

STATISTICS IN SCHOOLS Sweepstakes

MARCH 2-6, 2020

Your school could win \$500!

The 2020 census begins in March. It is critical we get ALL children counted so our communities and schools get their fair share of funding to serve children. The Statistics in Schools Sweepstakes is an incentive for teachers to raise student awareness of the importance of an accurate census count and is perfectly timed to turn students into census advocates within their household.

- Statistics in Schools materials are easy to use, teacher-designed, and aligned with education standards and guidelines
- Activities for all grade levels, including PreK, and ELL students
- Activities for math, English, history, geography, sociology and more
- Dozens of resources available, including videos, maps, and quick warm-up activities
