

## EQUIPMENT LIST

Equipment Type	Equipment Description	Quantity
CAD / CAM Software	Siemens Solid Edge	4
CAD / CAM Software	Siemens NX CAD	1
CAD / CAM Software	Siemens NX CAM	1
CAD / CAM Software	WinCNC	1
CAD / CAM Software	Vectric Vcarve Pro	1
Inspection Software	PolyWorks Inspector	1
Inspection Software	Zeiss Calypso	1
Reverse Engineering Software	Geomagic Wrap	1
FFF Additive Manufacturing	Markforged X7	3
FFF Additive Manufacturing	Markforged Mark Two	12
FFF Additive Manufacturing	Raise 3D Pro 2	2
FFF Additive Manufacturing	Raise 3D Pro 3	2
FFF Additive Manufacturing	Raise 3D E2	4
SLA Additive Manufacturing	Formlabs Form 3	2
SLA Wash Station	Formlabs Form Wash	1
SLA Cure Station	Formlabs Form Cure	1
CNC Machining	HAAS VF-3B Mill	1
CNC Machining	Shop Sabre Pro 408 Mill	1
CNC Machining	HAAS SL-20T Lathe	1
Machining	Bridgeport Knee Mill	1
Machining	KBC Bench Lathe	1
Machining	Drill Press	1
Machining	Vertical Band Saw	1
Machining	Horizontal Band Saw	1
Forming / Assembly	12 Ton Hydraulic Press	1
Assembly	1 Ton Arbor Press	1
Welding	T.I.G. / Arc Welder	1
Finishing	Media Blaster	1
Finishing	Vibratory Tumbler	1
Finishing	2" Belt / 6" Disc Sander	1
Finishing	6" Bench Grinder	1
3D Scanning / Probing	FARO Quantum S	1
3D Image	Keyence IM-8000	1
3D Scanning	Zeiss Comet 5M	1

# HOLISTIC MANUFACTURING SOLUTIONS

## OUR MISSION

CAM Logic, Inc. is a holistic manufacturing provider leveraging engineering & design, manufacturing, and quality control. Our success is a result of a long-standing commitment to our customers, our region, and the industries we serve.

## Engineering & Design

Realizing the vision of a complex product into a market-ready reality means developing accurate visuals, models, and instructions to guide the manufacturing process. Our mechanical design services leverage cutting edge tools and best practices to ensure quality and state-of-the-art manufacturing outcomes.

- CAD Agnostic
- Product Design
- FEA (Finite Element Analysis)
- Motion Simulation
- Material Science & Engineering
- DFAM (Design for Additive Manufacturing)
- Reverse Engineering

## Manufacturing

Our deep-rooted history in manufacturing enables us to provide advanced solutions for our customers. Whether that's leveraging cutting-edge additive manufacturing, or traditional methods. You can trust that your finished product will be made efficiently, on time, and meet your quality standards.

- Additive Manufacturing
- Subtractive Manufacturing
- Finishing Manufacturing
- Specialization in Light-Weighting
- Specialization in Automation Manufacturing
- Prototypes to Low-volume Production scale

## Quality Control, Scanning, & Probing

We take pride in our work. Our quality lab ensures that everything leaving our manufacturing floor meets or exceeds our manufacturing standards. We apply sound quality practices and standards around our processes and, ultimately, our customers' solutions which sets CAM Logic apart from our competition.

- Laser Scanning Inspection
- Structured Light Scanning Inspection
- CMM (Probe) Inspection
- Comprehensive Inspection Reporting
- Industry-proven Metrology Equipment
