

fabricators, facilities, + foundries

So many works across all dimensions of contemporary sculpture owe their fruition to the collaborative efforts of art production companies. Fabricators, foundries, designers, engineers, conservators, installers, and art suppliers play an essential role in bringing artwork to life. Discover a selection of companies devoted to sculpture's key resources in the following pages. • The International Sculpture Center has been dedicated to facilitating collaborations and visibility for these institutions for over 60 years. Sculpture.org helps bring art into existence. Elevate your company's impact with an International Sculpture Center Membership—[join today at www.sculpture.org](https://www.sculpture.org).

Vector Custom Fabricating

Standing at over 60ft tall, *Wings* is one of the last works John Henry personally had a hand in before his passing, and the first monumental commission of his work to be completed posthumously. Vector Custom Fabricating is honored to have project managed and fabricated this significant artwork. Executed in corten steel and painted in the university signature purple, it stands outside the newly built Ashraf Islam Engineering Building at Tennessee Tech University, creating a focal centerpoint within the landscape that welcomes all visitors and passersby.

M

Monumental Labs

Founded in 2022, Monumental Labs has rapidly established itself as the premier fine art stone fabricator in North America. Their New York-based facility brings together master designers, fabricators, and carvers who work with artists to produce works in limestone, marble, and other select stones.

Our Expertise Includes:

- Figurative and abstract sculpture
- Monumental public art commissions
- Artist editions and multiples
- Stone elements for mixed-media installations
- Design objects
- Historic preservation

Our Process:

SCANNING & 3D DESIGN

Our digital artists transform drawings, physical models, 3D scans, and conceptual materials into precise 3D models ready for fabrication.

ROBOTIC MILLING

Utilizing state-of-the-art 7-axis CNC robots, we achieve tolerances within .5 mm of the specified surface geometry.

HAND CARVING & FINISHING

Our stone carvers, trained at sculpture academies and ateliers worldwide, bring each piece to its final form using both modern tools and time-honored techniques.

MAGNUM

C O M P A N I E S

Magnum Companies, Inc.

SOUTH SIDE GROVE

South Side Grove

DESIGNED BY: Hadad | Drugan

PROJECT DESCRIPTION: Corten Steel Trees aligned to reveal Solar Noon during the Equinox on a custom engraved granite table.

LOCATED IN: Flagstaff, Arizona.

MATERIALS USED: Corten Steel plate & pipe, cast aluminum, 3form acrylic.

HENKLE ILUME

Henkle Ilume

DESIGNED BY: Pinnacle Design

PROJECT DESCRIPTION: Decorative Panels styled in Modern Pointillism that displays a mountain range for the entrance of the Henkle Ilume building.

LOCATED IN: Scottsdale, Arizona.

MATERIALS USED: Perforated aluminum sheet, powder coated.

TEMPE FIRE STATION #2
ART LIGHTING

Tempe Fire Station #2 Art Lighting

DESIGNED BY: Kevin S Berry, South Mountain Studio

PROJECT DESCRIPTION: Art monument is dedicated to firefighter Tommy Arriaga, who tragically passed away in 2020 from work-related colorectal cancer. Tommy was the second of three Tempe firefighters lost in the line of duty. This memorial ensures their legacy will live on; recognized upon every visit to the station as monument sits in the exterior corner wall of building. Monument lights up with LED lights from dusk until dawn.

LOCATED IN: Tempe, Arizona.

MATERIALS USED: 3D Heart is 7' tall, composed of formed steel plate welded to steel tube substructure. Powder coated.

Engineered Artworks
