Olympic Climate Action Special Program

Rainwater Collection 101

with CJ Huxford, Northwest Rain Solutions

Monday, February 10, 6:30-8:00 p.m.

Via Zoom

(to receive the Zoom link, please register, see below)

A few weeks of winter rain on a small garden shed fills this 1,100-gallon tank. Photo by Janis Burger

CJ Huxford is owner of Northwest Rain Solutions, a Bellingham-based company with 16 years of experience doing rainwater harvesting and stormwater management in western Washington.

"People have been doing this for centuries," says Tim Pope, former president of the American Rainwater Catchment Systems Association, "and in places where stormwater is an issue, if you put it in a tank to store, it's not stormwater anymore, it's a resource."

This free presentation will last about an hour, with time for questions afterward.
