THE EVENT

Please join the North Kingstown Chamber of Commerce for this event and become part of the growing number of companies seeking to supply the emerging Rhode Island and Northeast sector offshore wind industry with local equipment, supplies, and services.

A U. S. Department of Energy Analysis of Offshore Wind Farm development and job creation along the Northeast Coastal Corridor released in October, 2017 projected "In the low scenario, wind energy economic activity will translate to 160,000 baseline full-time equivalent job years over the lifetime of the wind farms, with a peak of 8,300 jobs in 2028."

Who should attend?

Small Businesses with capability in electrical services, civil & electrical engineering, heavy lift cranes, marine services including vessels and tugs, welding, concrete, diving and underwater construction, environmental studies, equipment operators, steel fabrication and suppliers, ocean soil testing and more will have an opportunity to learn about the **many offshore wind contracting opportunities.**

U.S. Job Creation in Offshore Wind Report, October 2017

Why should you attend?

- **Learn** about the Rhode Island wind energy sector curriculum development plan to create a pipeline of future industry workers and also providing credentials for incumbent workers in small businesses.
- **Understand** the broad range of materials, equipment, and services that offshore wind developers, turbine manufacturers, and major suppliers will require.
- **Learn** the procurement process in these large, multi-year construction projects.
- **Network** with wind industry government and private sector leaders to increase your knowledge and contacts with this emerging industry.
