Job Openings	**Job ID**
Associate Data Warehousing Analyst:	1098

Analyze, define, maintain, and manage business data contained within the enterprise data warehouse. Map and verify data from existing data sources into the warehouse, ensuring the integrity of the data. Certify all the data in the warehouse prior to populating production.

Case Manager, RN: 1103

Assist members in navigating the healthcare system, ensuring access to evidence-based care. Educate, empower, and coordinate services for members to improve their health and well-being. Facilitate communication between patient, provider, and health plan to ensure members receive the full benefit of integrated care.

Program Manager – Continuous Improvement: 1100

Support and drive business line program delivery to achieve corporate and divisional objectives. Lead and direct project team(s) by creating project plans, monitoring milestone completion, ensuring mitigation to identified issues/risks, and validating completion of deliverables. Interface regularly with key senior business leaders to enable a smooth transition from strategy development to program identification and execution.

Senior Product Manager: 1096

Work independently to identify market opportunities, evaluate product concepts, and lead key product development projects and initiatives from concept through design, launch, and implementation with ongoing ownership to drive penetration and ramp-up across aspects of both Individual and Group Medicare market. Work closely with market research, sales, clinical management, actuarial, underwriting, customer advisory groups, and external advisors and consultants to monitor external trends. Identify customer segment needs, desires, and value perceptions. Maintain a strong partnership with market-facing teams to ensure pre-sales efforts are effective and launch performance exceeds forecasts.

Associate Enterprise Architect: 1092

Assist in the participation of all phases of system design, development, and integration to ensure that design solutions meet business needs and align with enterprise standards. Support technical requirement definition, functional specifications, design documentation, vendor selection, and vendor integration as core team member of project teams.

Assistant General Counsel – Litigation: 1095

Manage all aspects of litigation on behalf of the company both directly and through the management of outside counsel. Manage response to discovery, subpoenas, and record requests. Represent the company in administrative proceedings. Provide legal counsel and guidance to company employees regarding complex legal matters and projects.

Enterprise Architect: 1093

Actively participate in all phases of system design, development, and integration to ensure that design solutions meet business needs and align with enterprise standards. Support technical requirement definition, functional specifications, design documentation, vendor selection, and vendor integration as core team member of project teams.

Case Specialist – GAU: 1091

Investigate and resolve member and provider complaints, benefits appeals, and administrative appeals on all company products. Ensure compliance with state and federal guidelines, including Centers for Medicare & Medicaid Services requirements. Maintain all appeals documentation according to external agency requirements.

Diversity, Equity & Inclusion Manager: 1088

Provide enterprise-wide leadership and consultation to activate corporate diversity, equity, and inclusion (DEI) strategy. Manage DEI programs for employees, including Diversity Council and Employee Business Resource Groups. Advance company's performance as an employer, community partner, and payer in a multicultural marketplace. Collaborate, coordinate, facilitate, and implement various sized projects to ensure timely and accurate completion aligned to goals impacting employees, suppliers, and members.

Director, Pharmacy Vendor Contracting: 1080

Direct the development and administration of pharmacy vendor contacts, the pharmacy analytics function, and the enterprise approach to medical drug management. Ensure programs, plans, and policies align with the company's philosophy and objectives.

Senior Information Security Analyst: 1075

Work with vendors, internal stakeholders, and information security team to support and administer security tools in accordance with internal standards and best practices. Provide off-hours support to troubleshoot and upgrade software as necessary. Participate in Computer Security Incident Response Team calls when asked. Participate in special projects as assigned and take full ownership of deliverables.
