

Fan\$aves How it Works

OUR CURRENT DEAL IS:

Write your deal in to the right.

What is FanSaves?

FanSaves is a digital couponing platform, accessible through mobile app and at www.fansaves.com.

Your deal is only redeemable to FanSaves followers of the organization you're affiliated with.

What is an In-Store Deal?

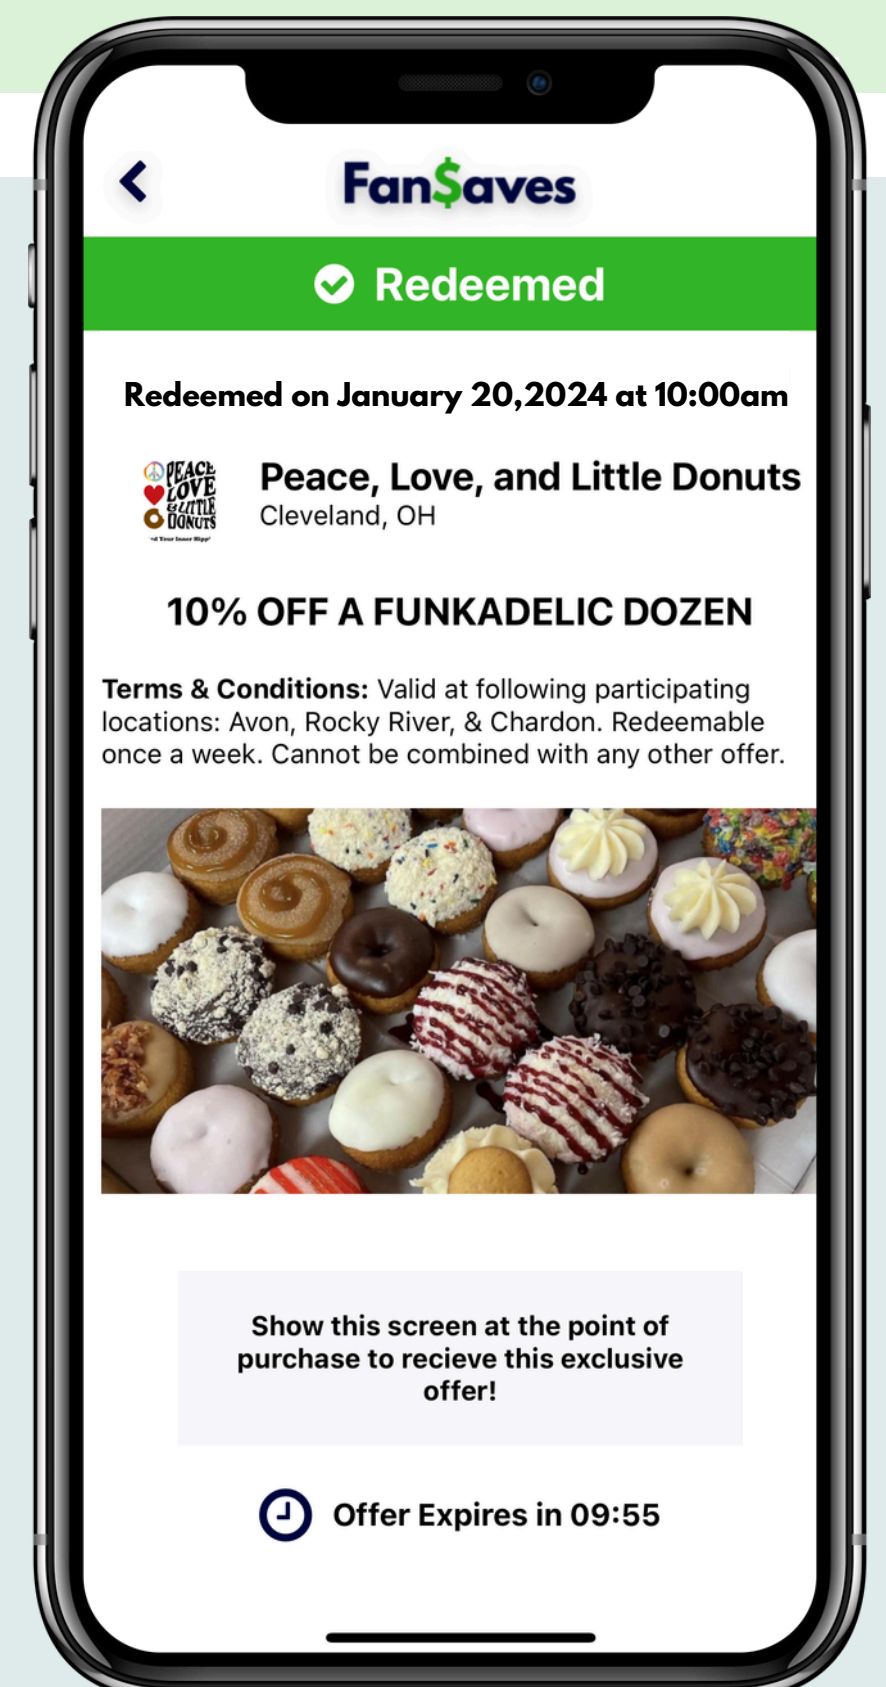

This is a deal or discount that can **only** be redeemed when someone is inside your businesses location, due to a 10 minute timer that is activated upon the user pressing the redeem button.

Each time someone redeems a deal, the time & date of redemption, along with customer demographics is tracked in a backend dashboard.

The REDEEM DEAL button must always be pressed.

How is a Deal Redeemed?

- User scrolls to the deal and presses REDEEM DEAL.
- A green line appears at the top that says DEAL REDEEMED
- The redeemed deal includes a time stamp. **Please ensure employees check this time stamp** to ensure user is redeeming it at the exact time and date they are in your store.
- A 10-minute timer is activated so the customer must show the employee the Redeemed Deal before the time runs out or it will expire.
- The employee then applies the discount through your own system. We suggest creating a FanSaves button in your POS system to ensure a quick and reliable discount is applied.
