

## *More Reps For Your Repertoire*

You have picked out a song to learn – Check

You have identified the hardest spots and practiced – Check

You feel confident to perform your new piece – Check

You take the harp to perform - Check

3 minutes later the piece is over – Wait, What??????

## *Strategies for Repetition and Variations:*

1. *Timing:* Add rubato and change the mood of the song.
2. *Rhythm:* Changing the rhythm changes the character of the song. Go from eighth note patterns to triplet patterns, 4/4 to 6/8, Swing the notes, etc. How many ways can you change the rhythm?
3. *Ornamentation:* Add trills, turns, glissando, slides etc.
4. *Harmonies:* Change the piece by transposing into another key modulating by step or half step, change the piece from Major to Minor or into a mode and add different chords – 7ths, 9ths, suspensions etc.
5. *Tempo:* Change the speed of the piece from slow to fast, fast to slow and everything in between.
6. *Articulations:* Staccatos, Sostenuto, Legato and Muffling.
7. *Countermelody:* Play around with the melody of your piece and create another melody that can be played at the same time. Canon in D – Pachelbel works well with many melodies.
8. *Textures:* Go from unison to two-part harmonies, three-part and up. Add different effects using harmonics, bends, percussion effects and adding things as in paper weave, tuning key slides, etc.
