May 2025	Boone's excavating	Excavating	360) 452-9392	The former owners of our house planted many bushes and placed large rocks on the septic field. We needed to remove these because they were interfering with the septic system. Brian from Boone's excavating did a great job for us. He cleared off the landscaping and removed the mounds of dirt that had been added. Now we have a nice flat surface where we can plant grass that will not interfere with our septic system. Brian was able to work in a small area and not damage our other landscaping. He did the work quickly and we are totally satisfied with the results.	Serena (Seri) Mylchreest
