FEB 6TH | 3:00 - 6:30

TRY THESE CAREERS:

ELECTRICIAN
PHLEBOTOMIST

HVAC TECHNICIAN
PLUMBER

PROCESS TECHNICIAN

ELECTRICIAN

Help a homeowner remodel their home by taking down and installing a new pendant light fixture. If you do it right, the light will turn on!

HVAC TECHNICIAN

Troubleshoot a client's nonfunctioning air conditioning unit while learning about basic components and functionalities. If you troubleshoot correctly, the unit will work again!

PHLEBOTOMIST

Learn the proper and safety protocols to draw blood samples for clinical research, medical testing, and blood testing. If you do this right, you'll be able to draw blood from the fake arm!

PLUMBER

Install under sink plumbing pipes for a client seeking to increase the number of bathroom sinks from one to two sinks. If you do this correctly, both sinks can deposit water without any leakages!

PROCESS TECHNICIAN

Work in a mock refinery and control the flow of chemicals using diagrams and opening and closing valves. If you do this right, the chemicals will flow to and from your desired tanks!
