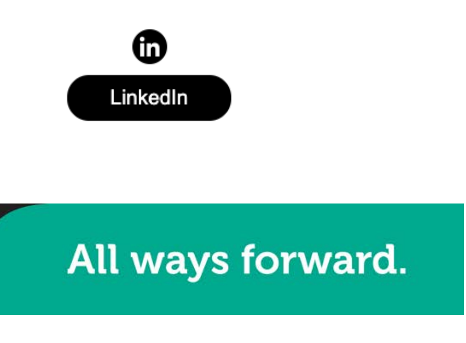
"I believe in servant leadership and doing the right thing. My foundation and connection with Safety is built on strong values: integrity, fairness, and devotion to service."

– Tim Clemente

Please join us in welcoming Tim to the team!

Follow and engage with MODIGENT on social media for a chance to win a

$50 Amazon Gift Card!



Each follow, share, comment, and "like" gets you an entry ticket into the drawing.
