

## Weekly Halacha

### ***What type of cup may be used for netilas yadayim?***

A cup made of any material, including paper or plastic, may be used. Even a cone-shaped paper cup which cannot stand on its own may be used, since the cup was designed and manufactured in that shape. *L'chatchilah*, it is not advisable to use a bottle, a can or any vessel with a narrow opening for washing, since it is preferable that the entire revi'i's reach the hand full-force from the vessel from which it is being poured. If, however, no other vessel is readily available, it is permitted to use one with a narrow opening as long as the water is poured in an uninterrupted flow.
