YOU NOW HAVE MORE OPTIONS ON TEST DAY

INTRODUCING THE NEW NBME® EXAM DELIVERY APP

Beginning Jan. 19, 2023, you will have the option to take your in-person, web-based exams on your Apple® iPad® device using the new NBME Exam Delivery app.

This will be a standard device option, in addition to desktops or laptops, for the following exams:

▶ NBME Subject Exams

▶ Customized Assessment Services (CAS)

▶ Customized Test Batteries

▶ International Foundations of Medicine® (IFOM®)

Strikeout available	☑
Compatible with Android™ devices	☒
Compatible with remote exam delivery	☒
Notes available	☒
Compatible with Apple Pen and other stylus pens	☒

NBME®

GETTING STARTED

We recommend familiarizing yourself with the app before test day. You can find helpful information on the app's home page:

▶ "Required Configuration" explains that the app uses Single App Mode (Assessment Mode) to automatically lock and secure your test and how to enable it.

▶ The "Sample Test" provides a tutorial on navigation features, such as highlighting and striking out, and a 10-item sample test to practice the app's mode of touch technology.

ON TEST DAY

Launching the exam on test day is as easy as:

1. Open the app and tap "Take a Proctored Exam" and "Yes" to enable Single App Mode.

▷ When enabled, you will not be able to access notifications or other apps on the iPad, and any apps previously opened are paused until you end your test or exit Single App Mode.

2. Enter "Examinee Start-Up Code" provided by your proctor.

3. Enter your biographic information.

▷ Date of Birth, Examinee ID, Workstation Number (e.g., enter first initial of first name and full last name), select security question.

4. Follow prompt to launch exam.

Visit the App Store to download the NBME Exam Delivery app.
