Subject: ICPHSO–PSL Collaboration: Product Safety News and Information

Dear ICPHSO Members and Friends,

ICPHSO is pleased to provide you with the second of six issues in the **six-month pilot collaboration with Product Safety Letter (PSL)**.

Product Safety Letter is an independent weekly publication for executives and professionals concerned with consumer product safety. PSL provides timely coverage of the latest product safety developments, including news and regulatory activity from the **U.S. Consumer Product Safety Commission (CPSC), European Union, and other product safety authorities around the world.**

As part of this pilot collaboration:

- **Issues 1 and 2 (September and October):** Everyone on the ICPHSO mailing list, **members and non-members**, will receive a PSL edition. The two editions will be selected jointly by ICPHSO and PSL.
- **Following those first two editions:** ICPHSO **members** will receive four additional selected PSL editions during the remainder of the six-month pilot.
- **Members interested in full access:** During the pilot, PSL will offer ICPHSO members a **discounted rate on a full PSL subscription**, including new subscriptions and renewals at a discounted rate.

We encourage you to take advantage of this opportunity to see firsthand the type of timely product safety information PSL provides. If you find the coverage valuable, ICPHSO members can take advantage of the special discounted subscription rate for continued full access.

PRODUCT SAFETY LETTER

An independent weekly for executives concerned with consumer product regulations, legislation and standards. Founded in 1972.

Vol. 55, No. 39 October 19, 2026

In This Issue

Forced Recalls: Amazon cites Leachco case ..... **Page 1**

Hidden Hazards: Lorenze lauds expanded data ... **Page 1**

Nursery Items: Highchairs top injuries list..... **Page 1**

House Fires: CPSC report covers 2021-2023 ..... **Page 1**

Pedal Bikes: Australia asks about updating rules ... **Page 1**

Needles: OPSS raises alarm about amusement..... **Page 1**

Amazon Adds Leachco Case to Its Arguments in Forced Recall Suit

Amazon raised last year's resolution of the Leachco forced-recall case as evidence against CPSC in the platform's own forced-recall case. The company told the Maryland U.S. district

see **Amazon**, p. 2

Lorenze Connects Expanding Data and Targeting Hidden Hazards

CPSC Commissioner Brien Lorenze October 8 linked the task of addressing hidden hazards to expanding the agency's data. This came in remarks (bit.ly/4zprBPk) to the Business

see **Data**, p. 2

Highchairs Appear Most among Nursery Product Injuries in 2025

Highchairs topped injuries in 2025 linked to nursery products and among children under 5. The chairs accounted for about 16,600 of the estimated 71,000 injuries for all nursery items, according to CPSC's report available October 13. Others were cribs/mattresses [11,000], strollers/carriages [9,500], carriers excepting motor vehicle incidents [8,000], changing tables [5,200], walkers/jumpers/exercisers [4,600], playpens/play yards [3,400], bouncer seats [3,100], gates/barriers [3,100], bassinets/cradles [1,700], and portable swings [1,500].

Another estimated 2,100 injuries involved a combination of pacifiers/teething rings, diapers (excluding rash), potty chairs/training seats, harnesses, nightlights, and rattles.

The full estimate of 71,100 injuries compared to 70,000 in 2024 and 65,000 in 2023. The rises were not statistically significant, wrote CPSC (bit.ly/47Fzjcp), which made the same

see **Nursery**, p. 3

CPSC Parses Residential Fires Occurring in 2021-2023

There was an estimated annual average of 350,700 residential fires attended by fire services during 2021-2023, according to CPSC's report issued October 13. The blazes resulted

see **Fire**, p. 3

Australia Seeks Feedback on Updating Pedal Bike Rules

Comment by November 12 on an Australian inquiry about updating requirements for pedal bikes. The activity is a follow-up to an inquiry a year ago (*PSL*, 10/20/25) about considering

see **Bikes**, p. 3

OPSS Acts against Amusements with Sharp Needles Included

Intentionally included sharp needles and syringes led the U.K. Office for Product Safety and Standards (OPSS) October 9 to warn against using "pimple popping" squishies. It also said (bit.ly/47lF12W) it "launched an urgent investigation" and told e-commerce platforms to stop listing such products and to warn consumers. It advised consumers to put needles in puncture-resistant containers and to contact local authorities about safe disposal.

It issued product safety reports (bit.ly/47VXSle) for seven listings on Alibaba, eight on AliExpress, six on Amazon, four on eBay, one on Fruugo, four on OnBuy, and one on Wish.

The purpose of the needles and syringes is to create bubbles on the surfaces of the items and/or to inject substances. Then users squeeze or pop the bubbles. OPSS rejects the attempt to categorize the products for "adult stress," asserting that they fit the definition of toys.

Amazon from page 1

court that the Leachco case suggests CPSC is acting arbitrarily and capriciously in four ways:

- With Leachco, CPSC pointed to the long time since sales occurred to question the effectiveness of continuing, but with Amazon it seeks remedies for items sold years ago.
- With Leachco, CPSC acknowledged the difficulty of knowing about secondary sales or continued use, but with Amazon, it relies on "the hypothetical possibility" that such sales and use are putting consumers at risk.
- With Leachco, CPSC pointed to its own warning years ago about the products to question the safety benefits of additional notices, but with Amazon it seeks additional.
- With Leachco, CPSC cites the creation of new rules as addressing the risks but has not pursued requirements that would affect all platforms versus just Amazon.

CPSC rejected the arbitrary charge, saying that in Leachco it was exercising enforcement discretion with the aim of redeploying limited resources to "higher-impact enforcement efforts." It argued that there are three differences:

- CPSC ended Leachco after the regulations changed, but the Amazon case involves requirements already in place when the agency pursued the recalls.
- Leachco's sales spanned 14 years back to 2009 while the sales on Amazon spanned four years in 2018-2021. Also, the items sold on Amazon have longer usable lifespans.
- The administrative law judge in the initial stages of the Leachco case "declined to find a substantial product hazard," but Amazon does not dispute that hazards exist.

The Leachco case involved Podster infant cushions. With Amazon, CPSC targeted third-party sales of certain children's sleepwear, carbon monoxide detectors, and hairdryers sold via the Fulfillment by Amazon program. The platform sued in 2025 (*PSL*, 3/24/25) against a commission order that followed administrative law activity begun in 2021.

Data from page 1

and Institutional Furniture Manufacturers Association (BIFMA). He noted that CPSC has many good sources of data but suggested that areas for potential information improvements include e-commerce, supply chains, import data, among others. He emphasized:

> "And how can we responsibly combine those sources of information with our existing data to identify meaningful safety signals? Not to collect data simply because we can. The objective is to connect the right information to answer the right questions."

Those question, he said, involve speeding hazard identification, sorting "safety signals" from background noise, identifying where hazards are concentrated, and determining which products and companies need the most attention. He added, "And ultimately, can we intervene before someone gets hurt rather than after?"

Those points were the crux of the third of three principles he said he will use as guides to being a commissioner. The other two were to emphasize voluntary standards and to make decisions based on data and evidence.

CPSC-Administered Recalls

Product	Date[1]	Company	Reason	Units[2]	Incidents Reported	Sold	Price	Remedy/Action
Air Rifles: Blitz, Blitz 777	10/15/26	HatsanUSA	Inadvertent firing when releasing bolt	16,170	One misfire but no injuries	Feb 2020-Mar 2026	$800-$1,100	Trigger assembly replacements
Bedrails: Xalirium adult portable	10/15/26	usOpal	Entrapment in rails and between bed and rails	200	None	Feb 2026-Aug 2026	$60	Refunds
Bedside Sleepers: PAPA03001AI	10/15/26	Papablic	Mattress can become displaced	248	None	Apr 2025-Jul 2026	$190	Refunds
Coin Purses: 101 Dalmatians 2595301 faux leather	10/15/26	Primark	Phthalates levels	2,100	None	Mar 2026-Jun 2026	$9	Refunds
Cups: Crystal Glass Cups with various loose crystal chips between layers	10/15/26	Loving Thyself Rocks	Inner glass can break into drink	600	One but no injuries	Apr 2026-Sep 2026	$20-$50	Refunds
Laminators: Scotch TL1302Z	10/15/26	3M	Overheating	53,634	63 with five fires but no injuries	Jun 2024-Sep 2026	$44-$56	Refunds

[1] Dates in parentheses are original dates for reannouncements. [2] Numbers in parentheses are units in joint recalls with Health Canada (C) and/or Mexico's Profeco (M). (U) = unspecified

Bikes from page 1

recognition of elements of certain non-Australian standards as well as what to do about regulatory gaps involving warning devices like bells, left-to-rear and right-to-front handlebar brakes, specified color reflectors, and backward-pedal brakes on children's bikes.

The new inquiry asks (bit.ly/4ztdFnc) about new draft requirements (bit.ly/4s1TNFx) stemming from last year's input in which commentors favored:

- Updating references to the current Australian standard.
- Increasing compliance options via alternate standards.
- Specifying certain requirements to ensure consistency across the referenced standards.
- Allowing "dynamic referencing" to ease future transitions to updated requirements.

The Australian Competition & Consumer Commission emphasized that it is not asking about addition standards. The same four as last year would apply:

- AS/NZS 1927:2010, *Pedal Bicycles– Safety Requirements*.
- ISO 4210:2023, *Cycles – Safety Requirements for Bicycles, Parts 1-9* (not for young children's and BMX bikes).
- ISO 8098:2023, *Cycles – Safety Requirements for Bicycles for Young Children* (not for BMX bikes).
- EN 16054:2012, *BMX Bicycles – Safety Requirements and Test Methods* (not for competition BMX models).

Nursery from page 1

conclusion about 10-year changes during 2016-2025.

Meanwhile, the report also indicated that CPSC knows of 522 deaths during 2021-2023, an annual average of 174. Those compared to 543 in 2020-2022, or 181 annually.

The top product category in 2021-2023 was crib/mattress at 159, and the report emphasized that 67 involved "cluttered sleep environments." Other top categories included bassinets/cradles [130], playpens/play yards [97], in-bed sleepers [22], portable swings [20], carriers excepting motor vehicle incidents [16], baths/bath seats/bathinettes [15], toddler beds [9], bouncer seats [14], inclined sleep products [11], gates/barriers [4], rockers [4], strollers/carriages [4], portable youth bedrails [3], changing tables [2], and walkers/jumpers/exercisers [1].

The report highlighted that there were 27 deaths linked to inclined sleepers in 2019 and one in 2023. It pointed to its 2023 rules under the 2021 Safe Sleep for Babies Act.

Fires from page 1

in estimated averages of 2,480 deaths, 9,930 injuries, and $9.61 billion in property losses. By years, CPSC gave these estimates (bit.ly/47T3nRB):

- **2023**: 337,800 fires, 2,480 deaths, 9,720 injuries, and $10.50 billion in property damage.
- **2022**: 367,900 fires, 2,430 deaths, 9,470 injuries, and $10.16 billion in property damage.
- **2021**: 346,400 fires, 2,540 deaths, 10,610 injuries, and $8.21 billion in property damage.

Cooking equipment was involved in about 147,800 fires over the three years, including 10,100 electric ranges, 1,800 gas ranges, 2,800 other electric appliances, 1,200 other gas appliances, and 700 microwave ovens.

Heating and cooling equipment was linked to some 36,400 fires in the three years, including 14,200 fireplaces/chimneys, 4,800 local fixed heaters, 2,700 fans, 1,600 portable heaters, 1,500 air conditioning units, 1,200 water heaters, and 700 central heating devices.

By items first ignited or heat sources, top categories were cooking materials [144,600], trash/rubbish [34,200] electric cable insulation [19,700] cigarettes/other tobacco [10,600], mattress bedding [6,400], and wall covering [4,700].

As always, with this annual report, CPSC emphasized the potential for overlap. For example, a mattress fire lit by a candle would be counted under both categories.

Non-U.S. Recalls

Country	Product	Date	Company	Reason	Incidents Reported	Units	Sold	Remedy/Action
Australia	**Button Batteries**: Hicell CR and AG series, multiple SKUs	10/1526	New Oceal Australia	Warnings missing	(U)	(U)	Oct 2025-Oct 2026	Refunds

(U) = Unspecified in the notice.

BRIEFS

Fuel Additives: CPSC October 15 said it will remove the substances from flame-mitigation requirements as a burden cutting initiative under a January 2025 executive order. The agency projected $10.7 billion in economic savings over 30 years. In September 2025 (*PSL*, 10/6/25), a federal judge said CPSC's inclusion of additive containers under flame mitigation rules was an improperly broad application of the 2020 Portable Fuel Container Safety Act. The agency declined to appeal (*PSL*, 1/5/26).

Dressers: CPSC October 15 said to stop using Chalsea 4-drawer WF-CT03WH01 and WF-CT03BG01 units for tipping and entrapment violations. Henan Senka Trading of China has not agreed to an acceptable recall. No incidents are reported. They sold for $300 on Wayfair.com during Aug 2024-Apr 2026.

Highchairs: CPSC October 15 said to stop using Grow chairs that lack preassembled restraint systems. Bblüv Group has not agreed to an acceptable recall. No incidents are reported. Sales details are unspecified other than "third-party sellers" and "online."

Air Fryer Ovens: CPSC October 15 said to stop using Kalorik Maxx and Maxx Advance units because doors can unexpectedly close. CPSC knows of "dozens" of burns. Two original importers are out of business, and current brand-owner The Legacy Companies declined to recall. Sales occurred in Apr 2020-Jun 2025 on various online and physical sites for unspecified prices.

Pressure Cookers: CPSC October 15 said to stop using Power Quick Pot Y6D-36 units that can expel contents unexpectedly. Importer Tristar Products of Florida has refused to recall. CPSC knows of 24 burns. They sold online via Amazon, eBay, and Walmart in Jul 2018-Nov 2023 for $44-$160.
