

**Substance Abuse is a FAMILY Issue...**

**For individuals and families who are struggling to face and take control over substance abuse issues-**

**There is help available...**

The Town of Smithtown Horizons Counseling & Education Center offers many support services.

**The first step is an assessment.** The assessment process consists of a series of 2-3 appointments, geared toward the collection of information which will identify the individual's issues, needs, strengths, and service recommendations, if applicable. If the assessment shows that treatment is appropriate, an individualized service schedule will be developed and the process of healing and recovery can begin.

Initial screenings/phone consultations are free of charge. Moving forward, the cost of each assessment appointment is \$25, and insurance will be billed wherever possible in accordance with the terms of coverage. Counseling services are often covered by insurance, and sliding scale fees are also available. Every effort is made to make treatment services affordable for everyone.

**Horizons Counseling & Education Center is an OASAS licensed not-for-profit agency funded to provide...**

Adolescent, young adult & adult prevention, treatment, and Educational services for drug and alcohol related programs.
